## **PUBLIC CONSULTATION OPEN SHARED FOOTPATH DESIGN**

The Shire of Exmouth hereby advises that it is designing a high-quality shared path linking the Recreation precinct and skate park with Town Beach via Murat Road and Truscott Crescent in collaboration with the Department of Transport.

Truscott Crescent is a popular link for pedestrians and cyclists for recreational activities and access to Town Beach.

- The project aims to improve safety for pedestrians and cyclists by providing a relatively uninterrupted route between these two activity nodes.
- The proposed shared path aims to improve safety by removing cyclists and pedestrians from the roadway, reducing the interface and potential for conflict with motor vehicles.
- The proposed route aims to minimise road crossings for path users where possible and provide clear separation from traffic adjacent to Murat Road.

We strongly encourage residents and visitors to have their say by indicating their support or otherwise for the project and providing comments around the proposal to inform the detailed design of this shared path.
