My decisions will be based on the interests of the local community. I will take an impartial approach to all matters. I hope to create a constructive and diverse learning environment for the youth, both physically and intellectually. I am also invested in ensuring the elderly have access to the best of healthcare and community services in our town.

I wish to see Exmouth evolve into a more sustainable town by the implementation of new environmentally friendly built forms. I believe a healthy economy can be balanced with the preservation of our natural habitat. I will be patient with all members of the community when it comes to listening and I will dedicate time to deliberate methodically with all matters, especially those that affect the whole of the Exmouth community.

I am supportive of fresh enterprises and value the competition and diversity generated by new ideas. With the correct intentions in mind, a community led by the right people can make decisions that benefit us all.
