Shire of Exmouth
Local Planning Scheme No. 4
Amendment No. 11

Reclassification of Crown Lot 510 on DP 427828 Willersdorf Road, Exmouth to a 'Tourism' zone with Restricted Uses (R4), to facilitate short-stay accommodation and event venue with supporting facilities.

FORM 2A

PLANNING AND DEVELOPMENT ACT 2005
RESOLUTION DECIDING TO ADOPT AMENDMENT TO LOCAL PLANNING SCHEME
SHIRE OF EXMOUTH
LOCAL PLANNING SCHEME NO.4
AMENDMENT NO. 11

Resolved that the Local Government pursuant to Section 75 of the *Planning and Development Act 2005*, amend the above Local Planning Scheme by:

1. Rezoning Lot 510 on Deposited Plan 427828, Willersdorf Road, Exmouth from the 'Public Open Space' reserve to the 'Special Use 11' zone;

2. Amending 'Schedule 4 – Special Use Zones' to include SU11 and relevant conditions to apply as follows:

No	DESCRIPTION OF LAND	SPECIAL USE	CONDITIONS
11	Lot 510 on Deposited Plan 427828, Willersdorf Road, Exmouth	As a 'P' use: • Tourist Development • Hotel As an 'I' use: • Reception Centre • Recreation - Private • Restaurant/Café • Small Bar • Workforce Accommodation	1. The purpose of the special use zone is to facilitate a low impact tourism development in accordance with the lease for a Short-Term Eco-Tourism Accommodation Facility and Event Venue. 2. Sensitive land uses to be setback 500m from the Water Corporation waste-water treatment plant. 3. Habitable structures to be setback behind the 100-year horizontal setback datum. Easily relocatable and non-habitable structures and facilities may be considered at or forward of the 100-year horizontal setback datum. 4. Land uses listed as 'I' are permitted where they form part of the works and use associated with the predominant use/s. 5. Vehicle access to be obtained from Willersdorf Road only. Vehicle access to the coast to be controlled via existing access from Willersdorf Road to Town Beach. 6. In addition to standard application requirements, Development Applications shall address the following matters, to the specification and satisfaction of the local government: a. Details for a potable and non-potable water supply. b. Details for power supply. c. Details for waste water treatment. d. Details for stormwater management. e. Details for construction management, including the following matters: i. Willersdorf Road access to golf club and consideration during construction and operation. ii. Fencing and control of access from the lot to the informal tracks to the beach. f. Bushfire management plan and bushfire emergency evacuation plan. g. Landscape management plan. h. Signage strategy for the development entrance to Willersdorf Road, and wayfinding. i. Fencing to demarcate lot boundaries and formalise control of access to/from the coast.

No	DESCRIPTION OF LAND	SPECIAL USE	CONDITIONS
			j. Environmental and Foreshore Management Plan, including but not limited to the following matters: i. Lighting in accordance with dark sky principles and does not impact with turtle nesting and other behavioural patterns.

3. Amending the Scheme Map accordingly;

4. Pursuant to Regulation 35 of the *Planning and Development (Local Planning Schemes) Regulations 2015*, determines that the amendment is a 'Standard Amendment' for the reason that the proposal is addressed by a WAPC-endorsed Local Planning Strategy that applies to the Shire of Exmouth.

Dated this 12th day of July 2024

.....

CHIEF EXECUTIVE OFFICER

Acknowledgement of country

We respectfully acknowledge the traditional custodians of the land on which we live and work, and recognise their continuing connection.

We pay our respects to the Elders past and present for they hold the memories, the traditions, the culture and hopes that, through meaningful connection, we aim to apply to the design and planning of communities now and in the future.

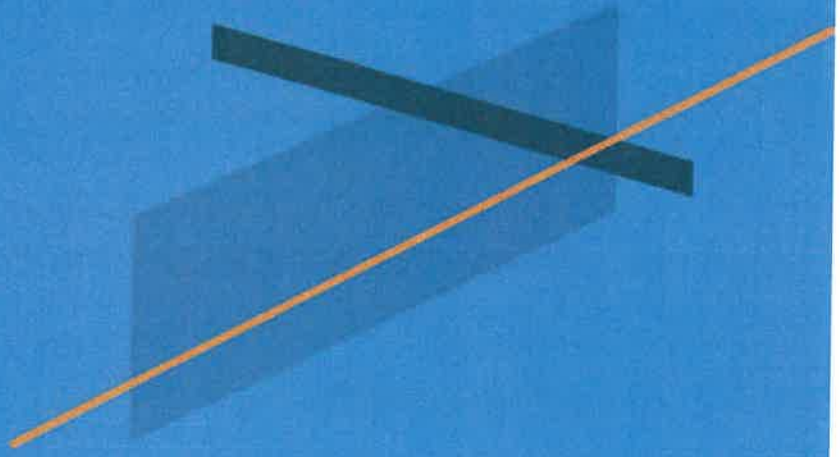
Introduction



1.0 Introduction

1.1 Background

This Scheme Amendment Request report has been prepared on behalf of our client, Sebatikel Holdings, in support of reclassifying Lot 510 on DP 427828, Willersdorf Road, Exmouth from the 'Public Open Space' scheme reserve to the 'Tourism' zone with Restricted Uses, under the Shire of Exmouth *Local Planning Scheme No. 4* (LPS 4).

Reclassifying the land to a 'Tourism' zone will introduce appropriate planning controls into the scheme to facilitate and guide future development for a "Short-Term Eco-Tourism Accommodation Facility and Event Venue" supported by complementary facilities on Lot 510 on DP 427828, Willersdorf Road, Exmouth (the subject site). The Tourism zone will facilitate an opportunity to deliver unique, low-impact and eco-conscious short-stay accommodation in a suitable location close to the Exmouth Gulf and within the Exmouth townsite. The development of the site will contribute towards a diversified economic base and through the local planning scheme will aim to deliver high-quality tourism accommodation. The proposal aims to balance its economic objectives with its environmentally sustainable approach to deliver a tourism development designed to seamlessly integrate into the natural surroundings and landscape, positively contributing to the local character.

The reclassification of the land to the 'Tourism' zone aims to provide a standard zone under LPS 4, that is contemporary and consistent with the state government's planning reform program to ensure consistency of local planning schemes. The proposed 'Tourism' zone will be guided with uses and development provisions by inserting 'Restricted Use (R4)' within Schedule 3 of the scheme text. The R4 conditions reflect the unique, low impact tourism development and complements the development controls within the scheme with other development requirements that are considered to be appropriate for the site. Use and development of the subject site for tourism purposes is consistent with and in accordance with the Shire of Exmouth's *Local Planning Strategy* (LPS), which identifies the subject site as Category 1 for 'Future Tourism', encouraging short-stay accommodation land use on the site.

It is essential that this Scheme Amendment be initiated and adopted for advertising so that it can be referred to the:

- Minister for Planning pursuant to s.83A of the *Planning and Development Act 2005* for approval for advertising under s.84; and
- EPA for a decision under section 48A of the *Environmental Protection Act 1986.*

We would seek the Shire's earliest initiation of this Request as a Standard Scheme Amendment.

1.1.1 The Proponent

Sebatikel is a project being undertaken by our client Sebatikel Holdings. The project aims to deliver high-value tourism accommodation that has a strong appreciation for the surrounding landscape, reflecting our client's passion for responsible travel and sustainable design. Emphasising sustainable design approaches, the vision for the project aims to utilise natural and organic materials, passive solar design principles, and locally sourced materials that support and complement the environmental surroundings.

A tailored project team is providing advice and technical expertise to input into the Scheme Amendment Request, including:

- **Bushfire Prone Planning** – accredited bushfire consultant;
- **PGV Environmental** – environmental consultant;
- **MNG** – licensed surveyor;
- **Iconic Water Solutions** – water and wastewater specialist; and
- **Taylor Burrell Barnett** – town planning, land tenure and project coordination.

1.1.2 Report Format

This report is prepared in support of a Scheme Amendment Request to the Shire of Exmouth *Local Planning Scheme No.4* (LPS 4). The report is structured to provide a high-level description of the project; a description of the scheme amendment area from the perspectives of land tenure, planning, servicing, bushfire and environmental management; and a description of the requested amendment to the scheme maps and text.

1.2 Scheme Amendment Request

The amendment seeks to reclassify the subject site from the 'Public Open Space' scheme reserve to the 'Tourism' zone, to insert Restricted Use (R4) provisions into Schedule 3 of the LPS4 scheme text, and to update the Scheme Map accordingly. The Scheme Amendment Request and Map is provided in **Appendix A**.

The 'Tourism' zone is appropriate and suitable for the following reasons:

- The subject site is identified in the *Local Planning Strategy* as being suitable for high-value tourism having regard to its coastal location whilst being in close proximity to the Exmouth townsite and local amenities. The proposal for high end, low intensity tourism aligns with the direction of the *Local Planning Strategy;*
- Studies have been undertaken which confirm that the site is capable of being developed for the intended land uses, having regard to coastal hazard risk management and adaptation planning, environmental characteristics and foreshore management, bushfire risk management, and servicing requirements;
- The proposal is considered to fit within the existing 'Tourism' zone and is consistent with the zone objectives. Given the nature of the proposal for Lot 510 is for a "short-term eco-tourism accommodation facility and event venue", this comfortably fits within the above scheme objectives for the Tourism zone and should be zoned as such.
- The 'Tourism' zone is proposed to be supplemented with the proposed Restricted Use 4 within Schedule 3 of the scheme text, outlining conditions that reflect the unique, low impact development outcomes and to prescribe relevant land uses and development conditions that are appropriate for the subject site.
- The project presents a unique development that will diversify short-stay accommodation options within the Exmouth townsite, further contributing to the area's natural amenities and attractiveness to tourism, and its overall competitive advantage within the Gascoyne region and the Western Australian tourism market more generally.

1.3 Pre-Lodgement Consultation

The following information in **Table 1** provides an overview of pre-lodgement consultation that has been undertaken with DPLH, the Shire of Exmouth and other government agencies regarding the proposal.

Table 1 Summary of Consultation regarding the Proposal

Date	Attendees	Purpose
19 May 2022	Department of Planning, Lands and Heritage, Taylor Burrell Barnett and Client	Meeting with DPLH to discuss lease of land, purpose of lease and referral to agencies, including the Shire of Exmouth:
19 September 2022	Department of Planning, Lands and Heritage and Taylor Burrell Barnett	To discuss the grant of a license under Section 91 of the *Land Administration Act 1997* (LAA), the progress of the current lease application and obtain consent from the DPLH to lodge a Scheme Amendment Request for Lot 510 on DP 427828, Willersdorf Road, Exmouth.
30 November 2022	Shire of Exmouth, Taylor Burrell Barnett and Client	TBB and applicant met for an escorted site visit and meeting with the Shire to discuss the proposal and reclassification of the land. Shire provided a copy of the Coastal Erosion Hazard Horizontal Setback Lines as an outcome of recent mapping undertaken by the Shire. Shire advised its preference for a 'Special Use' zone in lieu of a 'Tourism' zone. Shire recommended a Foreshore Management Plan to address control of access and delineation of land, weed and rubbish management; a Bushfire Management Plan to address emergency

Date	Attendees	Purpose
		access and provided advice on alternative solutions for water and sewer for small-scale projects.
22 August – 1 September 2023	Department of Planning, Lands and Heritage and Department of Biodiversity, Conservation and Attractions	DPLH provided advice to DBCA regarding comments raised during referral of the Lease and that the proponent was preparing a scheme amendment request. DBCA were advised that the scheme amendment request will be supported by information to address the DBCA's comments and the Shire's list of considerations including: • Mapping confirming the permanent structures/buildings are setback having regard to the 100-year line; • Bushfire Management Plan; • Environmental Management Plan (as recommended by the Shire and DBCA) addressing and minimising impacts in respect of flora and vegetation survey, management of flora and fauna (including shorebird habitat), access, foreshore management, artificial light. DBCA advised this would adequately address their comments and recommendations
1 September 2023	Department of Planning, Lands and Heritage and Department of Water and Environmental Regulation	DPLH provided advice to DWER regarding comments raised during referral of the Lease and that the proponent was preparing a scheme amendment request. DBCA were advised that the scheme amendment request will be supported by information to address the Shire's list of considerations including: • Liaison with other government agencies and the Shire of Exmouth had been undertaken, and the previous email advice that DBCA matters had been suitably addressed. • DWER's advice will be addressed in the scheme amendment process (where relevant) and a development application process for the proposal to address matters regarding waste, floodplain management, sewerage management, native vegetation protection, CHRMAP, and wetland matters.
14 December 2023 – 28 February 2024	Shire of Exmouth	To discuss the scheme amendment request and the Sebatikel project and arrange for a draft scheme amendment to be submitted to the Shire for preliminary comment.
15 October 2024	Department of Planning Lands and Heritage, Taylor Burrell Barnett and Client	To discuss DPLH's considerations on recent planning reform discussions with the Minister, that the 'Special Use' zones are not preferred, and to utilise existing standard zones with additional uses and/or restricted uses. For Scheme Amendment 11, this would propose • Reclassification to 'Tourism' zone; • Restricting all other uses listed (i.e., restaurant, small bar etc.), and retaining the conditions. DPLH provided advice that these administrative changes would not require re-referral to the EPA. It was also discussed that as the proposal and outcome is consistent with what was initiated by the Shire, it would not need to be taken to a Council meeting.

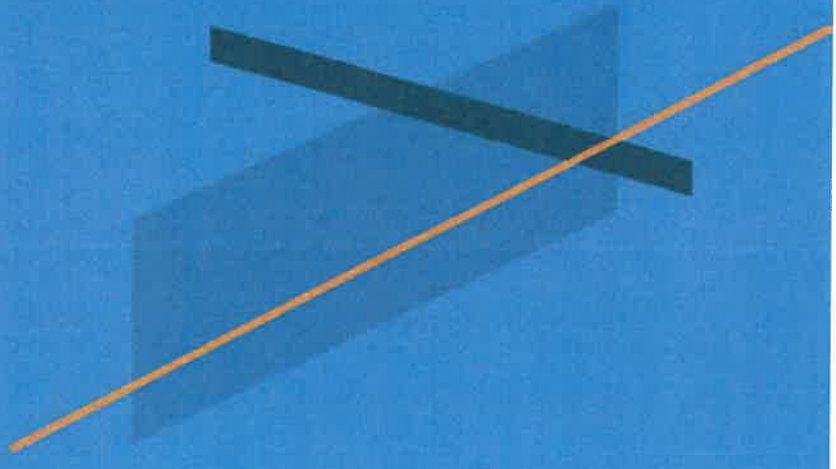
1.4 Other Approvals Process

The Project Team is engaged to undertake other studies to assist with other approvals, as follows:

- Lease of Crown Land under the *Land Administration Act 1997*. This will provide for exclusive rights to the land in accordance with the Lease conditions; and
- Development application, building permit, and relevant environmental health approvals would be obtained at the appropriate stage and following detailed design of the project.

2.0

Project Description



2.0 Project Description

2.1 The Project

The proposed amendment will facilitate a proposal for an eco-conscious short-stay accommodation and event venue, supported by incidental uses and facilities. The proposal is located immediately to the east of the Exmouth Gulf Club and approximately 1.4 kilometres east of the Exmouth town centre.

The project vision is to deliver a short-stay accommodation product that is described as 'simple luxury' comprising of natural stone, textured concrete walls and organic materials to complement the surrounding ocean views and rugged landscape. The projects aim to deliver low-impact but high-quality short-stay accommodation, presented as a diversified collection of bespoke accommodation units sensitively located in a natural setting. It is considered that the nature of the proposal for high end, low intensity tourism is consistent with the direction identified in the *Local Planning Strategy*; and comfortably fits within the scheme objectives of the 'Tourism' zone. As such, this scheme amendment request proposes a 'Tourism' zone with appropriate development controls to guide future development applications and decision-making.

The scheme amendment includes a Restricted Use (R4) for the subject site to include conditions that reflect the unique, low intensity development proposed and to prescribe land use and appropriate development requirements. The project team has undertaken studies to ensure there is a high-level of understanding of the site's characteristics to ensure the proposal has given due consideration to the natural environment in a manner that is reflective of the community's values. The proposal aims to incorporate sustainable design and management principles, respecting environmental characteristics of the site. In addition, the proposal will be self-sufficient in terms of water, wastewater and power, with provision for staff accommodation. The project will deliver job opportunities whilst the sustainable operation of the development will minimise impacts on the environment and the community. The unique and low-impact nature of the project aims to deliver a set of structures providing short-stay accommodation that is considerate of the amenity and character of the site, in a manner that is reflective of the scale of the project and its setting in proximity to the coast.

Notably, the project is contained within land that has been strategically identified for future tourism use. The site currently is not accessible to the general public and is not used for any purpose. The site has been carefully considered in consultation with state government agencies, utility providers, and the local government. The site has had due regard to the current environmental and topographical characteristics of the site, and relevant constraints including coastal processes.

The proposal aims to deliver a small of accommodation units as a boutique tourism development. Guests will be provided with supporting facilities and amenities including a lobby with wine room, gym and wellness room, open air pavilion, pool, restaurant and bar. The low impact nature of the project is consistent with the project vision to create a unique and boutique tourism development to deliver an immersive experience for guests.

Staff are to be housed in a set of structures on-site, which would fit within a definition of workforce accommodation. Accommodation for staff would include an on-site manager and security.

The project aims to contribute towards the local tourism market and the local economy through partnerships and connections with existing businesses in the town, to foster a positive and collaborative outcome with the community. This will contribute to the key elements of tourism – access, accommodation, attractions, activities, and amenities.

2.1.1 Site Selection

The subject site is located approximately 1.4 kilometres east of the Exmouth town centre and is accessible via Willersdorf Road. The subject site has been selected due to its elevated location behind the 100-year horizontal setback datum that has been modelled and mapped in the draft *Coastal Hazard Risk Management and Adaptation Plan* (refer **section 3.1.1**). The elevated nature of the site provides an added benefit of opportunities for providing guests with an outlook towards the Exmouth Gulf to the east. Land to the north and south primarily consist of sand dunes and coastal vegetation. Land to the west is used by the Exmouth Golf Club.

The Scheme Amendment area is confined to Lot 510 on DP 427828, Willersdorf Road, situated inland from the coastline of the Exmouth Gulf. Lot 510 has a total area of 5.185 hectares, refer **Appendix D**, and the scheme amendment aligns with the lot boundaries.

The subject site has been identified as a tourism investigation area in the *Local Planning Strategy* (refer **section 3.3**). The studies prepared for the site confirm the suitability to support low-impact tourism development. The proposal to reclassify the subject site to the 'Tourism' zone is consistent with the *Local Planning Strategy* and the 'Tourism' objectives of the zone under LPS 4, having regard to the site-specific characteristics, landform capability and coastal setback requirements.

2.1.2 Land Ownership

The scheme amendment relates to Crown Lot 510 on DP427828. Particulars of the original lot details are provided in **Table 2** and a copy of DP427828 is contained in **Appendix D** for convenience.

Table 2 Subject Site Details

Lot No.	Deposited Plan	Volume	Folio	Registered Proprietor	Area
510	427828	LR3177	540	State of Western Australia	5.1850 ha

The proponent submitted a Crown Land Enquiry to the Department of Planning, Lands and Heritage (DPLH) for a request for a lease for a "Short-Term Eco Tourism Accommodation Facility and Event Venue". The request was referred internally within the DPLH, and was referred externally to the Shire of Exmouth; Department of Biodiversity, Conservation and Attractions; Department of Water and Environmental Regulation; Department of Energy, Mines, Industry Regulation and Safety; Tourism WA; Gascoyne Development Commission; Water Corporation; Horizon Power; and Landgate Valuation Services.

The Shire of Exmouth acknowledged that the proposed lease was consistent with the Shire's *Local Planning Strategy* (refer **section 3.3**) which identifies the land as 'Future Tourism 1'. The Shire provided its in-principle support for the proposed lease.

Through the referral process, relevant comments were compiled and in consultation with the Department of Planning, Lands and Heritage (DPLH), the proposed lessee designed the proposal to address preliminary comments from agencies and the Shire, including setting back the development from the 100-year horizontal setback datum and excluding coastal areas subject to Native Title. Through the referral processes, agency comments were addressed and agencies advised of no objections to the granting of the Lease.

The DPLH has granted a section 79 *Land Administration Act 1997* (LAA) lease for a term of 21 years for the purpose of a "Short-Term Eco-Tourism Accommodation Facility and Event Venue" to Sebatikel. The lease is in effect, allowing for the leaseholders to carry out necessary detailed planning and design investigations on-site.

2.2 Surrounding Context

The proposed scheme amendment has been prepared in consideration of the local context of the area, including surrounding land uses and development, as detailed below.

2.2.1 Cape Range National Park and Marine Park

The Cape Range National Park and Ningaloo Marine Park are included within the World Heritage Boundary, recognised for their ecological importance, natural, cultural and scientific values. Located approximately 20km south-west of the subject site the National Park and Marine Park support the Gascoyne region as a tourist destination, benefitting from its unique natural landscape and biodiversity, fishing opportunities, and marine and wildlife tours.

2.2.2 Learmonth RAAF Base / Airport

The Shire of Exmouth operates the civilian airport facilities at the Learmonth RAAF Base / Airport, which is located approximately 36km south of Exmouth. The Learmonth Airport provides flight services connecting to Perth, Sydney, Brisbane, Melbourne and Adelaide. Helicopter operators utilise the airport for supporting off-shore oil and gas operations.

Taxi and bus charter services are available to and from Learmonth Airport to the Exmouth townsite. A number of car rental companies operate rental booths in the airport terminal.

2.2.3 Exmouth town centre

Exmouth townsite is the principal settlement within the Gascoyne region of Western Australia.

The Exmouth town centre is located approximately 1.4km to the west of the subject site. The town is the primary settlement and administrative centre for the local government and provides an extensive range of local services. More specifically, the Exmouth town centre contains essential government services for the local community and visitors as well as healthcare services, retail, food and beverage offerings, tourism services and facilities. Within the Exmouth townsite, facilities for indoor and outdoor passive and active recreation are in proximity to the site including tennis/squash courts, community pool, recreation centre and football oval, skate park, and bowling greens.

2.2.4 Ningaloo Aquarium and Discovery Centre

Situated approximately 1.3km south-west from the subject site, the Ningaloo Aquarium and Discovery Centre is a renowned research, education, tourism and community landmark for the town. The centre has a diversity of functions including community art gallery, aquarium and local interpretation exhibits as well as research and education facilities. The Ningaloo Aquarium and Discovery Centre demonstrates the attractiveness of Exmouth to a range of domestic, interstate and international tourists. In turn, there are opportunities associated with the subject site's proximity to such tourism amenities and infrastructure within the Exmouth town site.

2.2.5 Exmouth Boat Harbour

The Exmouth Boat Harbour supports the local fishing, charter and recreational vessels and businesses in the region. The boat harbour provides boat launching, refuelling and berthing opportunities for a range of commercial and recreational vessels. Fish cleaning facilities are all available. It is understood that cruise ships can anchor within the Exmouth Gulf and tenders can provide cruise-liner guests access to the Exmouth town site.

It is considered that the Exmouth Boat Harbour is the northern gateway to the World Heritage-listed Ningaloo Marine Park, known for experiences associated with swimming and other water-based activities for viewing whale sharks, manta rays, humpback whales, turtles and the reef habitat.

2.2.6 Tourism Accommodation

Camping options are available in the Cape Range National Park and pastoral stations.

Within the Exmouth town site there are existing tourist accommodation options including:

- Ningaloo Caravan and Holiday Resort;
- RAC Exmouth Cape Holiday Park;
- Ningaloo Lodge;
- Exmouth Escape Resort;
- Potshot Hotel Resort; and
- Manta rays Ningaloo Beach Resort within the Exmouth Boat Harbour.

It is understood that during the peak tourism season, dwellings within the townsite are used by visitors and tourists. A number of dwellings are listed on hotel and accommodation websites, available for visitors. During the peak tourism season, the town's population can double or triple in size, placing a strain on housing for local residents, accommodation for itinerant workers accessing the town to take advantage of seasonal jobs, and visitors.

The 'Tourism' zone currently does not include the 'Workforce Accommodation' land use. As such, the scheme amendment request seeks to insert an 'Restricted Use 4' (R4) within Schedule 3 to include workforce accommodation as an incidental use. Whilst remaining in close proximity to the services of the townsite, the development offers bespoke, high-quality, low-impact tourism accommodation that is self-sufficient with water, power and wastewater, and will complement other forms of available short-stay accommodation and tourist facilities within the town site.

2.2.7 Exmouth Golf Club and Course

The Exmouth Golf Club is adjacent to the immediate west of the subject site. The Exmouth Gulf Club provides social and competitive sporting opportunities to the community. The 18-hole golf course is located to the west of the site and provides separation between the subject site and Murat Road (the primary entry road into the town).

The Exmouth Gulf Club is identified as 'Public Open Space – Golf Course' within the Shire of Exmouth's *Local Planning Strategy*.

This scheme amendment request has given due consideration to safety and visual amenity and will ensure an appropriate development interface between the 'Tourism' zone, and the Golf Club facility. The proposal will address relevant matters including appropriate landscape treatments and controlling pedestrian and vehicle access to and from Willersdorf Road.

2.2.8 Exmouth Waste Water Treatment Plant

The Exmouth Waste Water Treatment Plant (WWTP) is located within Crown Lot 368 Willersdorf Road. The WWTP establishes a generic 500m buffer, affecting a portion of the south west corner of the subject site. The project was referred to the Water Corporation as part of referral processes associated with the Lease. The Water Corporation did not object to the proposed location of the proposal or the Lease. As part of the scheme amendment, development controls can be considered to ensure that sensitive land uses are located outside of the generic buffer to mitigate impacts.

It is noted that the *Local Planning Strategy* identifies the future relocation of the WWTP, which would result in the decommissioning and removal of the existing WWTP facility and its generic 500m buffer.

2.2.9 Naval Communications Station Harold E Holt

Immediately north of the subject site is Lot 43 on DP 209471, owned in freehold by the Commonwealth of Australia. Lot 43 is also known as Area B of Naval Communications Station Harold E. Holt, and contains a high frequency receiver site.

2.2.10 Willersdorf Road

The subject site is directly accessed via Willersdorf Road. In turn, Willersdorf Road connects to Murat Road functioning as the primary access road into the townsite, and links to the broader regional highway network.

Willersdorf Road is a road managed by the local government and it provides public access from the Exmouth townsite through to the Town Beach and Exmouth Gulf.

The scheme amendment area will require access from Willersdorf Road. This will not prevent or encumber the continued public use of the road in order to access the Town Beach and Exmouth Gulf. In addition, the scheme amendment seeks to control access to Exmouth Gulf from the proposal, by directing guests to make use of Willersdorf Road and any public trails to the coast.

A key objective of the Environmental Management Plan (refer **section 2.3**) is the control of access. The development will be designed to, amongst other things, prevent access to the native bushland surrounding the proposal, and will direct guests towards beach access points that use existing roads/tracks.

2.2.11 Town Beach and Foreshore Reserve

The local planning scheme provides for a foreshore reserve adjacent to the Exmouth Gulf, which is associated with the Town Beach. The foreshore reserve is understood to be managed by the Shire of Exmouth.

Town Beach is a popular destination for residents and tourists of the town, located approximately 1km south of the subject site. The Town Beach is considered to be a safe place to swim and is popular for locals and tourists to access and use for walking, four-wheel driving, and water-based activities including swimming and snorkelling. Town Beach is the most accessible and closest point of access to the Exmouth Gulf from the town centre.

Existing coastal access is available from Willersdorf Road and it is understood vehicle and pedestrian access is possible from Willersdorf Road onto the Town Beach. The Shire has adopted the *Exmouth Town Centre and Foreshore Revitalisation Plan* which seeks to enhance the pedestrian infrastructure and amenities in close proximity to the subject site. An existing foreshore trail runs parallel between the subject site and the beach, connecting up to the informal access track at the end of Willersdorf Road.

Access to Town Beach is possible from the end of Willersdorf Road via an informal trail running north-south along the dune system. Identified under the *Foreshore and Open Space Development Plan* (FOSDP) the enhancement of Town Beach is proposed with upgrades within the foreshore areas. The upgrades along this trail include improved beach access, trail enhancements and a secondary viewing platform to the Gulf including an interpretive trail and beach access (refer **Figure 1**). This proposal would utilise these enhanced public trails in lieu of providing new access trails to the coast.

13. Existing foreshore trail upgrade
14. Beach access and shelters
15. Potential development of Golf Club
16. Secondary viewing platform to Gulf including interpretive trail and beach access

Figure 1 Extract of Exmouth Town Centre and Foreshore Revitalisation Plan

The *Exmouth Town Centre and Foreshore Revitalisation Plan* contains relevant recommendations in context to the subject site, specifically with regards to upgrades to Willersdorf Road and the management of pedestrian access. The Scheme Amendment Request (refer **section 4.0**) provides relevant justification regarding access to Willersdorf Road, whilst ensuring the reasonable control of access to the foreshore via established roads and trails as recommended in the *Exmouth Town Centre and Foreshore Revitalisation Plan*.

2.3 Physical Characteristics and Project Considerations

2.3.1 Landscape and Coastal Considerations

The subject site is located on an elevated location in proximity to the coast, experiencing undulating slopes down to the coastline. The subject site's proximity to the eastern coastal terrain consisting of the Gulf, means the area is relatively flat, and predominantly consists of sand.

The coastline is popular for swimming, fishing, boating and diving by virtue of the typical low energy wave climate of the Gulf. It is understood that vehicles are permitted to access the beach (refer to **section 2.2.11**).

The dune system can cause floodwater to pool behind the dunes, resulting in floodplains within the townsite. The client commissioned a feature survey to inform the siting and location of structures, to avoid floodplains, and to achieve the necessary coastal setback.

2.3.2 Flora and Vegetation Considerations

A detailed Flora and Vegetation survey was undertaken on 6 September 2023 by PGV Environmental, and is discussed in the Environmental Management Plan (refer **Appendix B**). A total of 31 plant species were recorded during the flora survey, consisting of 28 native and 3 introduced. The vegetation complex mapped on the site are made up of hummock grassland with scattered acacia shrubs. There were no listed threatened or priority species recorded on the site.

2.3.3 Bushfire Considerations

The subject site is mapped as being bush fire prone as per the DFES *Map of Bush Fire Prone Areas*. The key matters for the site relate to its access and a tourism development would be considered to be a vulnerable land use,

as guests potentially would not be overly familiar with the locality. To support the scheme amendment, a Bushfire Management Plan is prepared (refer **Appendix C**) and relevant considerations are discussed further in section 3.1.2.

2.3.4 Environmental Management Considerations

Following consultation with the Department of Biodiversity, Conservations and Attractions (DBCA) regarding the lease, initial comments were received which have informed the environmental assessment with recommendations outlined to address potential environmental impacts in the Environmental Management Plan (EMP), refer **Appendix B**. The management principles outlined in the EMP are informed by and address the DBCA's comments, with management measures and actions to addressing the impact of the proposed development on the surrounding environment. The principles and actions are outlined in **Table 3**.

Table 3 Environmental Management Plan

Management Principle	Management Measure/Action
Manage guest behaviour with educational material, access restrictions and signage;	• Informational package to be provided, aiding guests with preparing for their trip. This will include information about the unique and fragile habitats and fauna that are native to the region and clearly outline all rules and regulations of staying in the accommodation. • Signage will be erected to direct people on designated access wat to remain on the existing paths.
Prevent access to the native bushland by vehicles by formalising tracks and beach access using existing cleared areas and tracks; **Prevent erosion and or soil transfer by providing stability sealed tracks and parking hardened areas;**	• Accommodation users will be notified to only use the beach access track exiting the northern end of the proposed development. • The restriction of vehicles to roads, formalised access points to the beach and designated parking areas minimises the risk of weed, pest or pathogen introduction. • The information package will include a map that will clearly demarcate access locations to the beach, access tracks, launch areas and areas that are prohibited from access.
Manage artificial light to ensure there is no light spill into surrounding habitat areas; and	• The proposed development is setback from the shore greater than 180m with the intervening dune and vegetation mitigating light spill. • Further mitigation will be undertaken by the lighting design.
Manage Waste.	• The proposed development will have adequate outdoor bins available that have self-closing lids and not be permitted to overflow.

The Environmental Management Plan will be reviewed every five years in consultation with DBCA with an annual review of environmental impacts and updates to management actions as required.

2.3.5 Aboriginal Cultural Heritage Considerations

A search of the Aboriginal Cultural Heritage Inquiry System (ACHIS) was undertaken. The ACHIS is maintained by the Department of Planning, Lands and Heritage (DPLH).

Registered places are those that have been assessed by the Aboriginal Cultural Heritage Committee as meeting the definition of an Aboriginal site under section 5 of the *Aboriginal Heritage Act 1972* and are shown as 'registered Aboriginal sites' on the ACHIS (DPLH, 2023). In accordance with the *Aboriginal Heritage Act 1972 Guidelines*, Aboriginal heritage places about which information has been provided to the Registrar of Aboriginal Sites within the DPLH, but which have not yet been assessed by the Committee against section 5 of the Act, are shown as 'lodged places' on ACHIS.

The search of the ACHIS found that:

- No Aboriginal Cultural Heritage Places are registered that intersect with the subject site; and
- One Lodged Place (ID 6115) is located to the north of the subject site and the ACHIS map information indicates the Lodged Place 6115 does not intersect with the subject site. The Lodged Place is detailed further in **Table 4**, for information purposes only.

Table 4 Lodged Place in proximity to the Scheme Amendment Area (source: ACHIS)

ID Number	ID Name	Place Status	Place Type	Culturally Sensitive	Restricted Place	Boundary Reliable
6115	Exmouth North East	Lodged	Skeletal material / burial	No	No	Yes

Under section 18 of the *Aboriginal Heritage Act 1972*, landowners (as defined in the Act) includes a lessee from the Crown, and landowners are obligated to ensure protection of places pursuant to the *Aboriginal Heritage Act 1972*. As part of the lease consultation (refer **sections 1.3** and **2.1.2**), the DPLH's Internal Aboriginal Heritage division advised that as no comprehensive Aboriginal surveys have been undertaken over the land, it is unknown if there is Aboriginal heritage present. Based on the information held by DPLH, approvals under the *Aboriginal Heritage Act 1972* may be required. The DPLH suggested that, prior to any ground disturbance that the proponent seek advice from DPLH during the planning stages.

2.3.6 European Heritage Considerations

There are no known European heritage sites or artefacts of European origin identified within the scheme amendment area.

A desktop search for heritage values relied on the inherit Register of Heritage Places, and no state registered places were identified. A search of in inherit Register did not result in any state registered places.

A review of the *Shire of Exmouth Municipal Heritage Inventory* (O'Brien Planning Consultants, 1998) did not identify any registered places.

2.3.7 Servicing Considerations

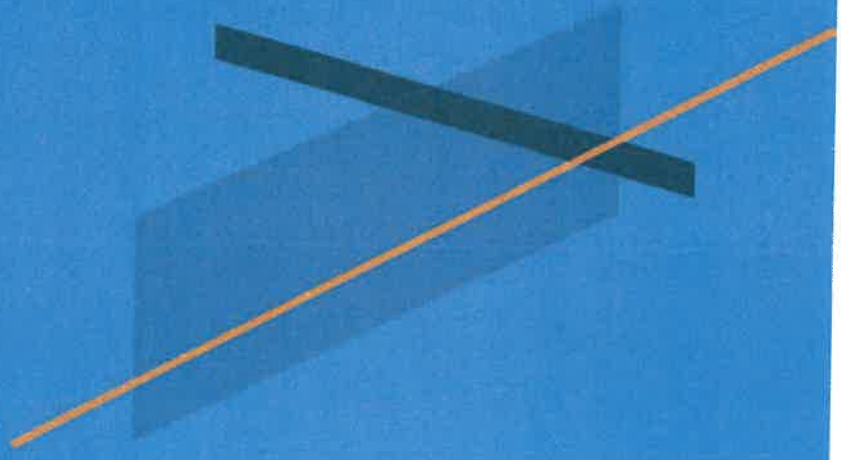
The proposed development is not capable of being connected to reticulated power, water or sewer due to its relative distance from existing services in the town site. To address this, the project will be required to be off-grid and self-sufficient in relation to power, water, and effluent disposal.

The project will provide detailed design solutions for services noting that the site will be provided with:

- Water supply via water carting, using local businesses and contractors;
- Waste Water Treatment Plant (WWTP) that processes to a high grade with water efficiency and recycling of water; and
- Renewable energy with the opportunity to incorporate battery energy storage systems.

3.0

Planning Framework



3.0 Planning Framework

The following relevant strategies and policies have been taken into considered in the preparation of this Scheme Amendment Request.

3.1 State Planning Policies

3.1.1 State Planning Policy 2.6 – State Coastal Planning Policy

State Planning Policy 2.6 – *State Coastal Planning Policy* (SPP2.6) guides the long-term sustainability of WA's coast, including the coastline of the Exmouth Gulf. The policy provides a balanced approach to managing the coastal zone for land use and development.

The objectives of SPP2.6 are outlined as follows:

1. *Ensure that development and the location of coastal facilities takes into account coastal processes, landform stability, coastal hazards, climate change and biophysical criteria;*
2. *Ensure the identification of appropriate areas for the sustainable use of the coast for housing, tourism, recreation, ocean access, maritime industry, commercial and other activities;*
3. *Provide for public coastal foreshore reserves and access to them on the coast; and*
4. *Protect, conserve and enhance coastal zone values, particularly in areas of landscape, biodiversity and ecosystem integrity, indigenous and cultural significance.*

The following policy measures are relevant considerations for the proposed development:

i. Ensure that use of the coast, including the marine environment, for recreation, conservation, tourism, commerce, industry, housing, ocean access and other appropriate activities, is sustainable and located in suitable areas.
ii. Ensure that land use and development, including roads, adjacent to the coast is sited and designed to complement and enhance the coastal environment in terms of its visual, amenity, social and ecological values.

The subject land has been identified as a future tourism site since 2019, reflected in the *Local Planning Strategy*. The lot is identified to be appropriate for tourism development with regard to the limited number of beachside lots within proximity to the town centre, providing local and tourism amenities.

The site provides access to the coastal foreshore via existing links including an informal trail that is subject to proposed upgrades associated with the development, and improved linkages with trails connecting to Town Beach identified within the *Foreshore and Open Space Development Plan*.

The suitability of Lot 510 is supported by the site elevation and appropriate development setback from the coast. In accordance with SPP2.6 a draft *Coastal Hazard Risk Management and Adaptation Plan* (CHRMAP) has been prepared by Seashore Engineering for the Shire of Exmouth and provides horizontal setbacks applicable to the subject site. The development site was selected based on its location outside of the 100-year horizontal coastal erosion hazard setback, refer **Appendix D**.

SPP2.6 allows for variation to the requirement for a CHRMAP for temporary easily relocatable structures that are demonstrably coastal dependent, development that is in coastal nodes or where development with an expected lifespan of less than 30 years for public purposes on the proviso that the development is removed or modified should it be threatened by or create coastal erosion. It is noted that the DPLH has provided input into the preparation of the lease documentation to address relevant CHRMAP matters.

3.1.2 State Planning Policy 3.7 – Planning in Bushfire Prone Areas

State Planning Policy 3.7 *Planning in Bushfire Prone Areas* (SPP3.7) outlines measures to reduce risk of bushfire to people, property and infrastructure by encouraging a conservative approach to strategic planning, subdivision, development and other planning decisions proposed in bushfire-prone areas. The project site is identified as being 'Bush Fire Prone' having regard to the *Map of Bush Fire Prone Areas*.

The *Guidelines for Planning in Bushfire Prone Areas* supplement the objectives and policy measures established in SPP3.7, to assist in their interpretation and advice on how bushfire risk is to be assessed.

SPP3.7 outlines the requirement to prepare a Bushfire Management Plan (BMP) and Bushfire Attack Level (BAL) assessment for development applications. Understanding that these assessments are required for the development assessment, Bushfire Prone Planning consultants have been employed to provide advice on the subject site following a site visit on the 10 November 2023.

A Bushfire Management Plan has been prepared by Bushfire Prone Planning (refer **Appendix C**). The assessment confirms that the proposed development structures can achieve a BAL-29 rating through appropriately sized asset protection zones, and can be sited in accordance with the *Guidelines*. The key considerations include:

- On-site shelter building may be required as part of this development as vehicle access for short-term accommodation outside of a residential built-out area requires all public roads to be provided as through roads (which for Willersdorf Road is not possible). The on-site shelter must meet the 10kW radiant heat exposure standard;
- An Asset Protection Zone (APZ) will likely require vegetation modification/removal to deliver long-term management of bushfire requirements;
- The development requires a designated water supply for firefighting purposes with appropriate water storage capacity; and
- Outcomes in consultation with the local government and WAPC will have regard to location of proposal in relation to road access to further justify the proposal; and
- A bushfire emergency evacuation plan would be prepared and implemented for the development.

3.1.3 State Planning Policy 6.3 – Ningaloo Coast

The subject site is located in the State Planning Policy 6.3 – *Ningaloo Coast* (SPP6.3) policy area. The four key objectives of SPP6.3 are as follows:

1. *Provide state agencies, local government, community and proponents with clear guidance regarding acceptable and sustainable development on the Ningaloo coast;*
2. *Maintain the Ningaloo coast as an all-seasons recreation and nature-based tourism destination and limit growth with managed staged development, to ensure that the community continues to enjoy a remote and natural experience;*
3. *Preserve and protect the natural environment and enhance and rehabilitate degraded areas within the environment; and*
4. *Consolidate future residential, commercial, higher-impact tourism and industrial development in the towns of Carnarvon and Exmouth and provide strategic directions for their future growth.*

Guiding principles are used for future planning and assessing development, to ensure the protection and sustainable use of the environment for the future. The development would have regard to:

- Sustainable development to improve the attractiveness of the region as a natural and remote place for visitors and residents alike.
- The development integrates economic prosperity in the interests of sustainable development.
- Foreshore management of the surrounding lands – open to discussion relating to development.

Through pre-consultation and engagement with the Shire of Exmouth, the development responds to the community's values. The project demonstrates these values through the proposed sourcing of local, organic, recycled materials, solar passive design, construction on-site using local companies and contractors, use of renewable energy, and on-site waste water treatment, and responsible waste management. In addition to environmental measures, the development integrates local economic interests and local partnerships as outlined in **section 2.1**.

The policy objectives, guiding principles, and considerations listed under section 5.3 of the SPP6.3 have been considered for this Scheme Amendment Request, and will be considered when preparing a development application.

3.1.4 Ningaloo Coast Regional Strategy Carnarvon to Exmouth (NCRS)

The NCRS (WAPC, 2004) informs the SPP6.3 *Ningaloo Coast*, and establishes a 30-year land use plan for sustainable tourism and land use on the Ningaloo coast. The strategy provides high-level context for the area that includes the Shire of Exmouth and coastal portions of the Shires of Carnarvon and Shark Bay.

The strategy outlines a Coastal Tourism Framework, for the purpose of guiding and managing the staging of tourism development. Relevant objectives have been considered, as detailed in **Table 5.**

Table 5 Coastal Tourism Objectives

Strategy Objective	Proposed Development
• *Provision of a range of tourism accommodation to cater for a variety in visitor experience, including limited tourism in a remote setting.*	The project provides a form of high-value tourism accommodation that is currently limited within the town, catering for a diversified visitor experience.
• *Recognition of the lack of tourism accommodation on certain sections of the Ningaloo coast.*	The proposed location of the development is supported due to the limited number of high-value tourism only sites available in beachside locations.
• *Commercial viability and opportunities for a diversity of sustainable tourism development to be realised on the Ningaloo coast*	The project represents a high-value low intensity tourism development, appropriately managing commercial viability with sustainable development considerations.

3.2 State Planning Guidelines

3.2.1 Tourism Planning Guidelines

Endorsed by the Western Australian Planning Commission (WAPC) in June 2014, the *Tourism Planning Guidelines* (the Guidelines) aim to address expectations on the scope and detail required as part of a planning assessment, to enable considered decision-making around tourism uses at the state, regional and local levels.

The Guidelines provide further direction to local governments in preparing the tourism component of a local planning strategy. The Guidelines state the following criteria can be applied when giving consideration to suitable future tourism accommodation development sites:

- *The site has been identified in a report/study as having the potential to accommodate a tourism facility;*
- *The site contains an existing tourist accommodation development;*
- *The site is located in an area of high tourist amenity and is of an adequate size to accommodate a tourism facility.*

The Shire of Exmouth *Local Planning Strategy* identifies that the subject site is suitable for tourism development, acknowledged as 'Future Tourism Area 1' in the strategy. The site is acknowledged to support high-value tourism due to the limited sites available along beachside locations, with a range of tourism amenities in close proximity. Additionally, the site is an adequate size to accommodate the proposed tourism development, further demonstrating is suitability for development as a tourism precinct as intended under this Scheme Amendment.

3.2.2 Planning Bulletin 83/2013 – Planning for Tourism

The bulletin sets out the policy position of the WAPC to guide development and address proposals for tourism purposes. PB 83/2013 has five main objectives:

- *To highlight the importance of strategic planning for tourism;*
- *Recognise local and regional variations in tourism demand and development pressures and their impacts on the viability of tourism development in assessing and determining tourism proposals;*
- *Providing guidance to local government in planning for tourism development to be undertaken as part of the local planning strategy process;*
- *Provide guidance on the development of non-tourism uses on tourism sites; and*
- *Provide for flexibility in the design and assessment of tourism and mixed-use development.*

Tourism sites and local planning schemes and scheme amendments are two sections of PB 83/2013 which are of particular relevance to the site. For tourism sites, PB 83/2013 advises specific zoning to identify particular tourism

sites in schemes, and guiding development parameters and locational criteria to determine the tourism value of sites, including:

- *Accessibility* – the site has adequate transport links.
- *Uniqueness* – the site contains, or is in the vicinity of an attraction or prominent unique landmark.
- *Tourism activities and amenities* – the site provides or has access to supporting activities and amenities.
- *Supply of land* – the site may be one of a limited number of opportunities to achieve tourism development in area.
- *Suitability of land use context* – the site is located in a land use context that will not limit the extent of activities available to guests.
- *Capability* – the site has the capacity to be developed for tourism purposes and accommodate the associated services in a manner that does not detract from the natural attributes or result in environmental degradation of the site.
- *Size* – the size of the site is adequate to accommodate a sustainable tourism facility in respects to its design, operation and function.
- *Function* – the use of the site meets a particular accommodation; market need and ensures a range of accommodation within the locality.

The subject site satisfies the locational criteria to achieve tourism value and therefore is considered appropriate to accommodate the proposed tourism development by this Scheme Amendment.

3.3 Local Planning Strategy

The Shire's *Local Planning Strategy* identifies the local government's vision and strategic intentions for the next 15 years. The *Local Planning Strategy* identifies the subject site as category 1 for 'Future Tourism'.

The objective for the 'Tourism' areas is outlined in the *Local Planning Strategy* as follows:

> *"Encourage the sustainable growth of tourism and tourism related opportunities throughout the Shire and balance growth against the conservation values of the environment upon which the area's tourism industry is based."*

The proposal can be justified against the *Local Planning Strategy* as follows:

- The proposed short stay accommodation and event venue, supported by complementary facilities (anticipated to include a restaurant, small bar, day spa, and workforce accommodation) will support growth of tourism and related opportunities on land that has been identified for future tourism purposes;
- The proposal incorporates an environmentally sustainable design approach to promote a low-intensity development that has strong consideration to the environment and surrounding land uses, ensuring there is no significant disturbance to the site; and
- The proposal presents an opportunity to provide a unique style of short stay accommodation that encourages tourism experience to Exmouth that adds to the area's competitive advantage.

Of note, the proposed 'Tourism' zone aligns to the boundaries of Crown Lot 510 on DP427828. This was in response to the coastal processes and setbacks required by DPLH; therefore, the reclassification is for less land than what is depicted on the *Local Planning Strategy* (refer **Figure 2**).

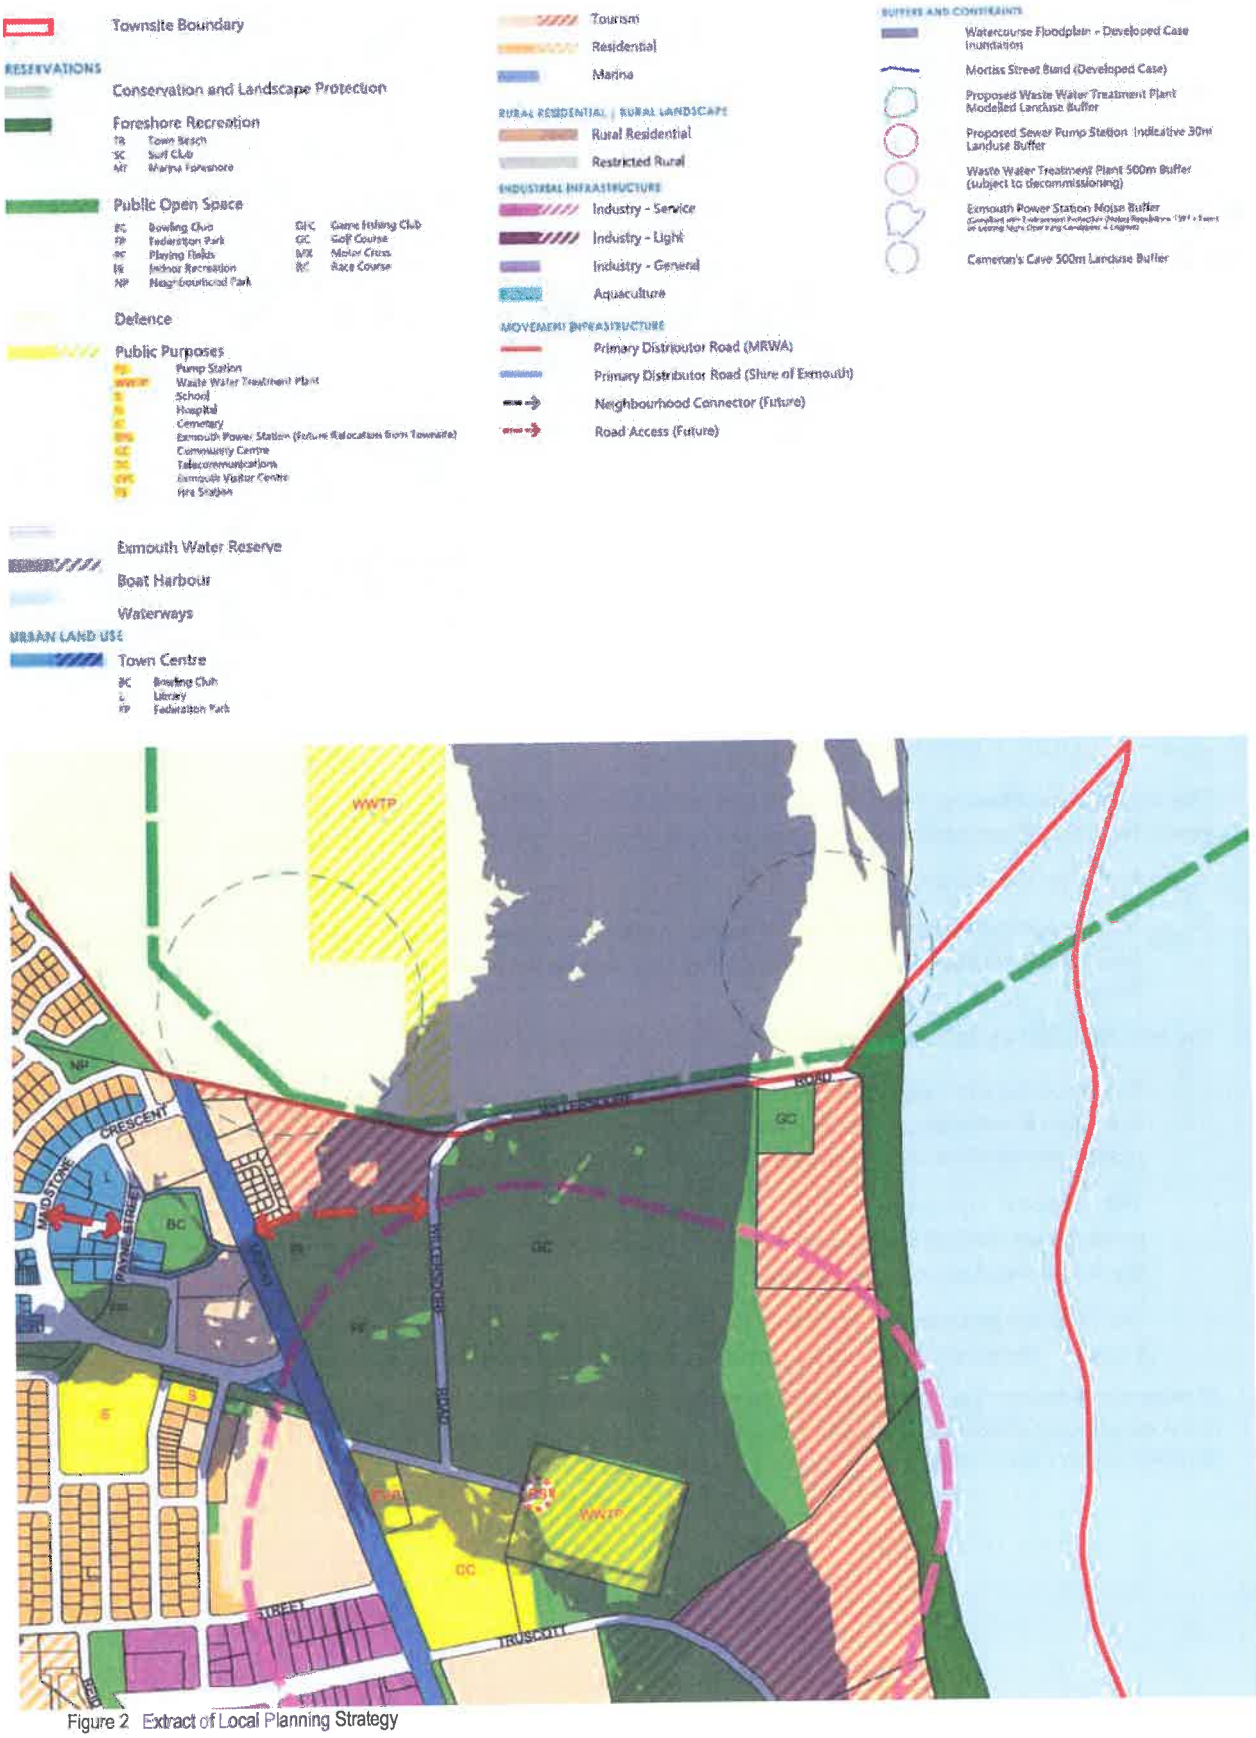


Figure 2 Extract of Local Planning Strategy

The following Strategy objectives in **Table 6** have been considered in context to the Scheme Amendment Request and future development, as part of the Shire's considerations for future tourism land uses on-site.

Table 6 Strategy Objectives

Strategy Objective	Proposed Scheme Amendment and Development
1. *Facilitate best practice tourism development by encouraging a high standard of built form, landscaping and presentation for all new tourism uses that reflect the Exmouth environment.*	**Addressed.** The development strongly considers the design of the built form, balancing luxury and sustainability. The environmental condition of the site has been assessed and the design responds to the characteristics of the land.
2. *Encourage a diverse range of accommodation based on the projected tourism demand when assessing proposals for short-stay accommodation, tourism/residential, caravan park and camping grounds, and nature-based parks.*	**Addressed.** The proposed development provides opportunity to diversify tourism accommodation by promoting a high-value project that differs largely to the existing tourism accommodation facilities in the townsite area.
3. *Encourage development within the Shire that provides a tourism experience unique to Exmouth to add to the area's competitive advantage, subject to environmental and cultural management and appropriate levels of infrastructure*	**Addressed.** The proposal provides for a unique type of tourism accommodation, with a vision for a boutique short-stay tourism development.
4. *Protect existing and future tourism from the encroachment of incompatible use or development to ensure their tourism potential is not compromised.*	**Addressed.** The surrounding land uses are complementary to the proposed development, with recreational opportunities and tourism amenities located adjacent to the development, refer section 2.3.7.
5. *Encourage affordable holiday accommodation specifically for caravan park and camping grounds in appropriate locations, including through the retention of existing and identification of future sites.*	**Not Applicable.** The site is not considered appropriate for affordable holiday accommodation in the form of a 'caravan park and camping ground' due to the size of the lease area and the characteristics of the land. The Exmouth townsite contains affordable holiday accommodation.
6. *Assist the establishment of new tourism development by considering a proportion of permanent residential being permitted within new tourist development in select locations within the townsite where criteria are met.*	**Addressed.** The development does not propose permanent residential within the tourist development; however, offers workforce accommodation as a component of the facilities on-site for the management of the development. The need to accommodate workforce on-site is in recognition of housing supply pressures experienced within the Exmouth town site.
7. *Establish appropriate signage that identifies Shire and other tourist related activities within the Shire.*	**Noted.** Signage considerations will be regarded in relation to the upgrades to Willersdorf Road and amenity considerations for the continued access to Town Beach.

3.4 Exmouth Townsite Structure Plan

The *Exmouth Townsite Structure Plan* was approved by the WAPC on 19 September 2011. The Structure Plan addressed broad land use and infrastructure matters, in order to establish general principles to guide development.

Section 4.3.1 – *Tourism* of the Structure Plan identified that tourism was the most significant economic contributor to the region, and was the key facet to the town's function and character. The Structure Plan considered that providing more quality accommodation was a primary intention for the future planning of the townsite. It considered that, by providing more high and mid-level accommodation, the townsite will have greater capability to attract international and interstate visitors, which in turn will provide for more reliability associated with regular air services. This was considered to be a key consideration particularly to help sustain the tourism economy.

The proposed development is aligned with the planning intent of the *Exmouth Townsite Structure Plan*, facilitating the future development of unique low-impact tourism accommodation, that has the ability to provide an attractive luxury alternative to other forms of tourism accommodation currently available within the town site and the region.

3.5 Shire of Exmouth Town Centre and Foreshore Revitalisation Plan

The *Town Centre and Foreshore Revitalisation Plan* aims to guide the enhancement of the foreshore reserve to improve existing facilities and assets, quality of infrastructure and improve linkages and access between key sites.

The eastern portion of the subject site is identified within the Foreshore and Open Space project area. The area of the subject site within the project area is primarily outlined for enhancement to the cycle and pedestrian network, improved seating, viewing platforms, shelter and beach access from the unsealed path connecting to Willersdorf Road, refer **Figure 3**.

The proposed development has consideration for the proposed foreshore enhancement adjacent to the site. The Revitalisation Plan complements the proposed development, by improving foreshore amenity and accessibility in close proximity to the site.

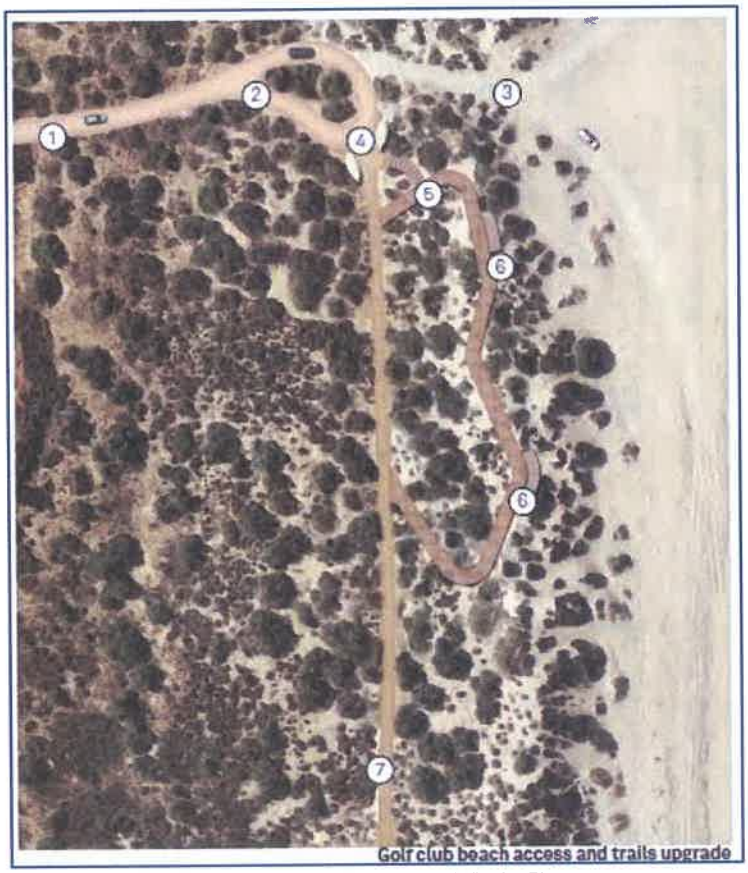

Figure 3 Extract from the Town Centre and Foreshore Revitalisation Plan

3.6 Local Planning Scheme No.4

The Shire of Exmouth *Local Planning Scheme No.4* (LPS 4) was gazetted on the 12 March 2019. The LPS 4 identifies and facilitates the implementation of the *Local Planning Strategy* and relevant regional plans and policies. As part of the gazettal of LPS 4, the subject lot was 'Public Open Space' under LPS4, refer **Figure 4**. It is noted that the subject land is not used for public open space, and is not accessible to the public for any recreational purpose.

The Lease relates to Crown Lot 510 (refer to **Appendix D**). The scheme amendment request proposes to reclassify Lot 510, whilst Lot 511 will be retained within the 'Public Open Space' local scheme reserve.

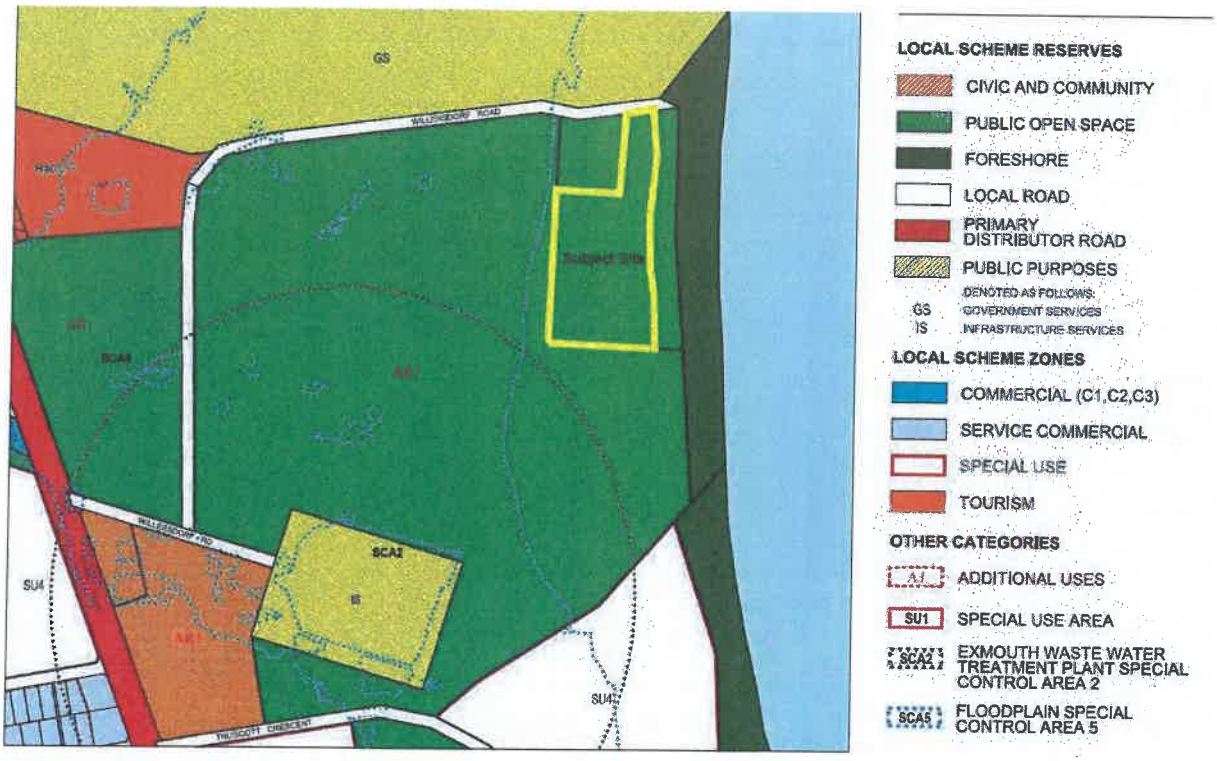

Figure 4 Extract of LPS 4

3.6.1 Tourism zone

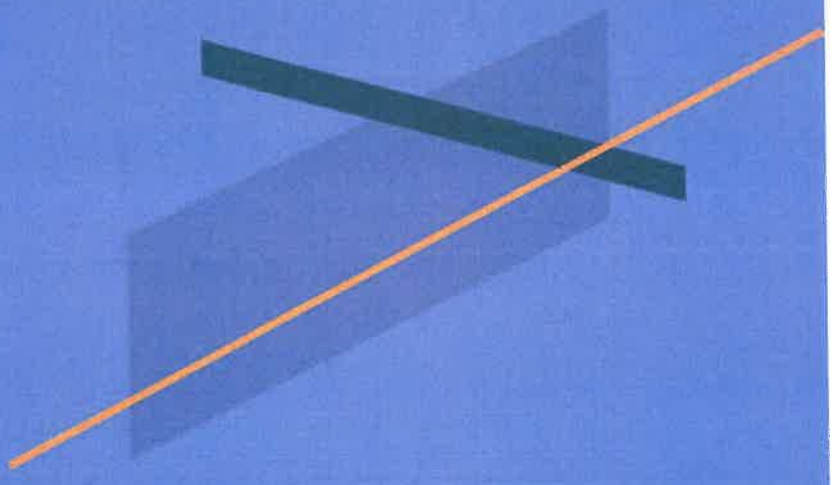
A 'Tourism' zone aims to provide a standard zone under LPS 4, that is contemporary and consistent with the state government's planning reform program to modernise the planning framework. The detail contained below in **Table 7** demonstrates how the scheme amendment will address the zone objectives.

Table 7 Tourism Zone objectives

Objective	Compliance
• ***To promote and provide for tourism opportunities.***	• The proposed development is bespoke and unique to other tourism accommodation uses within the Exmouth townsite with a vision to be eco-conscious and low impact having regard to the location and site characteristics. • The proposal provides a unique style of luxury short stay accommodation that encourages tourism experience to Exmouth that adds to the area's competitive advantage. • The proposed development will be supported by complementary facilities (anticipated to include a restaurant, small bar, day spa, and workforce accommodation) will support growth of tourism and related opportunities on land that has been identified for future tourism purposes; • The development does not propose permanent residential within the tourist development; however, offers workforce accommodation as a component of the facilities on-site for the management of the development.
• ***To provide for a variety of holiday accommodation styles and associated uses, including retail and service facilities where those facilities are provided in support of the tourist accommodation and are of an appropriate scale where they will not impact detrimentally on the surrounding or wider area.***	
• ***To allow limited residential uses where appropriate.***	
• ***To encourage the location of tourist facilities so that they may benefit from existing road services, physical service infrastructure, other tourist attractions, natural-features and urban facilities.***	

4.0

Proposed Amendment



4.0 Proposed Amendment

4.1 Purpose of Amendment

The purpose of this Scheme Amendment Request is to reclassify Lot 510 on DP 427828, Willersdorf Road, from the 'Public Open Space' scheme reserve to the 'Tourism' zone to facilitate the development of a "Short-Term Eco-Tourism Accommodation Facility and Event Venue" supported by complementary facilities anticipated to include a restaurant, small bar, day spa, and workforce accommodation. The proposed change is consistent with planning reform intentions and would result in the application of a standard 'Tourism' zone supported by a 'Restricted Use (R4)' within Schedule 3 of the scheme text, outlining conditions that reflect the unique, low intensity development proposed and to prescribe land use and development requirements that are considered to be appropriate for the site

The 'Tourism' zone is an existing zone in the LPS 4 and facilitates a consistent, streamlined and contemporary planning framework for the subject site.

The insertion of Restricted Use (R4) within Schedule 3 is designed to provide a degree of certainty (to the owners) and assurance (to adjacent owners and the community) as to the type of use and nature of development proposed. Notably, the proposed use and development consists of a unique high-quality, low-impact tourism accommodation development with supporting facilities, the additional and restricted use designation is considered to be more bespoke and unique to ensure that future development gives due consideration to relevant development requirements and management provisions that would be inserted into Schedule 3 in the Scheme text.

4.2 Tourism Zone

The objectives of the 'Tourism' zone are:

(a) To promote and provide for tourism opportunities.
(b) To provide for a variety of holiday accommodation styles and associated uses, including retail and service facilities where those facilities are provided in support of the tourist accommodation and are of an appropriate scale where they will not impact detrimentally on the surrounding or wider area.
(c) To allow limited residential uses where appropriate.
(d) To encourage the location of tourist facilities so that they may benefit from existing road services, physical service infrastructure, other tourist attractions, natural features and urban facilities.

The proposal is consisted to comfortably fit within the existing 'Tourism' zone under the LPS 4. However, given the Lease arrangements and the nature of the proposal, the full list of land uses within the 'Tourism' zone is considered to be overly broad. The scheme amendment aims to address this through including a set of restricted uses with appropriate conditions.

4.2.1 Restricted Uses

The scheme amendment request proposes to insert 'Restricted Use (R4)' within Schedule 3 of the scheme text in conjunction with the 'Tourism' zone. The proposed restricted uses are in accordance with the land uses contained in the LPS4, as follows:

(Restricted Use) – ***Hotel*** – means premises the subject of a hotel licence other than a small bar or tavern licence granted under the *Liquor Control Act 1988* including any betting agency on the premises.

(Restricted Use) – ***Reception Centre*** – means premises used for hosted functions on formal or ceremonial occasions.

(Restricted Use) – ***Recreation - private*** – means premises that are —

(a) used for indoor or outdoor leisure, recreation or sport; and
(b) not usually open to the public without charge.

(Restricted Use) – ***Restaurant/Café*** – means premises primarily used for the preparation, sale and serving of food and drinks for consumption on the premises by customers for whom seating is provided, including premises that are licenced under the *Liquor Control Act 1988*.

(Restricted Use) – ***Small bar*** – means premises the subject of a small bar licence granted under the *Liquor Control Act 1988*.

(Restricted Use) – ***Tourist development*** – means a building, or group of buildings forming a complex, other than a bed and breakfast, a caravan park or holiday accommodation, used to provide —

(a) short-term accommodation for guests;
(b) onsite facilities for the use of guests; and
(c) facilities for the management of the development.

(Restricted Use) – ***Workforce Accommodation*** – means premises, which may include modular or relocatable buildings, used —

(a) primarily for the accommodation of workers engaged in construction, resource, agricultural or other industries on a temporary basis; and
(b) for any associated catering, sporting and recreation facilities for the occupants and authorised visitors.

As outlined in **section 4.1**, the range of land uses are conducive towards the construction and operation of an integrated tourist development. The range of land uses outlined above are intended to be considered in the context that the predominant use of the site is for a tourist development that will contain a range of incidental land uses including accommodation for guests, but also facilities for guests including a restaurant, small bar, day spa, landscaped grounds, reception centre for functions, and related facilities and amenities.

4.2.2 Commentary on the proposed land uses

The aspects of the proposal and associated land uses are discussed further in **Table 8**.

Table 8 Aspects of the Proposal and associated proposed land uses

Land Use definition	Aspect of Proposal and Planning Comment
Tourist Development	The overall and integrated development of the site would fall within the definition of 'Tourist Development', providing short-term accommodation to guests as well as on-site amenities and facilities that would be expected as part of a high-end tourism offering including health and wellness, restaurant and bar, a variety of rooms, on-site recreational activities for guests, and an outdoor swimming pool.
Hotel	The 'Hotel' land use is included where necessary to align with the provision of a future Hotel liquor licence. It is understood the Hotel liquor licence would be appropriate for the operational requirements of the tourist development.
Reception Centre	The proposal seeks to host occasional events and functions (i.e. weddings) on-site, which may be associated with the tourist development. The tourist development would cater for events and functions with up to 120 attendees.
Recreation – private	The proposal includes an on-site day spa facility. Depending on the operational arrangements of the tourist development, the day spa may be considered whether for exclusive use of guests, or alternatively could also be available to other visitors / residents within Exmouth.
Restaurant/Café	The proposal includes an on-site restaurant. Depending on the operational arrangements of the tourist development, the restaurant may be considered whether for exclusive use of guests, or alternatively could also be available to other visitors / residents within Exmouth. To provide for flexibility, the land use is included in the zone.
Small Bar	The proposal includes an on-site outdoor/indoor bar. Depending on the operational arrangements of the tourist development, the bar may be considered whether for exclusive use of guests, or alternatively could also be available to other visitors / residents within Exmouth. To provide for flexibility, the land use is included in the zone.
Workforce Accommodation	The proposal includes accommodation on-site for workers and staff employed for the tourist development. The inclusion of a select number of beds on-site for workers assists with the security and operational efficiency of the facility, without placing additional demand upon the existing housing stock in Exmouth.

4.2.3 Development Controls

The scheme amendment request proposes to insert development controls that address relevant matters for guiding future development applications and decision-making, outlined in **Table 9** below.

Table 9 Summary of Planning Matters, Potential Impacts and Management

Planning Matter	Potential Impact	Proposed Response/Management
Access, Security and Management	Uncontrolled access to and from site and the coast.	Control of access from Crown Lot 510 to the beach utilising existing Willersdorf Road and other existing, and where appropriate additional wayfinding/signage, temporary bollards, and fencing to demarcate lot boundaries.
Coastal Erosion	Potential impact from coastal processes, resulting in direct impacts to development and possible lease removal.	The Shire's CHRMAP assessment has been given due consideration in determining the lease area and development envelope within Crown Lot 510. The CHRMAP will be considered in the preparation of a development application to locate habitable structures that are setback beyond the 100-year horizontal setback datum. Easily relocatable and non-habitable structures and facilities may be considered at or ahead of the 100-year horizontal setback datum.
Wastewater Treatment Plant	Offsite odour impacting amenity for visitors and workers.	A development application can locate sensitive uses in areas beyond the 500m generic Waste Water Treatment Plant buffer.
Servicing	Potential impacts to surface or ground water may occur as a result of development construction. Untreated wastewater entering the habitat and impacting biodiversity.	Development application to address details including potable and non-potable water supply; power supply; wastewater treatment; and stormwater management.
Construction Management	Potential for construction activities to impact community access to the golf club via Willersdorf Drive.	Development Application to address construction activities and management measures, including the nature of construction activities and traffic to the subject site.
Bushfire Management	Direct loss of habitat, development and lives as result of a bushfire.	Bushfire Management Plan and bushfire emergency evacuation plan to be submitted with a development application.
Environmental Management	Direct loss of habitat and biodiversity during construction. Potential impact of the location and type of lighting to turtle nesting and other behavioural patterns.	Development application to include Environmental and Foreshore Management Plan. Lighting in accordance with dark sky principles and directed away from the coast so as not to impact with turtle nesting and other behavioural patterns.

4.3 Type of Amendment

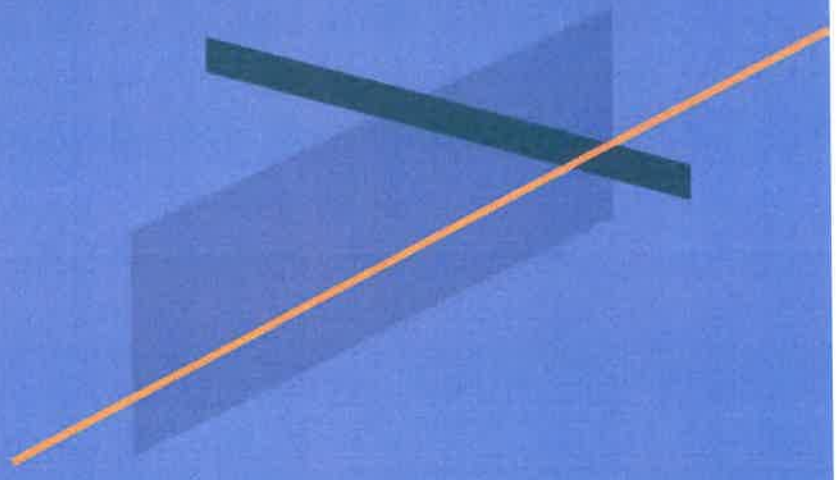
Pursuant to the *Planning and Development (Local Planning Schemes) Regulations 2015*, this proposed amendment is considered to be categorised as a standard amendment. Further justification is provided in **Table 10** having regard to the type of amendment described in the *Regulations*.

Table 10 Planning and Development Regulations Amendment Classifications

Type of Amendment	Comment
***standard amendment** means any of the following amendments to a local planning scheme –* *(b) an amendment that is consistent with a local planning strategy for the scheme that has been endorsed by the Commission.* *(e) an amendment that would have minimal impact on land in the scheme area that is not the subject of the amendment;* *(f) an amendment that does not result in any significant environmental, social, economic or governance impacts on the land in the scheme area;* *(g) any other amendment that is not a complex or basic amendment.*	The proposed scheme amendment is consistent with the Shire of Exmouth *Local Planning Strategy*, which identifies the subject site as 'Future Tourism Area 1.' The Strategy further identifies the site for 'high value tourism' due to the limited number of sites available in beachside locations, close proximity to townsite facilities, and are situated in elevated landform directly accessing the Exmouth Gulf. The proposal is for a unique tourism development that will not result in impacts other land. The proposal is in keeping with the ambitions in Exmouth of delivering tourism opportunities. A Special Use zone can provide sufficient planning controls to address relevant development and design matters.

5.0

Conclusion



5.0 Conclusion

The Shire's endorsed *Local Planning Strategy* identifies the land for tourism development opportunities.

The proponent will proceed with development of the site in accordance with the scheme amendment request to reclassify the land to a 'Tourism' zone with Restricted Uses. A Lease of the land with the Department of Planning, Lands and Heritage has been granted over Crown Lot 510 and, before the lease area can be utilised for its intended purpose, the land is required to be reclassified in order to facilitate future development applications. The scheme amendment therefore proposes the 'Tourism' zone with Restricted Use for land uses and conditions that will guide the use and development of the subject land.

In consultation with the Shire of Exmouth and the Department of Planning, Lands and Heritage, it is considered that a 'Tourism' zone supported by restricted uses, is the most suitable zoning as it would provide for a standard zone with specified list of land uses and planning controls that will align development outcomes with the proponent's vision for a low-impact, high-quality, eco-conscious short-stay accommodation development.

This report outlines the rationale for a Scheme Amendment request to reclassify the land to the 'Tourism' zone and it is considered suitable taking into account:

- The scheme amendment has had regard to coastal hazard and risk management adaptation planning that is prepared for the Shire;
- The scheme amendment area has been subject to bush fire assessment and environmental assessment, and no constraints have been identified;
- The insertion of restricted use within Schedule 3 of the scheme text provides suitable development controls to ensure development is consistent with the intended land uses and tourism opportunities, whilst managing on-site and off-site matters; and
- The scheme amendment has demonstrated compliance with the state and local planning framework.

The Shire of Exmouth is respectfully requested to initiate the 'standard' scheme amendment. The following **Appendix A** provides the Scheme Amendment map and text, adoption page and approval page.

We look forward to the Shire's favourable consideration of this Scheme Amendment Request and its initiation.

Appendix A

Scheme Amendment Text

Planning and Development Act 2005
RESOLUTION TO AMEND LOCAL PLANNING SCHEME
Shire of Exmouth Local Planning Scheme No.4
Amendment No. 11

Resolved that the Local Government pursuant to Section 75 of the *Planning and Development Act 2005*, amend the above Local Planning Scheme by:

1. Reclassification Lot 510 on Deposited Plan 427828, Willersdorf Road, Exmouth from the 'Public Open Space' reserve to the 'Tourism' zone;

2. Amending 'Schedule 3 – Restricted Uses' to include R4 and relevant conditions to apply as follows:

No	DESCRIPTION OF LAND	SPECIAL USE	CONDITIONS
R4	Lot 510 on Deposited Plan 427828, Willersdorf Road, Exmouth	As a 'P' use: • Tourist Development • Hotel As a 'I' use: • Reception Centre • Recreation - Private • Restaurant/Café • Small Bar • Workforce Accommodation	1. The purpose is to facilitate a low impact tourism development. 2. Sensitive land uses to be setback minimum 500m from the Water Corporation waste-water treatment plant. 3. Habitable structures to be setback behind the 100-year horizontal shoreline datum. 4. Vehicle access to be obtained from Willersdorf Road only. Vehicle access to the coast to be controlled via existing access from Willersdorf Road to Town Beach. 5. Preparation of an Environmental Management Plan, in consultation with the Department of Biodiversity, Conservation and Attractions and to address the following matters: i. Line of sight modelling of the proposed development, to determine from what locations direct and indirect light would be visible from the Town Beach to the development site. Any portion of a building with line of sight to/from the beach shall be designed to restrict artificial light emission to the satisfaction of the Department of Biodiversity, Conservation and Attractions; ii. If required as a result of the line of line-of-sight modelling findings development would be visible from the Town Beach to the development site, a Lighting Management Plan to be prepared to the satisfaction of the local government in consultation with the Department of Biodiversity, Conservation and Attractions in accordance with the Environmental Assessment *Guideline for Protecting Marine Turtles from Light Impacts* (EPA 2010) (or as updated) and the *Commonwealth Light Pollution Guidelines for Wildlife – Including Marine Turtle, Seabirds and Migratory Shore birds* (Department of the Environment and Energy and Department of Biodiversity, Conservation and Attractions, 2020) or as updated) to ensure protection of marine turtle habitats; iii. In general, lighting for the development to be designed in accordance with dark sky principles; iv. Control of access to and from the site; v. Five-year periodical review of the Management Plan as required, in consultation with the Department of Biodiversity, Conservation and Attractions.

3. Amending the Scheme Map accordingly.

1 INTRODUCTION

1.1 Proposal

Sebatikel is proposing to build a low density tourism development in Exmouth, adjacent to the existing golf course and close to the Exmouth Gulf coastline. The proposed accommodation is located on Lot 1407 Willersdorf Road, Exmouth, approximately 1.4km east from the Exmouth Town Centre (Appendix 1). The proposed development includes pavilions and rooms for guest accommodation, restaurant and bar, lobby and gym facilities, swimming pool, workers accommodation and associated access roads and a par 3 golf hole.

The development has been designed to merge with the natural environment using sustainable sourced organic and natural materials. The buildings incorporate passive solar design and maximise natural light, breezeways and shade and will be powered by solar energy to minimise carbon footprint.

1.2 Purpose

A Scheme Amendment is required to rezone the site to Special Use to accommodate the proposed development. The Proponent has received initial comments from Government agencies on the proposal in context of the application for a Lease. The Department of Biodiversity, Conservation and Attractions (DBCA) raised a number of environmental issues which they would like to see addressed in an Environmental Management Plan (EMP) to be prepared prior to the commencement of lease activities. Those issues included:

- The location of breeding grounds for the Hawksbill Turtle on the beach adjacent to the lease area;
- The location of habitat for numerous conservation significant shorebirds;
- The potential impact of artificial light from the development on these habitats; and
- Disturbance by human activities on these habitats.

Sebatikel commissioned PGV Environmental to prepare this Environmental Management Plan to address the DBCA concerns and to minimise the impact of the proposed development on the environmental values of the area.

1.3 Scope of Work

The scope of work for the EMP is initially to provide a description of the site to comprehensively identify environmental factors to be considered for management including:

- Identification of fauna habitat and fauna species likely to occur on or in the vicinity of the site;
- A Detailed Flora and Vegetation Survey in accordance with the *EPA Technical Guidance: Flora and Vegetation Surveys* (EPA, 2016). The survey included the following:
  - A search of Atlas of Living Australia for records of Threatened or Priority species;
  - A search of the Commonwealth Government's Protected Matters Search Tool to identify species potentially occurring within the area that are protected under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act);

- Examination of historic and recent aerial photography and contour and soil maps to provisionally identify vegetation types and condition;
- Field survey using quadrats to record native and introduced species as well as a thorough site walkover of any areas of native vegetation;
- Recording of any significant plant species using a hand-held GPS;
- Description of vegetation types and vegetation condition;
- Determination if any Threatened or Priority Ecological Communities (TECs or PECs) occur on the site; and
- Compilation of a flora list.

The Management Plan has been prepared to:

- Identify the environmental values that need to be protected;
- Identify the potential direct and indirect impacts of the development; and
- Identify management measures to mitigate the risks and potential impacts.

1.4 Relevant Guidelines and Criterion

The Environmental Management Plan has been prepared in accordance with the requirements set out in the advice from DBCA and associated legislation and documents including:

- *Biodiversity Conservation Act 2016* (BC Act);
- *Environmental Protection Act 1986* (EP Act);
- *Shorebirds and Seabirds of the Pilbara Coast and Islands* (DBCA, 2017);
- *National Light Pollution Guidelines for Wildlife* (DCCEEW, 2023a);
- Dingo Awareness Guidelines in *Ningaloo Coast (Nyinggulu) Visitor Guide* (DBCA, 2022);

2 EXISTING ENVIRONMENT

2.1 Surrounding Land

The proposed site for the pavilions is located between the existing golf course and the coastal foreshore and have been designed to be positioned beyond the beyond the 100-year setback (2123 setback line). The closest point of the facilities to the sandy beach is around 180m.

2.2 Land Use

The golf course was established between 1966 and 1969 on the adjoining land. The clubhouse and facilities were built some time after 1970 and before 2001.

The 2022 aerial photograph shows the golf course and golf club house and maintenance sheds and yard (Plate 2). The location of the development is currently used as the driving range for club members. Golfers tee up on artificial turf at the southern end of the maintenance yard and hit in a southerly direction into the bush. The club manager retrieves the balls on a regular basis.

Plate 1: Aerial Photograph from 2022 (Landgate, 2023)

The white track visible at the top of the aerial photograph is a publicly access to the beach. The sand track and beach have compacted sand and are accessible to 4WD and 2WD vehicles (Plate 2). The track is also used by pedestrians to access the beach.

A track running north-south and parallel to the coastline is visible as an orange line in the aerial photograph. The track is compacted sand and is blocked off at the northern end by large boulders (Plate 3). Examination of the track by PGV Environmental found the track had not been used by vehicles. Evidence of use by bicycles and motorbikes was seen.

Plate 2: Public Access Track to the Beach

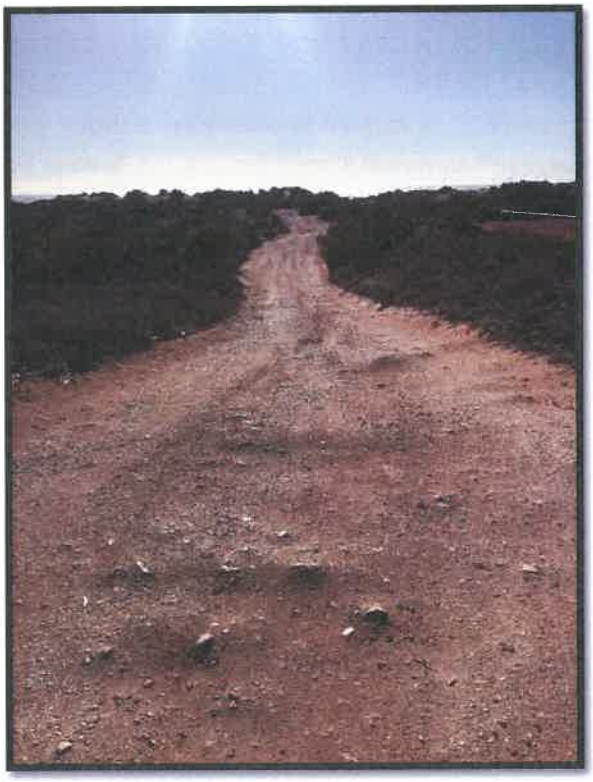

Plate 3: Blocked Off Track Running Parallel to the Coastline

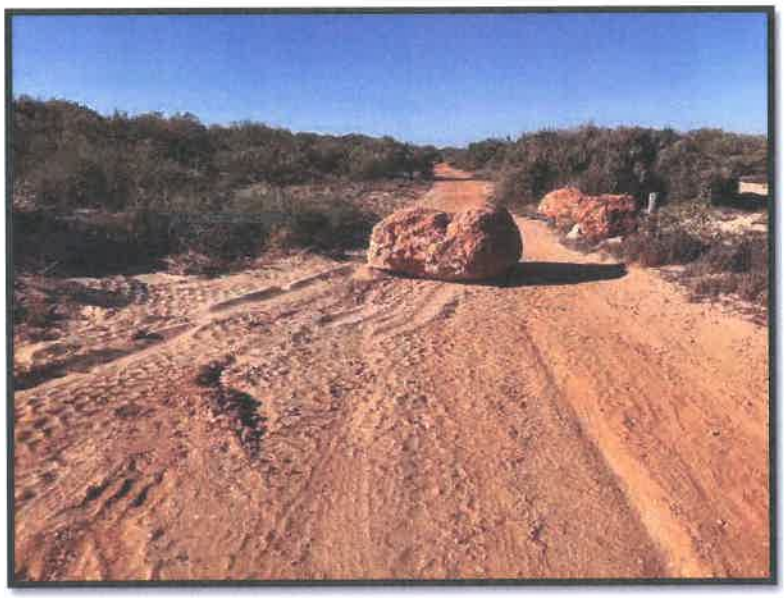

2.3 Geology and Soils

The Exmouth province is made up of alluvial plains and sandplains with coastal flats and dunes (and some ranges and stony plains) on sedimentary rocks of the Carnarvon Basin (Tille, 2006). The soil unit mapped on the proposed pavilion site is:

- Learmonth system (204Le) which are sandy outwash plains marginal to the Cape Range, supporting mainly soft spinifex hummock grasslands with scattered acacia shrubs, mapped on the eastern uplands.

2.4 Hydrology

There are no freshwater streams or lakes in the proposed development footprint.

3 FAUNA

3.1 Fauna Habitats

There are a number of significant fauna habitat in the region of Lot 1407 Willersdorf Road. The Exmouth gulf, off the North-west Cape is noted for its importance as a nursery for juvenile marine species and recognition of the connectivity between Exmouth Gulf and Ningaloo Coast World Heritage Area for many migratory species, megafauna, migratory shorebirds and the marine ecosystem.

The dunes provide habitat for a number of bird, reptile and insect species.

3.2 Significant Fauna

Green Turtles (*Chelonia mydas*), Loggerhead turtles (*Caretta caretta*) and Hawksbill turtles (*Eretmochelys imbricate*) are known to forage within Exmouth Gulf, with juveniles inhabiting the mangrove creeks and vegetated shallows (Straits, 2006). Aerial surveys have shown that turtles occur throughout Exmouth Gulf, with densities greatest in the shallow southern and eastern portions of the Gulf. The majority of animals sighted were identified as Green turtles (Oceanwise 2005, Oceanica 2006). DBCA's comments indicate that during the 2022/23 marine turtle breeding season, multiple Hawksbill turtle nests were recorded on the beach adjacent to the proposed lease area.

Exmouth Gulf and the broader region are likely to be used by a range of migratory bird species that travel seasonally between Australia and the rest of the world. Species generally summer in the non-breeding habitats (December to February), feeding intensively on invertebrates to build up stores of fat and protein in preparation for migration back to breeding territories (Bamford *et al.*, 2008). Under the Shorebird 2020 Program, annual counts are completed at over 150 key shorebird areas around Australia, including Exmouth Gulf.

Fauna species of conservation significance that have habitat in the Exmouth Gulf have been identified using desktop searches of studies undertaken in the area, Atlas of Living Australia (ALA, 2023) and the Protected Matters Search Tool (DCCEEW, 2023b). Table 1 outlines the significance of the habitat and seasonal migratory patterns of species identified of Conservation Significance.

Table 1: Listed Fauna Species Occurrence in Exmouth Gulf

Scientific Name	Common Name	WA Conservation Status	Status under the EPBC Act	Habitat* and Presence in the Exmouth Gulf
Dolphins				
Sousa sahulensis (previously named *Sousa chinensis*)	Australian humpback dolphin	Priority 4	Migratory	The Exmouth gulf is known feeding, socialising, and resting habitat year round for both species of dolphin with calves, including newborns being present during surveys (Sprogis and Parra, 2022).
Tursiops aduncus	Indo-Pacific bottlenose dolphin	Migratory	Migratory	
Whales				
Balaenoptera borealis	Sei whale	Endangered	Vulnerable, Migratory	Sei Whales do not usually occur inshore or in coastal waters (The MarineBio Conservation Society, 2023) but individuals may occur in the region on rare occasions.
Eubalaena australis	Southern right whale	Vulnerable	Endangered, Migratory	Sightings in more northern waters are relatively rare, but there have been records from Exmouth on the west coast.
Balaenoptera edeni	Bryde's whale	Migratory	Migratory	Bryde's Whales are considered to move in close association with their prey, although daily movement patterns have not been recorded. The Bryde's Whale diet includes schooling fishes, small crustaceans and cephalopods which are likely to inhabit areas closer to Ningaloo Reef where there is an abundance of food in the form of planktonic larvae (Oceanica 2006). The Bryde's Whale is therefore expected to migrate through areas north of the Exmouth Gulf.
Balaenoptera musculus	Blue whale	Endangered	Endangered, Migratory	On their northern migration Pygmy blue whales come into the Perth Canyon in the period January to May, and then move up the coast passing Exmouth in the period April through to August before continuing north, with animals known to frequent Indonesian waters. A sharp southerly travelling pulse of pygmy blue whales is experienced each year over October to late December. They tend to pass along the shelf edge at depths of 500m out to 1000 m, moving faster on the southern migration and coming in close to the coast in the Exmouth – Montebello Islands area (McCauley and Jenner, 2010).

Scientific Name	Common Name	WA Conservation Status	Status under the EPBC Act	Habitat* and Presence in the Exmouth Gulf
Megaptera novaeangliae	Humpback whale	Conservation Dependent and Migratory	Vulnerable, Migratory	The Humpback Whale is known to pass Exmouth during the northern and southern migrations, with Exmouth considered a core calving area during the southern migration and Whale numbers peak in September as migrating cow/calf pairs enter Exmouth Gulf and rest for up to two weeks.
Balaenoptera physalus	Fin whale	Endangered	Vulnerable, Migratory	The Fin Whale may occur in the region on rare occasions but there have been no published reports of this species off Exmouth. .
Physeter macrocephalus	Sperm whale	Vulnerable	Migratory	Individuals may occur in the region on rare occasions but there have been no published reports of this species off Exmouth.
Orcinus orca	Orca	Migratory	Migratory	In Western Australia, Orcas are known to frequent the colder, southern waters near Albany. In 2014 a group of up to 27 killer whales were reported to be resident in the Exmouth Gulf for up to two months each year between June and August (ABC, 2014).
Marine Turtles				
Carretta caretta	Loggerhead turtle	Endangered	Endangered, Migratory	Major nesting at Muiron Islands (150 to 350 females breeding per year) and the beaches of the North West Cape (50 to 150 females breeding per year) Nesting is between November and March.
Chelonia mydas	Green turtle	Vulnerable	Vulnerable, Migratory	The Green turtle is the most common to the Ningaloo region (Preen *et al.* 1997). No nesting activity has been recorded on beaches of the Exmouth Gulf, however the mangrove creeks and vegetated shallows of the east coast of the Exmouth Gulf are an important nursery for this species (Oceanica, 2006). This species peak breeding season is November to March.
Eretmochelys imbricata	Hawksbill turtle	Vulnerable	Vulnerable, Migratory	Hawksbill Turtles nest on the Muiron Islands, and has been recorded from Sandalwood Peninsula (located at the bottom of Exmouth Gulf) between 1990-1998 (Oceanica 2006). This species has a peak breeding season of October to January in the Exmouth Gulf but do breed year round
Dermochelys coriacea	Leatherback turtle	Vulnerable	Endangered, Migratory	There are no records of Leatherback turtles nesting in Western Australia. Furthermore, the area is not known as a foraging ground or a nursery. It is unlikely that this species occurs in the Exmouth Gulf (Oceanica, 2006).

Scientific Name	Common Name	WA Conservation Status	Status under the EPBC Act	Habitat* and Presence in the Exmouth Gulf
Natator depressus	Flatback turtle	Vulnerable	Vulnerable, Migratory	No nesting sites or rookeries have been recorded in the Exmouth Gulf, but on Cape Range (Waayers *et al*., 2014). Some data on foraging distribution comes from bycatch, with three adult turtles having been caught in trawler nets from the top half of the Exmouth Gulf (Oceanica 2006). An inter-nesting habitat buffer is mapped across the northern end of Exmouth Gulf and to the west (DEWHA, 2011).
Other Marine Fauna				
Dugong dugon	Dugong	Migratory	Migratory	The Dugong is known to breed and reside year round in the Exmouth Gulf. Dugong activity is generally focused on the south and east coasts of Exmouth Gulf, associated with the shallow seagrass habitats in the area with lower numbers of Dugong recorded along the west coast of Exmouth Gulf (Irvine, 2019).
Rhincodon typus	Whale shark	Migratory	Vulnerable, Migratory	Whale sharks aggregate close to the Ningaloo Reef front during late March to early May following the mass spawning of coral when there is an abundance of food in the form of planktonic larvae and schools of small fish in the waters adjacent to the reefs. Whale Sharks have been sighted within the northern end of Exmouth Gulf (Oceanica, 2006).
Carcharias taurus	Grey nurse shark (west coast population)	Vulnerable	Vulnerable	The Grey nurse shark (west coast population) is predominantly found in the south-west coastal waters of Western Australia but has been recorded as far north as the North West Shelf. There have been occasional sightings of this species near Exmouth and the Muiron Islands. A study of footage from a camera deployed at the Point Murat Navy Pier in Exmouth indicates that the systematic nature of visitations by individual sharks, over a number of years, qualifies the location as a noteworthy aggregation site (Hoschke and Whisson, 2016).
Carcharodon carcharias	Great white shark	Vulnerable	Vulnerable, Migratory	Great white sharks are widely, but not evenly, distributed in Australian waters. Tagging of sharks suggests that the species is highly mobile, and movement is often seasonal. In Western Australia tagging has shown the species to move north during spring and return south during summer. The aggregation of calving Humpback whales may attract Great White Sharks to the Exmouth Gulf (Oceanica, 2006). For this reason, it is possible that the Great White Shark may occasionally forage within the Exmouth Gulf and to the north and west.

Scientific Name	Common Name	WA Conservation Status	Status under the EPBC Act	Habitat* and Presence in the Exmouth Gulf
Pristis clavata	Dwarf sawfish, Queensland sawfish	Migratory and Priority 1	Vulnerable, Migratory	There are no known records of the Dwarf sawfish occurring within the Exmouth Gulf and they breed in estuarine habitats. There is a low likelihood of this species occurring in Exmouth Gulf.
Pristis zijsron	Green sawfish, Dindagubba, Narrowsnout sawfish	Vulnerable	Vulnerable, Migratory	Green sawfish have been recorded in very shallow water (<1 m) to offshore trawl grounds in over 70 m of water. It is possible that the species may utilise shallow waters within Exmouth Gulf. The Ashburton River estuary is currently the only identified pupping site and nursery for Green Sawfish (Morgan *et al.* 2016).
Anoxypristis cuspidata	Narrow sawfish	Migratory	Migratory	Species may occur in wider region, but unlikely to occur in the deeper waters to the north west of Exmouth Gulf.
Aipysurus apraefrontalis	Short-nosed seasnake	Critically Endangered	Critically Endangered	The Short-nosed seasnake is endemic to Western Australia, and has been recorded from Exmouth Gulf, Western Australia, generally in waters of 10m in depth or less. The reproductive seasonality varies among the species
Marine Fish				
Manta alfredi	Reef manta ray	Migratory	Migratory	Single Reef manta rays have been recorded in Exmouth Gulf year round (Armstrong *et al.*, 2020) and there is usually a big aggregation/feeding event in the Exmouth Gulf around September every year (Sprogis and Parra, 2022).
Manta birostris	Oceanic manta ray	Migratory	Migratory	Generally the Oceanic manta ray occurs further out in pelagic waters but may be a vagrant visitor to the mouth of the gulf.
Halicampus grayi	Mud pipefish		Marine	This species has been recorded in Exmouth Gulf (Kangas *et al.*, 2006).
Hippocampus zebra	Zebra seahorse		Marine	This species has been recorded in Exmouth Gulf (Kangas *et al.*, 2006)
Hippocampus angustus	Narrow- bellied seahorse		Marine	This species has been recorded in Exmouth Gulf (Kangas *et al.*, 2006)
Migratory Birds				
Calidris canutus	Red Knot, Knot	Endangered	Endangered Migratory	In Australasia the Red Knot mainly inhabit intertidal mudflats, sandflats and sandy beaches of sheltered coasts, in estuaries, bays, inlets, lagoons and harbours; sometimes on sandy ocean beaches or shallow pools on exposed wave-cut rock platforms or coral reefs but do not breed in Australia. Juveniles of this species may be present year-round with adults present from August to April (DBCA, 2017).

Scientific Name	Common Name	WA Conservation Status	Status under the EPBC Act	Habitat* and Presence in the Exmouth Gulf
Calidris tenuirostris	Great knot	Critically Endangered	Critically Endangered Migratory	The Great Knot winters in Australia, occurring in sheltered coastal habitats such as inlets, bays, harbours, estuaries and lagoons with large intertidal mud and sandflats, oceanic sandy beaches with nearby mudflats, sandy spits and islets, muddy shorelines with mangroves and occasionally exposed reefs or rock platforms. It roosts in refuges such as shallow water in sheltered sites, on coastal dunes or on saltflats amongst mangroves during high tides (BirdLife International, 2015). Juveniles of this species may be present year-round with adults present from August to April (DBCA, 2017).
Calidris ferruginea	Curlew sandpiper	Critically Endangered	Critically Endangered Migratory	Curlew Sandpipers mainly occur on intertidal mudflats in sheltered coastal areas, such as estuaries, bays, inlets and lagoons, and also around non-tidal swamps, lakes and lagoons near the coast, and ponds in saltworks and sewage farms. Juveniles of this species may be present year-round with adults present from August to March (DBCA, 2017).
Limosa lapponica baueri	Bar-tailed godwit (baueri)	Vulnerable	Vulnerable Migratory	Bar-tailed Godwits are found mainly in coastal habitats such as large intertidal sandflats, banks, mudflats, estuaries, inlets, harbours, coastal lagoons and bays. It is found often around beds of seagrass and, sometimes, in nearby saltmarsh. Juveniles of this species may be present year-round with adults present from August to April (DBCA, 2017).
Limosa lapponica menzbieri	Northern Siberian bar-tailed godwit	Critically Endangered	Critically Endangered Migratory	
Numenius madagascariensis	Eastern curlew	Critically Endangered	Critically Endangered Migratory	The Eastern Curlew is most commonly associated with sheltered coasts, especially estuaries, bays, harbours, inlets and coastal lagoons, with large intertidal mudflats or sandflats, often with beds of seagrass. Occasionally, the species occurs on ocean beaches (often near estuaries), and coral reefs, rock platforms, or rocky islets. Juveniles of this species may be present year-round with adults present from July to April (DBCA, 2017).
Sternula nereis nereis	Australian fairy tern	Vulnerable	Vulnerable	The Fairy Tern (Australian) nests on sheltered sandy beaches, spits and banks above the high tide line and below vegetation. There is a sedentary population and a migratory population that is present in June to November (Commonwealth of Australia, 2020). This species breeds between June and November in the Pilbara (DBCA, 2017).

Scientific Name	Common Name	WA Conservation Status	Status under the EPBC Act	Habitat* and Presence in the Exmouth Gulf
Pandion haliaetus	Eastern osprey	Migratory	Migratory	Ospreys occur in littoral and coastal habitats and terrestrial wetlands of tropical and temperate Australia and offshore islands. They feed on fish, especially mullet where available, and rarely take molluscs, crustaceans, insects, reptiles, birds and mammals. This species breeds between June to September in the Pilbara (DBCA, 2017) and has been recorded breeding in the Exmouth Gulf.
Tringa brevipes	Grey-tailed tattler	Migratory and Priority 4	Migratory	The Grey-tailed Tattler is often found on sheltered coasts with reefs and rock platforms or with intertidal mudflats. It can also be found at intertidal rocky, coral or stony reefs as well as platforms and islets that are exposed at low tide. This species does not breed in Australia but juveniles of this species may be present year-round with adults present from August to April (DBCA, 2017).
Tringa nebularia	Common greenshank	Migratory	Migratory	The Common Greenshank is a wader and does not breed in Australia. This species can be found in many types of wetlands and has the widest distribution of any shorebird in Australia. This species typically feeds on molluscs, crustaceans, insects, and occasionally fish and frogs and may be present. This species does not breed in Australia but juveniles of this species may be present year-round with adults present from August to April (DBCA, 2017).
Actitis hypoleucos	Common sandpiper	Migratory	Migratory	The Common Sandpiper is mostly found around muddy margins or rocky shores. Generally the species forages in shallow water and on bare soft mud at the edges of wetlands.
Charadrius leschenaultii	Greater sand plover	Vulnerable	Vulnerable, Marine, Migratory	In Australasia, the Greater Sand Plover is almost entirely coastal, inhabiting littoral and estuarine habitats. They mainly occur on sheltered sandy, shelly or muddy beaches with large intertidal mudflats or sandbanks, as well as sandy estuarine lagoons. This species does not breed in Australia but juveniles of this species may be present year-round with adults present from July to May (DBCA, 2017).
Pluvialis squatarola	Grey plover	Migratory	Migratory	Grey Plovers occur almost entirely in coastal areas, where they usually inhabit sheltered embayments, estuaries and lagoons with mudflats and sandflats, and occasionally on rocky coasts with wave-cut platforms or reef-flats, or on reefs within muddy lagoons. This species does not breed in Australia but may be present November to June.
Charadrius veredus	Oriental plover	Migratory	Migratory	Oriental Plovers spend a few weeks in coastal habitats such as estuarine mudflats and sandbanks, on sandy or rocky ocean beaches or nearby reefs, or in near-coastal grasslands before moving to the interior to short open grasslands. This species does not breed in Australia but may be present August to March.

Scientific Name	Common Name	WA Conservation Status	Status under the EPBC Act	Habitat* and Presence in the Exmouth Gulf
Pluvialis fulva	Pacific golden plover	Migratory	Migratory	Pacific Golden Plovers usually occur on beaches, mudflats and sandflats (sometimes in vegetation such as mangroves, low saltmarsh such as Sarcocornia, or beds of seagrass) in sheltered areas including harbours, estuaries and lagoons, and also in evaporation ponds in salt works. This species does not breed in Australia but may be present August to March.
Calidris ruficollis	Red-necked stint	Migratory	Migratory	The Red-necked Stint is mostly found in coastal areas, including in sheltered inlets, bays, lagoons and estuaries with intertidal mudflats, often near spits, islets and banks and, sometimes, on protected sandy or coralline shores. This species does not breed in Australia but juveniles of this species may be present year-round with adults present from August to April (DBCA, 2017).
Arenaria interpres	Ruddy turnstone	Migratory	Migratory	The Ruddy Turnstone is mainly found on coastal regions with exposed rock coast lines or coral reefs. It also lives near platforms and shelves, often with shallow tidal pools and rocky, shingle or gravel beaches. This species does not breed in Australia but juveniles of this species may be present year-round with adults present from August to April (DBCA, 2017).
Calidris alba	Sanderling	Migratory	Migratory	Sanderlings occur on most of the coast from Eyre to Derby, and also around Wyndham. They are more often recorded on the south and southwest coasts, north to around southern Shark Bay, with more sparsely scattered records further north in Gascoyne and Pilbara Regions and the Kimberley Division. This species does not breed in Australia but juveniles of this species may be present year-round with adults present from August to May (DBCA, 2017).
Numenius phaeopus	Whimbrel	Migratory	Migratory	The Whimbrel is often found on the intertidal mudflats of sheltered coasts. It is also found in harbours, lagoons, estuaries and river deltas, often those with mangroves, but also open, un-vegetated mudflats. This species does not breed in Australia but juveniles of this species may be present year-round with adults present from August to May (DBCA, 2017).

* Indicates habitat is from the DCCEEW (2023c) SPRAT Database unless otherwise denoted

Conservation Codes are in Appendix 4

3.3 Dingoes

The Exmouth coast provides habitat for dingoes (*Canis lupus dingo*). Feeding dingoes or having available food waste can increase the risk of aggressive interaction with this species. Signage is already in place on the beach access track (Plate 4).

Plate 4: Dingo Signage

4 FLORA AND VEGETATION

4.1 Methodology

4.1.1 Database Searches

Searches of the following databases were undertaken prior to the site survey:

- Atlas of Living Australia (ALA, 2023) (Appendix 2) which shows all species that have been recorded within a 100km radius of the site.
- The EPBC Act Protected Matters Search Tool (DCCEEW, 2023) (Appendix 3) which identifies species that are listed as Endangered, Threatened or Priority under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) that could potentially have habitat within a 20km radius of the site.

4.1.2 Detailed Survey

The Detailed Flora and Vegetation Survey was undertaken on 6 September 2023 by Dr Paul van der Moezel of PGV Environmental. The survey included sampling from six 10m x 10m non-permanent quadrats as well as a thorough walk through the site. The tracklog for the survey is shown on Plate 5.

Plate 5: Track Log

Information on flora composition and vegetation structure was recorded in the quadrats. Plant species were either identified in the field or taken for identification at the Perth Reference Herbarium or office using standard reference guides.

4.1.3 Survey Conditions

The conditions that the survey was undertaken in are presented in Table 2 in order to assess the adequacy of the survey.

Table 2: Statement of Botanical Survey Conditions

Issue	Constraints (Y/N)*	Comment
Competency/experience of the consultant conducting the survey	No	Dr Paul van der Moezel has undertaken several botanical surveys in the Pilbara coastline area and is familiar with most of the flora of the survey area.
Proportion of the flora identified^	No	The timing of the survey in September was optimal to identify most flora species on the site. No follow-up survey required.
Sources of information (historic/recent or new data)	No	The flora of the area is well documented.
Proportion of the task achieved and further work that may need to be undertaken	No	No follow-up survey required as no Threatened Flora expected to occur in other seasons.
Timing/weather/season/cycle	No	The September survey was optimal for most flora species.
Disturbances (Fire)	No	The site has not been recently burnt.
Intensity of survey (e.g. In retrospect was the intensity adequate)	No	The time spent on site, approximately 4 hours, was sufficient for the small and accessible site with a low species diversity.
Completeness (e.g. was relevant area fully surveyed)	No	
Resources (e.g. degree of expertise available for plant identification)	No	Experienced botanist undertook plant identifications on site and at the Perth Herbarium and office.
Remoteness and/or access problems	No	Easily accessible site close to the golf course. Easy site to walk around.
Availability of contextual (e.g. bioregional) information for the study area.	No	Biodiversity Audit of WA Biogeographical Subregions assessment 2002.

*Constraints have been rated as Significant, Moderate or No constraints
^Fungi and nonvascular flora (e.g. algae, mosses and liverworts) were not specifically surveyed for during the survey.

4.2 Results

4.2.1 Desktop Studies

Searches of the following databases were undertaken:

- Atlas of Living Australia (ALA, 2022) (Appendix 2) which shows all species that have been recorded within a 10km radius of the site.
- The EPBC Act Protected Matters Search Tool (DCCEEW, 2022) (Appendix 3) which identifies species that are listed as Endangered, Threatened or Priority under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) could potentially have habitat within a 5km radius of the site.

There were no listed Threatened species identified in the databases searches. There were nineteen priority species identified as outlined in Table 3. Three species occur on sandy soils and/or coastal dunes and may potentially occur within the proposed development footprint.

Table 3: Priority Flora Species Identified in Database Searches

Scientific Name	Conservation Status (WA)	Habitat	Likelihood to occur on the site
Cyperus victoriensis	Priority 1	*Cyperus victoriensis* grows along creeks.	Unlikely – not creek habitat
Acacia ryaniana	Priority 2	*Acacia ryaniana* grows in white or red sand on coastal sand dunes.	Possibly has habitat on the site
Acanthocarpus rupestris	Priority 2	*Acanthocarpus rupestris* occurs in red sand, limestone.	Unlikely – not typical habitat
Crinum flaccidum (Darling Lily)	Priority 2	Darling Lily grows in loam, clay, sandstone in swamps, creeks.	Unlikely – not typical habitat
Daviesia pleurophylla	Priority 2	*Daviesia pleurophylla* occurs on sand dunes.	Possibly has habitat on the site
Eremophila occidens	Priority 2	*Eremophila occidens* grows in orange/brown sand on limestone ranges, dunes.	Unlikely – not typical habitat
Harnieria kempeana subsp. *rhadinophylla*	Priority 2	*Harnieria kempeana* subsp. *rhadinophylla* grows in calcareous loam amongst limestone rocks, creek banks.	Unlikely – not typical habitat
Tephrosia sp. North West Cape (G. Marsh 81)	Priority 2	*Tephrosia* sp. North West Cape occurs in orange-red to brown soil with limestone fragments, over limestone, growing with *Triodia*, *Acacia* and *Ipomea* (Butcher *et al.*, 2017).	Unlikely – not typical habitat
Tinospora esiangkara	Priority 2	*Tinospora esiangkara* grows in pebbly orange-brown calcareous loam on limestone outcrops or ridges, near creek bank.	Unlikely – not typical habitat
Verticordia serotina	Priority 2	*Verticordia serotina* occurs in red sand on sand dunes.	Unlikely – not typical habitat
Acacia alexandri	Priority 3	*Acacia alexandri* occurs with limestone in stony creeks, steep rocky slopes.	Unlikely – not typical habitat
Acacia startii	Priority 3	*Acacia startii* occurs in calcareous loam with limestone pebbles on stony hills and watercourses.	Unlikely – not watercourse habitat
Corchorus congener	Priority 3	*Corchorus congener* grows in sand, red sandy loam with limestone on sand dunes, plains.	Unlikely – no limestone on site
Dysphania congestiflora (Marsh Crumbweed)	Priority 3	Marsh Crumbweed is recorded from flats on the margin and towards the centre of seasonally inundated flood plains and lake beds, on saline, deep, light-medium to heavy clay soils (Dillon and Markey, 2016).	Highly Unlikely – not suitable habitat
Grevillea calcicola	Priority 3	*Grevillea calcicola* grows on limestone hilltops.	Unlikely – not typical habitat

Scientific Name	Conservation Status (WA)	Habitat	Likelihood to occur on the site
Gymnanthera cunninghamii	Priority 3	*Gymnanthera cunninghamii* occurs in sandy soils.	Possibly has habitat on the site
Lysiandra fuernrohrii (previoulsy *Phyllanthus fuernrohrii*) (Sand Sponge)	Priority 3	Sand Sponge grows on gravelly sandhills (Barrett and Telford, 2015).	Unlikely – not typical habitat
Brachychiton obtusilobus	Priority 4	*Brachychiton obtusilobus* grows in skeletal soils on rocky limestone ranges, gorges, occasionally sandplains.	Unlikely – not typical habitat
Eremophila youngii subsp. *lepidota*	Priority 4	*Eremophila youngii* subsp. *lepidota* grows in stony red sandy loam on flats plains, floodplains, sometimes semi-saline, clay flats.	Unlikely – not typical habitat
Livistona alfredii (Millstream Fan-palm)	Priority 4	Millstream Fan-palm occurs on the edges of permanent pools.	No – no suitable habitat

Conservation codes are in Appendix 4

4.2.2 Flora

A total of 31 plant species were recorded during the flora survey (Appendix 5). The total consisted of 28 native and 3 introduced species.

The plant Families with the highest representation of species were the Fabaceae (Wattle and Pea family – 7 species, all native), Malvaceae (Hibiscus family – 4 species, all native), Poaceae (Grass family – 3 species, 2 native and 1 Introduced) and Asteraceae (Daisy family – 3 species, all native).

No Threatened or Priority species were recorded on the site.

Species richness in the three quadrats ranged from 12-16. The low species richness is typical of near-coastal sand dunes in the Pilbara region.

Quadrat data are in Appendix 6.

4.2.3 Vegetation

4.2.3.1 Vegetation Complex

The vegetation mapped on the site is Cape Range (663) which are made up of hummock grassland with scattered shrubs or mallee *Triodia* spp. *Acacia* spp., *Grevillea* spp. *Eucalyptus* spp (National Map, 2023).

4.2.3.2 Vegetation Types

Vegetation types are a finer level of vegetation description and mapping used for small scale sites, such as the survey area. Vegetation types are described based on the structure of the vegetation (eg. woodland, heath) and the dominant species in each structure.

Two vegetation types were described and mapped on the site.

The vegetation types are described in Table 4.

Quadrat data are provided in Appendix 6.

Table 4: Vegetation Type on the Site

Vegetation Type	Description	Photograph
AsAc*Acacia sclerosperma/A. coriacea* Open Heath over **Cenchrus ciliaris* Open	This vegetation type occurs on the tops of the dune ridges. *Acacia sclerosperma* and *A. coriacea* are up to 1.5m high with a density of 15-40%. Other common species include *Olearia* sp. Kennedy Range, *Eremophila longifolia* and *Rhagodia preissii.* The grassy weed species, Buffel Grass (*Cenchrus ciliaris*), is very common. The soils are light orange-brown sand. Quadrats EX1 and 5 are representative of this vegetation type.	
AcOspRp *Acacia coriacea/Olearia* sp Kennedy Range/ *Rhagodia preissii* Shrubland over **Cenchrus ciliaris* Open Grassland	This vegetation type occurs in the swales. *Acacia coriacea* is sparsely present with the more common shrub species being *Olearia* sp. Kennedy Range and *Rhagodia preissii.* Other common species include *Minuria cunninghamii, Eragrostis eriopoda* and Kapok (*Aerva javanica*). Buffel Grass is very common. The soils are light orange-brown sand. Quadrat EX2, 3 and 4 are representative of this vegetation type.	

4.2.3.3 Vegetation Condition

The condition of the vegetation was assessed according to the system devised by Keighery and described in Bush Forever (Government of Western Australia, 2000) (Table 5).

Table 5: Vegetation Condition Rating Scale.

Condition	Description
Pristine	Pristine or nearly so, no obvious signs of disturbance.
Excellent	Vegetation structure intact, disturbance affecting individual species and weeds are non-aggressive species.
Very Good	Vegetation structure altered, obvious signs of disturbance. For example, disturbance to vegetation structure caused by repeated fires, the presence of some more aggressive weeds, dieback, logging and grazing.
Good	Vegetation structure significantly altered by very obvious signs of multiple disturbance. Retains basic vegetation structure or ability to regenerate it. For example, disturbance to vegetation structure caused by very frequent fires, the presence of some very aggressive weeds at high density, partial clearing, dieback and grazing.
Degraded	Basic vegetation structure severely impacted by disturbance. Scope for regeneration but not to a state approaching good condition without intensive management. For example, disturbance to vegetation structure caused by very frequent fires, the presence of very aggressive weeds, partial clearing, dieback and grazing.
Completely Degraded	The structure of the vegetation is no longer intact and the area is completely or almost completely without native species. These are often described as 'parkland cleared' with the flora comprising weed or crop species with isolated native trees or shrubs.

Source: Government of Western Australia, 2000.

There are few weed/introduced species on the site, however the few that are there are prevalent, particularly Buffel Grass and Kapok. As a result, the condition of the vegetation was all rated as Good.

4.2.4 Conservation Significance of Flora and Vegetation

4.2.4.1 Flora

No Threatened or Priority flora species at State or Commonwealth level were recorded on the site.

4.2.4.2 Vegetation

Vegetation Associations

According to the Statewide Vegetation Statistics (DBCA, 2014) there is approximately 29,068ha or 88.98% of the pre-European extent of vegetation association Cape Range 663 remaining. This is well above the EPA's target to retain at least 30% of each vegetation association or complex in the State. There is 23.29% of the vegetation associated in secure reserves.

Threatened and Priority Ecological Communities

The site is not representative of a Threatened or Priority Ecological Community. The Priority 3 ecological community 'Coastal dune native tussock grassland dominated by *Whiteochloa airoides*'

occurs on the landward side of foredunes, hind dunes or remnant dunes with white or pinkish white medium sands with marine fragments. *Whiteochloa airoides* was recorded on the site but was only sparsely present at <1% coverage in each of the quadrats it was recorded in (Appendix 6). Therefore, the vegetation on the dunes is not representative of the PEC.

5 IDENTIFIED RISKS

5.1 General

The proposed pavilions and associated infrastructure have been designed to minimise the risk to the surrounding environment. The management measures outlined in this EMP are designed to primarily educate guests as to their environmental responsibilities as well as requiring adherence to guidelines and policies.

The risks identified in the planning for the development are outlined below.

5.2 Impacts on the Physical Environment

Impacts on the physical environment can impact on the habitat values of the surrounding area by:

- Environmental damage caused by vehicles and guests;
- Erosion and damage to the sensitive dunes due to uncontrolled vehicular and pedestrian access; and
- Introduction of weeds and soil-borne pathogens.

5.3 Impacts on Fauna

The proposed development risks impacts to fauna by:

- Interference with native wildlife in recognised important foraging habitat can interrupt foraging or increase vigilance behaviours which may result in migrating birds not having the necessary nutrition or rest prior to migration;
- Predation on native wildlife by domestic pets;
- Feeding native species, impacting on their normal dietary behaviours;
- Disturbance of fauna while foraging or resting;
- Driving or walking on active turtle nests, resulting in lower nesting success and hatchling mortality; and
- Encouragement of unwanted interactions with predators such as dingoes.

5.4 Waste

The inappropriate management of waste can cause:

- Increase in nutrient pollution from uncontrolled waste, including human waste, food scraps, rubbish, washing water;
- Increase in feral fauna such as rats, mice, foxes and cats due to increased food resources from waste;
- Increase in dingo activity due to uncontrolled waste, resulting in a higher risk of adverse human/dingo interactions; and
- Environmental pollution with potential entrapment, entanglement and ingestion risks for fauna due to inappropriate waste management.

5.5 Light

Artificial light can disrupt critical behaviour in wildlife. Potential artificial light impacts to marine turtles include hatchling disorientation and disruptions to nesting behaviour. Potential artificial light impacts to shorebirds include disruption to natural foraging behaviours. This can hamper their ability to prepare for breeding or migration.

6 ENVIRONMENTAL MANAGEMENT

6.1 Objective

The objective of the management measures and actions is to minimise the impact of the proposed development on the surrounding environment.

6.2 Management Principles

The proposed development has been designed with a number of principles in mind. These are to:

- Manage guest behaviour with educational material, access restrictions and signage;
- Prevent access to the native bushland by vehicles by formalising tracks and beach access using existing cleared areas and tracks;
- Prevent erosion and or soil transfer by providing stability sealed tracks and parking hardened areas;
- Manage artificial light to ensure there is no light spill into surrounding habitat areas; and
- Manage waste.

6.3 Protection of the Physical Environment

6.3.1 Access

A regularly used and very accessible beach access track exists at the northern end of the proposed development. It is envisaged that users of the accommodation will either walk or drive down this track to the beach. The accommodation users will be notified to use only this access track and to not walk or drive through areas of native vegetation.

6.3.2 Hygiene

The restriction of vehicles to roads, formalised access points to the beach and designated parking areas minimises the risk of weed, pest or pathogen introduction.

On-site staff will be ever vigilant for both weeds (declared or not) and feral/pests and will implement eradication programs immediately and if required report to the DBCA and Agriculture departments.

6.4 Protection of Fauna

6.4.1 Information Package

To aid guests with preparing for their trip, each guest will be issued with an Information Package at booking. The package will include information about the unique and fragile habitats and fauna that are native to the region. The information will provide links to the DBCA pamphlet *Shorebirds and seabirds of the Pilbara coast and islands* available at https://exploreparks.dbca.wa.gov.au/sites/default/files/2023-03/shorebirds-and-seabirds-of-the-pilbara-coast-and-islands.pdf

The guidelines will clearly outline all rules and regulations of staying in the dune pavilions, including access restrictions, the code of conduct and behavioural expectations. This will include:

- The prohibition of vehicular access to any part of the dunes outside of the designated beach access track;
- A restriction on approaching shorebirds or other fauna;
- A strict prohibition of feeding any native fauna;
- The requirement to control all domestic pets to prevent any disturbance to native fauna; and
- A prohibition on littering.

The information package will also include material encouraging guests to familiarise themselves with evidence of turtle nests to avoid them when driving or walking on the beach such as links to the Turtle Monitoring Field Guide available at https://library.dbca.wa.gov.au/static/FullTextFiles/627882.pdf. The package will include material to encourage guests to drive below the high tide line on the adjacent beach (where possible) to avoid any shorebird nests between the high tide line and the dune.

The information package will include a map that will clearly demarcate access locations to the beach, access tracks, launch areas and the lobby as well as the areas that are prohibited from access.

The information package will provide information on Dingoes, including the following extract from the Ningaloo Coast (Nyinggulu) Visitor Guide.

> *It is important not to encourage dingo interactions with humans as habituation may lead to aggressive behaviour, and aggressive animals may be destroyed. For their welfare and your safety, please be Dingo Safe:*
>
> - *Never offer food or water to dingoes, even indirectly.*
> - *Do not approach dingoes or attempt to lure them closer – watch quietly from a distance or stay in your car.*
> - *Secure food, food scraps, rubbish, fish and bait.*
> - *Supervise children, including small teenagers.*
>
> *If going for a walk, you may like to carry a stick, pop up umbrella or something noisy to scare dingoes away. Seeing a dingo on your travels is normally an enjoyable and memorable experience. However, if at any stage you feel threatened:*
>
> - *Stay calm.*
> - *Stand to your full height and face the dingo.*
> - *If you are with others, stand back to back.*
> - *If you have children, gather them to you and remain calm.*
> - *Keep your arms close to your body.*
> - *Maintain eye contact.*
> - *Confidently and loudly call for help.*
> - *Calmly back away to a safe area, preferably a vehicle, or until the dingo gets bored and moves away.*
> - ***DO NOT RUN** (running will incite a chase response).*
> - ***DO NOT** wave your arms or feet at them.*
> - ***DO NOT** overreact or move suddenly as this will excite the dingo.*

6.4.2 Signage

Signage to the entry to the dunes and beach on designated access ways will be erected to direct people to remain on the existing paths. There will also be interpretive signage at the entrance to point out the habitat values and restriction on feeding or disturbing wildlife. The signage regarding dingoes in the area will also be retained.

6.5 Waste Management

The proposed development will have adequate bins available to ensure that littering and improper waste management is mitigated.

All outdoor bins will have self-closing lids and not be permitted to overflow. The bins will be regularly cleared and appropriately situated to prevent rubbish from being blown out of them. Food waste will be regularly removed and managed in accordance with the Shire of Exmouth waste management system.

The pavilion development will also provide recycling bins.

6.6 Lighting Management

The proposed development is set back from the shore by at least 180m and the intervening dune and vegetation will mitigate light spill. The dunes closest to the beach are around 4-6m higher than the sandy beach and any turtle or bird breeding areas. Nevertheless, further mitigation will be undertaken by the lighting design.

Lighting technologies have changed significantly over recent years, particularly with the development of energy efficient, High Definition LED lighting. Best practice measures as described in the Control of Obtrusive Effects of Outdoor Lighting AS4282-1997 will be employed. Luminaries that are dimmable, temperature controlled (reducing the attraction of insects), glare reduced, and directional (minimising spill to surrounding areas) will be utilised. The following principles will be followed:

1. Start with natural darkness and only add light for specific purposes.
2. Use adaptive light controls to manage light timing, intensity and colour.
3. Light only the object or area intended – keep lights close to the ground, directed, and shielded to avoid light spill.
4. Use the lowest intensity lighting appropriate for the task.
5. Use non-reflective, dark-coloured surfaces.
6. Use lights with reduced or filtered blue, violet and ultraviolet wavelengths. following principles will be employed:

Baseline monitoring will be undertaken prior to construction and a light audit will be undertaken upon completion of construction to ensure the lighting design is effective at minimising light spill, in accordance with the *National Light Pollution Guidelines for Wildlife* (DCCEEW, 2023).

6.7 Adaptive Management

The Environmental Management Plan will be reviewed every five years in consultation with DBCA with an annual review of environmental impacts and updates to management actions if required.

The proponent will liaise with DBCA to discuss emerging issues in-between review cycles and develop strategies to mitigate any impacts and changes to management actions.

APPENDIX 3

Protected Matters Search Tool Report

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 08-Dec-2023

Summary
Details
- Matters of NES
- Other Matters Protected by the EPBC Act
- Extra Information

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	1
National Heritage Places:	1
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	None
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	35
Listed Migratory Species:	47

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	45
Commonwealth Heritage Places:	None
Listed Marine Species:	81
Whales and Other Cetaceans:	13
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None
Habitat Critical to the Survival of Marine Turtles:	3

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	3
Regional Forest Agreements:	None
Nationally Important Wetlands:	1
EPBC Act Referrals:	5
Key Ecological Features (Marine):	None
Biologically Important Areas:	13
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

World Heritage Properties			[Resource Information]
Name	State	Legal Status	Buffer Status
The Ningaloo Coast	WA	Declared property	In buffer area only

National Heritage Places			[Resource Information]
Name	State	Legal Status	Buffer Status
Natural			
The Ningaloo Coast	WA	Listed place	In buffer area only

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act.
Number is the current name ID.

Scientific Name	Threatened Category	Presence Text	Buffer Status
BIRD			
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat may occur within area	In feature area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area	In feature area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area	In feature area
Erythrotriorchis radiatus Red Goshawk [942]	Endangered	Species or species habitat may occur within area	In feature area
Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Limosa lapponica menzbieri Northern Siberian Bar-tailed Godwit, Russkoye Bar-tailed Godwit [86432]	Critically Endangered	Species or species habitat known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area	In feature area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat likely to occur within area	In feature area
Pezoporus occidentalis Night Parrot [59350]	Endangered	Species or species habitat may occur within area	In feature area
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area	In feature area
Sternula nereis nereis Australian Fairy Tern [82950]	Vulnerable	Species or species habitat known to occur within area	In feature area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat may occur within area	In feature area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area	In buffer area only
FISH			
Milyeringa veritas Cape Range Cave Gudgeon, Blind Gudgeon [66676]	Vulnerable	Species or species habitat known to occur within area	In feature area
Ophisternon candidum Blind Cave Eel [66678]	Vulnerable	Species or species habitat known to occur within area	In feature area
Thunnus maccoyii Southern Bluefin Tuna [69402]	Conservation Dependent	Species or species habitat likely to occur within area	In feature area
MAMMAL			
Dasyurus hallucatus Northern Quoll, Digul [Gogo-Yimidir], Wijingadda [Dambimangari], Wiminji [Martu] [331]	Endangered	Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Eubalaena australis Southern Right Whale [40]	Endangered	Species or species habitat may occur within area	In buffer area only
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Petrogale lateralis lateralis Black-flanked Rock-wallaby, Moororong, Black-footed Rock Wallaby [66647]	Endangered	Species or species habitat known to occur within area	In feature area
Rhinonicteris aurantia (Pilbara form) Pilbara Leaf-nosed Bat [82790]	Vulnerable	Species or species habitat may occur within area	In feature area
REPTILE			
Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area	In feature area
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area	In feature area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area	In feature area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area	In feature area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area	In feature area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area	In feature area
SHARK			

Scientific Name	Threatened Category	Presence Text	Buffer Status
Carcharias taurus (west coast population)			
Grey Nurse Shark (west coast population) [68752]	Vulnerable	Congregation or aggregation known to occur within area	In feature area
Carcharodon carcharias			
White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Pristis clavata			
Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area	In feature area
Pristis pristis			
Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area	In feature area
Pristis zijsron			
Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area	In feature area
Rhincodon typus			
Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area	In feature area
Sphyrna lewini			
Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat likely to occur within area	In feature area

Listed Migratory Species		[Resource Information]	
Scientific Name	Threatened Category	Presence Text	Buffer Status
Migratory Marine Birds			
Anous stolidus			
Common Noddy [825]		Species or species habitat likely to occur within area	In feature area
Apus pacificus			
Fork-tailed Swift [678]		Species or species habitat likely to occur within area	In feature area
Ardenna carneipes			
Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Species or species habitat may occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat may occur within area	In feature area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Species or species habitat likely to occur within area	In feature area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area	In feature area
Phaethon lepturus White-tailed Tropicbird [1014]		Species or species habitat may occur within area	In feature area
Sternula albifrons Little Tern [82849]		Species or species habitat may occur within area	In feature area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat may occur within area	In feature area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Migratory Marine Species			
Anoxypristis cuspidata Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat likely to occur within area	In feature area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area	In feature area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat may occur within area	In feature area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat likely to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area	In feature area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area	In feature area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area	In feature area
Dugong dugon Dugong [28]		Breeding known to occur within area	In feature area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area	In feature area
Eubalaena australis as Balaena glacialis australis Southern Right Whale [40]	Endangered	Species or species habitat may occur within area	In buffer area only
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area	In feature area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area	In feature area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat known to occur within area	In feature area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area	In feature area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Species or species habitat likely to occur within area	In feature area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area	In feature area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area	In feature area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area	In feature area
Rhincodon typus Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area	In feature area
Sousa sahulensis as Sousa chinensis Australian Humpback Dolphin [87942]		Species or species habitat known to occur within area	In feature area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area	In feature area
Migratory Terrestrial Species			
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area	In feature area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area	In feature area
Motacilla flava Yellow Wagtail [644]		Species or species habitat may occur within area	In feature area
Migratory Wetlands Species			
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area	In feature area
Calidris acuminata Sharp-tailed Sandpiper [874]		Species or species habitat known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat may occur within area	In feature area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area	In feature area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat may occur within area	In feature area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area	In feature area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area	In feature area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat may occur within area	In feature area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area	In feature area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat likely to occur within area	In feature area
Pandion haliaetus Osprey [952]		Breeding known to occur within area	In feature area
Tringa nebularia Common Greenshank, Greenshank [832]		Species or species habitat likely to occur within area	In feature area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Commonwealth Land Name	State	Buffer Status
Defence		
Defence - EXMOUTH ADMIN & HF TRANSMITTING [50127]	WA	In buffer area only
Defence - EXMOUTH ADMIN & HF TRANSMITTING [50124]	WA	In buffer area only

Listed Marine Species [Resource Information]

Scientific Name	Threatened Category	Presence Text	Buffer Status
Bird			

Scientific Name	Threatened Category	Presence Text	Buffer Status
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area	In feature area
Anous stolidus Common Noddy [825]		Species or species habitat likely to occur within area	In feature area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area	In feature area
Ardenna carneipes as Puffinus carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Species or species habitat may occur within area	In buffer area only
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area	In feature area
Calidris acuminata Sharp-tailed Sandpiper [874]		Species or species habitat known to occur within area	In feature area
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat may occur within area overfly marine area	In feature area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area overfly marine area	In feature area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat may occur within area overfly marine area	In feature area
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Chalcites osculans as Chrysococcyx osculans Black-eared Cuckoo [83425]		Species or species habitat likely to occur within area overfly marine area	In feature area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area	In feature area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area overfly marine area	In feature area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Species or species habitat likely to occur within area	In feature area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat may occur within area overfly marine area	In feature area
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area	In feature area
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area overfly marine area	In feature area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area	In feature area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area	In feature area
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area overfly marine area	In feature area
Motacilla flava Yellow Wagtail [644]		Species or species habitat may occur within area overfly marine area	In feature area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat likely to occur within area	In feature area
Pandion haliaetus Osprey [952]		Breeding known to occur within area	In feature area
Phaethon lepturus White-tailed Tropicbird [1014]		Species or species habitat may occur within area	In feature area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area overfly marine area	In feature area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Species or species habitat may occur within area	In feature area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat may occur within area	In feature area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area	In buffer area only
Tringa nebularia Common Greenshank, Greenshank [832]		Species or species habitat likely to occur within area overfly marine area	In feature area
Fish			

Scientific Name	Threatened Category	Presence Text	Buffer Status
Acentronura larsonae Helen's Pygmy Pipehorse [66186]		Species or species habitat may occur within area	In buffer area only
Bulbonaricus brauni Braun's Pughead Pipefish, Pug-headed Pipefish [66189]		Species or species habitat may occur within area	In feature area
Campichthys tricarinatus Three-keel Pipefish [66192]		Species or species habitat may occur within area	In feature area
Choeroichthys brachysoma Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area	In feature area
Choeroichthys latispinosus Muiron Island Pipefish [66196]		Species or species habitat may occur within area	In buffer area only
Choeroichthys suillus Pig-snouted Pipefish [66198]		Species or species habitat may occur within area	In feature area
Doryrhamphus dactyliophorus Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area	In buffer area only
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area	In feature area
Doryrhamphus multiannulatus Many-banded Pipefish [66717]		Species or species habitat may occur within area	In buffer area only
Doryrhamphus negrosensis Flagtail Pipefish, Masthead Island Pipefish [66213]		Species or species habitat may occur within area	In feature area
Festucalex scalaris Ladder Pipefish [66216]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area	In feature area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area	In feature area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]		Species or species habitat may occur within area	In feature area
Halicampus nitidus Glittering Pipefish [66224]		Species or species habitat may occur within area	In feature area
Halicampus spinirostris Spiny-snout Pipefish [66225]		Species or species habitat may occur within area	In feature area
Haliichthys taeniophorus Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area	In feature area
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area	In feature area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area	In feature area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area	In feature area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area	In feature area
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Hippocampus trimaculatus Three-spot Seahorse, Low-crowned Seahorse, Flat-faced Seahorse [66720]		Species or species habitat may occur within area	In feature area
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area	In feature area
Phoxocampus belcheri Black Rock Pipefish [66719]		Species or species habitat may occur within area	In buffer area only
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area	In feature area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area	In feature area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area	In feature area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area	In feature area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area	In feature area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area	In feature area
Mammal			
Dugong dugon Dugong [28]		Breeding known to occur within area	In feature area
Reptile			
Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Aipysurus duboisii Dubois' Sea Snake, Dubois' Seasnake, Reef Shallows Sea Snake [1116]		Species or species habitat may occur within area	In feature area
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Aipysurus laevis Olive Sea Snake, Olive-brown Sea Snake [1120]		Species or species habitat may occur within area	In feature area
Aipysurus mosaicus as Aipysurus eydouxii Mosaic Sea Snake [87261]		Species or species habitat may occur within area	In feature area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area	In feature area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area	In feature area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area	In feature area
Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area	In feature area
Ephalophis greyi Mangrove Sea Snake [1127]		Species or species habitat may occur within area	In feature area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area	In feature area
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area	In feature area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area	In feature area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area	In feature area
Hydrophis peronii as Acalyptophis peronii Horned Sea Snake [93509]		Species or species habitat may occur within area	In feature area
Hydrophis platurus as Pelamis platurus Yellow-bellied Sea Snake [93517]		Species or species habitat may occur within area	In feature area
Hydrophis stokesii as Astrotia stokesii Stokes' Sea Snake [93510]		Species or species habitat may occur within area	In feature area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area	In feature area

Whales and Other Cetaceans			[Resource Information]
Current Scientific Name	Status	Type of Presence	Buffer Status
Mammal			
Balaenoptera acutorostrata Minke Whale [33]		Species or species habitat may occur within area	In feature area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area	In feature area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area	In feature area
Eubalaena australis Southern Right Whale [40]	Endangered	Species or species habitat may occur within area	In buffer area only
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area	In feature area

Current Scientific Name	Status	Type of Presence	Buffer Status
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area	In feature area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Species or species habitat likely to occur within area	In feature area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area	In feature area
Sousa sahulensis Australian Humpback Dolphin [87942]		Species or species habitat known to occur within area	In feature area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area	In feature area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area	In feature area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area	In feature area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area	In feature area

Habitat Critical to the Survival of Marine Turtles			
Scientific Name	Behaviour	Presence	Buffer Status
Aug - Sep			
Natator depressus Flatback Turtle [59257]	Nesting	Known to occur	In buffer area only
Dec - Jan			
Chelonia mydas Green Turtle [1765]	Nesting	Known to occur	In feature area
Nov-Feb			

Scientific Name	Behaviour	Presence	Buffer Status
Caretta caretta Loggerhead Turtle [1763]	Nesting	Known to occur	In feature area

Extra Information

State and Territory Reserves			[Resource Information]
Protected Area Name	Reserve Type	State	Buffer Status
Bundegi Coastal Park	5(1)(h) Reserve	WA	In buffer area only
Cape Range	National Park	WA	In buffer area only
Ningaloo	Marine Park	WA	In buffer area only

Nationally Important Wetlands		[Resource Information]
Wetland Name	State	Buffer Status
Cape Range Subterranean Waterways	WA	In buffer area only

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements

This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:

APPENDIX 4

Conservation Codes

Conservation Codes for Western Australian Flora and Fauna

Threatened, Extinct and Specially Protected fauna or flora are species which have been adequately searched for and are deemed to be, in the wild, threatened, extinct or in need of special protection, and have been gazetted as such.

The lists of Threatened, Extinct and Specially Protected species are listed under Part 2 of the Biodiversity Conservation Act 2016.

Categories of Threatened, Extinct and Specially Protected fauna and flora are:

T Threatened species

Listed by order of the Minister as Threatened in the category of critically endangered, endangered or vulnerable under section 19(1), or is a rediscovered species to be regarded as threatened species under section 26(2) of the *Biodiversity Conservation Act 2016* (BC Act).

> ***Threatened fauna*** is the species of fauna that are listed as critically endangered, endangered or vulnerable threatened species.
>
> ***Threatened flora*** is the species of flora that are listed as critically endangered, endangered or vulnerable threatened species.

The assessment of the conservation status of threatened species is in accordance with the BC Act listing criteria and the requirements of Ministerial Guideline (Number 1) and Ministerial Guideline (Number 2) that adopts the use of the International Union for Conservation of Nature (IUCN) Red List of Threatened Species Categories and Criteria 4, and is based on the national distribution of the species.

CR Critically endangered species

Threatened species considered to be "*facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with criteria set out in the ministerial guidelines*".

Listed as critically endangered under section 19(1)(a) of the BC Act in accordance with the criteria set out in section 20 and the ministerial guidelines.

EN Endangered species

Threatened species considered to be "*facing a very high risk of extinction in the wild in the near future, as determined in accordance with criteria set out in the ministerial guidelines*".

Listed as endangered under section 19(1)(b) of the BC Act in accordance with the criteria set out in section 21 and the ministerial guidelines.

VU Vulnerable species

Threatened species considered to be "*facing a high risk of extinction in the wild in the medium-term future, as determined in accordance with criteria set out in the ministerial guidelines*".

Listed as vulnerable under section 19(1)(c) of the BC Act in accordance with the criteria set out in section 22 and the ministerial guidelines.

Extinct Species

EX Presumed extinct species

Species where "*there is no reasonable doubt that the last member of the species has died*", and listing is otherwise in accordance with the ministerial guidelines (section 24 of the BC Act).

EW Extinct in the wild species

Species that "*is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; and it has not been recorded in its known habitat or expected habitat, at appropriate seasons, anywhere in its past range, despite surveys over a time frame appropriate to its life cycle and form*", and listing is otherwise in accordance with the ministerial guidelines (section 25 of the BC Act).

Currently there are no threatened fauna or threatened flora species listed as extinct in the wild. If listing of a species as extinct in the wild occurs, then a schedule will be added to the applicable notice.

Specially protected species

Listed by order of the Minister as specially protected under section 13(1) of the BC Act. Meeting one or more of the following categories: species of special conservation interest; migratory species; cetaceans; species subject to international agreement; or species otherwise in need of special protection.

Species that are listed as threatened species (critically endangered, endangered or vulnerable) or extinct species under the BC Act cannot also be listed as Specially Protected species.

MI Migratory species

Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth; and listing is otherwise in accordance with the ministerial guidelines (section 15 of the BC Act).

Includes birds that are subject to an agreement between the government of Australia and the governments of Japan (JAMBA), China (CAMBA) and The Republic of Korea (ROKAMBA), and fauna subject to the Convention on the Conservation of Migratory Species of Wild Animals (Bonn Convention), an environmental treaty under the United Nations Environment Program. Migratory species listed under the BC Act are a subset of the migratory animals, that are known to visit Western Australia, protected under the international agreements or treaties, excluding species that are listed as Threatened species.

CD **Species of special conservation interest (conservation dependent fauna)**

Fauna of special conservation need being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened, and listing is otherwise in accordance with the ministerial guidelines (section 14 of the BC Act).

Currently only fauna are listed as species of special conservation interest.

OS **Other specially protected species**

Fauna otherwise in need of special protection to ensure their conservation, and listing is otherwise in accordance with the ministerial guidelines (section 18 of the BC Act).

Currently only fauna are listed as species otherwise in need of special protection.

P **Priority species**

Priority is not a listing category under the BC Act.

All fauna and flora are protected in WA following the provisions in Part 10 of the BC Act. The protection applies even when a species is not listed as threatened or specially protected, and regardless of land tenure (State managed land (Crown land), private land, or Commonwealth land).

Species that may possibly be threatened species that do not meet the criteria for listing under the BC Act because of insufficient survey or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of prioritisation for survey and evaluation of conservation status so that consideration can be given to potential listing as threatened.

Species that are adequately known, meet criteria for near threatened, or are rare but not threatened, or that have been recently removed from the threatened species list or conservation dependent or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.

Assessment of priority status is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

Priority 1: Poorly-known species

Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, for example, agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation.

Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements for threatened listing and appear to be under immediate threat from known threatening processes. These species are in urgent need of further survey.

Priority 2: Poorly-known species

Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, for example, national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation.

Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements for threatened listing and appear to be under threat from known threatening processes. These species are in urgent need of further survey.

Priority 3: Poorly-known species

Species that are known from several locations and the species does not appear to be under imminent threat or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat.

Species may be included if they are comparatively well known from several locations but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. These species need further survey.

Priority 4: Rare, Near Threatened and other species in need of monitoring

(a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection but could be if present circumstances change. These species are usually represented on conservation lands.

(b) Near Threatened. Species that are considered to have been adequately surveyed and that are close to qualifying for vulnerable but are not listed as a conservation dependent specially protected species.

(c) Species that have been removed from the list of threatened species or lists of conservation dependent or other specially protected species, during the past five years for reasons other than taxonomy.

(d) Other species in need of monitoring.

Western Australian Ecological Communities

Threatened Ecological Communities

The BC Act provides for the statutory listing of threatened ecological communities (TECs) by the Minister.

Presumed Totally Destroyed (PD)

An ecological community that has been adequately searched for but for which no representative occurrences have been located. The community has been found to be totally

destroyed or so extensively modified throughout its range that no occurrence of it is likely to recover its species composition and/or structure in the foreseeable future.

Critically Endangered (CR)

An ecological community that has been adequately surveyed and found to have been subject to a major contraction in area and/or that was originally of limited distribution and is facing severe modification or destruction throughout its range in the immediate future, or is already severely degraded throughout its range but capable of being substantially restored or rehabilitated.

Endangered (EN)

An ecological community that has been adequately surveyed and found to have been subject to a major contraction in area and/or was originally of limited distribution and is in danger of significant modification throughout its range or severe modification or destruction over most of its range in the near future.

Vulnerable (VU)

An ecological community that has been adequately surveyed and is found to be declining and/or has declined in distribution and/or condition and whose ultimate security has not yet been assured and/or a community that is still widespread but is believed likely to move into a category of higher threat in the near future if threatening processes continue or begin operating throughout its range.

Priority Ecological Communities

Possible threatened ecological communities that do not meet survey criteria or that are not adequately defined are added to the Priority Ecological Community List under priorities 1, 2 and 3. These three categories are ranked in order of priority for survey and/or definition of the community. Ecological communities that are adequately known, and are rare but not threatened or meet criteria for Near Threatened, or that have been recently removed from the threatened list, are placed in Priority 4. These ecological communities require regular monitoring. Conservation Dependent ecological communities are placed in Priority 5.

Priority One: Poorly-known ecological communities

Ecological communities that are known from very few occurrences with a very restricted distribution (generally ≤5 occurrences or a total area of ≤ 100ha).

Occurrences are believed to be under threat either due to limited extent, or being on lands under immediate threat (e.g. within agricultural or pastoral lands, urban areas, active mineral leases) or for which current threats exist. May include communities with occurrences on protected lands. Communities may be included if they are comparatively well-known from one or more localities but do not meet adequacy of survey requirements, and/or are not well defined, and appear to be under immediate threat from known threatening processes across their range.

Priority Two: Poorly-known ecological communities

Communities that are known from few occurrences with a restricted distribution (generally ≤10 occurrences or a total area of ≤200ha). At least some occurrences are not believed to be under immediate threat (within approximately 10 years) of destruction or degradation. Communities may be included if they are comparatively well known from one or more localities but do not meet adequacy of survey requirements, and/or are not well defined, and appear to be under threat from known threatening processes.

Priority Three: Poorly known ecological communities

(i) Communities that are known from several to many occurrences, a significant number or area of which are not under threat of habitat destruction or degradation or:

(ii) communities known from a few widespread occurrences, which are either large or with significant remaining areas of habitat in which other occurrences may occur, much of it not under imminent threat (within approximately 10 years), or;

(iii) munities made up of large, and/or widespread occurrences, that may or may not be represented in the reserve system, but are under threat of modification across much of their range from processes such as grazing by domestic and/or feral stock, inappropriate fire regimes, clearing, hydrological change etc.

Communities may be included if they are comparatively well known from several localities but do not meet adequacy of survey requirements and/or are not well defined, and known threatening processes exist that could affect them.

Priority Four: Ecological communities that are adequately known, rare but not threatened or meet criteria for Near Threatened, or that have been recently removed from the threatened list. These communities require regular monitoring.

(i) Rare. Ecological communities known from few occurrences that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These communities are usually represented on conservation lands.

(ii) Near Threatened. Ecological communities that are considered to have been adequately surveyed and that do not qualify for Conservation Dependent, but that are close to qualifying for a higher threat category.

(iii) Ecological communities that have been removed from the list of threatened communities during the past five years.

Priority Five: Conservation Dependent ecological communities

Ecological communities that are not threatened but are subject to a specific conservation program, the cessation of which would result in the community becoming threatened within five years.

Commonwealth of Australia Conservation Codes

Threatened Flora and Fauna

Threatened fauna and flora may be listed under Section 178 of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) in any one of the following six categories:

Extinct

A native species is eligible to be included in the extinct category at a particular time if, at that time, there is no reasonable doubt that the last member of the species has died.

Extinct in the wild

A native species is eligible to be included in the extinct in the wild category at a particular time if, at that time:

a) it is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; or
b) it has not been recorded in its known and/or expected habitat, at appropriate seasons, anywhere in its past range, despite exhaustive surveys over a time frame appropriate to its life cycle and form.

Critically endangered

A taxon is Critically Endangered when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing an extremely high risk of extinction in the wild.

Endangered

A taxon is Endangered when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing a very high risk of extinction in the wild.

Vulnerable

A taxon is Vulnerable when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing a high risk of extinction in the wild.

Conservation dependent

A native species is eligible to be included in the conservation dependent category at a particular time if, at that time:

a) the species is the focus of a specific conservation program the cessation of which would result in the species becoming vulnerable, endangered or critically endangered; or
b) the following subparagraphs are satisfied:
    i. the species is a species of fish;

ii. the species is the focus of a plan of management that provides for management actions necessary to stop the decline of, and support the recovery of, the species so that its chances of long term survival in nature are maximised;
iii. the plan of management is in force under a law of the Commonwealth or of a State or Territory;
iv. cessation of the plan of management would adversely affect the conservation status of the species.

The EPBC Act does not provide for listing in a data deficient category. Where sufficient data (evidence) is unavailable to allow assessment by the Threatened Species Scientific Committee against the criteria for listing, the species are found to be ineligible. A recommendation is made to the Minister to not include the species in any category under the EPBC Act. For reasons of transparency and to inform future research, the Threatened Species Scientific Committee publishes the names of those species found to be data deficient. As data deficient is not a listing category under the EPBC Act, this has no statutory implications and the species is not considered to be listed under the EPBC Act.

Threatened Ecological Communities

Threatened Ecological communities under the EPBC Act are listed in three categories.

Critically endangered

If, at that time, an ecological community is facing an extremely high risk of extinction in the wild in the immediate future (indicative timeframe being the next 10 years).

Endangered

If, at that time, an ecological community is not critically endangered but is facing a very high risk of extinction in the wild in the near future (indicative timeframe being the next 20 years).

Vulnerable

If, at that time, an ecological community is not critically endangered or endangered, but is facing a high risk of extinction in the wild in the medium–term future (indicative timeframe being the next 50 years).

Appendix C

Bushfire Management Plan

Bushfire management plan/Statement addressing the Bushfire Protection Criteria coversheet

Site address: Lot 1407 Willersdorf Road

Site visit: Yes ☑ No ☐

Date of site visit (if applicable): Day 11 Month October Year 2023

Report author or reviewer: Kathy Nastov

WA BPAD accreditation level (please circle):

Not accredited ☐ Level 1 BAL assessor ☐ Level 2 practitioner ☐ Level 3 practitioner ☑

If accredited please provide the following.

BPAD accreditation number: 27794 Accreditation expiry: Month August Year 2024

Bushfire management plan version number: V1.0

Bushfire management plan date: Day 26 Month March Year 2024

Client/business name: Sebatikel Developments

	Yes	No
Has the BAL been calculated by a method other than method 1 as outlined in AS3959 (tick no if AS3959 method 1 has been used to calculate the BAL)?		✔
Have any of the bushfire protection criteria elements been addressed through the use of a performance principle (tick no if only acceptable solutions have been used to address all of the bushfire protection criteria elements)?		✔

Is the proposal any of the following (see SPP 3.7 for definitions)?	Yes	No
Unavoidable development (in BAL-40 or BAL-FZ)		✔
Strategic planning proposal (including rezoning applications)	✔	
High risk land-use		✔
Vulnerable land-use		✔

None of the above ☐

Note: Only if one (or more) of the above answers in the tables is yes should the decision maker (e.g. local government or the WAPC) refer the proposal to DFES for comment.

Why has it been given one of the above listed classifications (E.g. Considered vulnerable land-use as the development is for accommodation of the elderly, etc.)?

The information provided within this bushfire management plan to the best of my knowledge is true and correct:

Limitations: *The protection measures that will be implemented based on information presented in this Bushfire Management Plan are minimum requirements and they do not guarantee that buildings or infrastructure will not be damaged in a bushfire, persons injured, or fatalities occur either on the subject site or off the site while evacuating.*

This is substantially due to the unpredictable nature and behaviour of fire and fire weather conditions. Additionally, the correct implementation of the required protection measures (including bushfire resistant construction) and any other required or recommended measures, will depend upon, among other things, the ongoing actions of the landowners and/or operators over which Bushfire Prone Planning has no control.

All surveys, forecasts, projections and recommendations made in this report associated with the proposed development are made in good faith based on information available to Bushfire Prone Planning at the time. All maps included herein are indicative in nature and are not to be used for accurate calculations.

Notwithstanding anything contained therein, Bushfire Prone Planning will not, except as the law may require, be liable for any loss or other consequences whether or not due to the negligence of their consultants, their servants or agents, arising out of the services provided by their consultants.

Copyright © 2024 BPP Group Pty Ltd: *All intellectual property rights, including copyright, in format and proprietary content contained in documents created by Bushfire Prone Planning, remain the property of BPP Group Pty Ltd. Any use made of such format or content without the prior written approval of Bushfire Prone Planning, will constitute an infringement on the rights of the Company which reserves all legal rights and remedies in respect of any such infringement.*

SUMMARY STATEMENTS

THIS DOCUMENT – STATEMENT OF PURPOSE

The Bushfire Management Plan (BMP)

The BMP sets out the required package of bushfire protection measures to lessen the risks associated with a bushfire event. It establishes the responsibilities to implement and maintain these measures.

The BMP also identifies the potential for any negative impact on any environmental, biodiversity and conservation values that may result from the application of bushfire protection measures or that may limit their implementation.

Risks Associated with Bushfire Events

The relevant risks are the potential for loss of life, injury, or destroyed or damaged assets which results in personal loss and economic loss. For a given site, the level of that risk to persons and assets (the exposed elements) is a function of the potential threat levels generated by the bushfire hazard, and the level of exposure and vulnerability of the at risk elements to the threats.

Bushfire Protection Measures

The required package of protection measures is established by *State Planning Policy 3.7 Planning in Bushfire Prone Areas (SPP 3.7)*, its associated *Guidelines* and any other relevant guidelines or position statements published by the Department of Planning, Lands and Heritage. These measures are limited to those considered by the WA planning authorities as necessary to be addressed for the purpose of land use planning. They do not encompass all available bushfire protection measures as many are not directly relevant to the planning approval stage. For example:

- Protection measures to reduce the vulnerability of buildings to bushfire threats is primarily dealt with at the building application stage. They are implemented through the process of applying the Building Code of Australia (Volumes 1 and 2 of the national Construction Code) in accordance with WA building legislation and the application of construction requirements based on a building's level of exposure - determined as a Bushfire Attack Level (BAL) rating); or
- Protection measures to reduce the threat levels of consequential fire (ignited by bushfire and involving combustible materials surrounding and within buildings) and measures to reduce the exposure and vulnerability of elements at risk exposed to consequential fire, are not specifically considered.

The package of required bushfire protection measures established by the Guidelines includes:

- The requirements of the bushfire protection criteria which consist of:
  - Element 1: Location (addresses threat levels).
  - Element 2: Siting and Design of Development (addresses exposure levels of buildings).
  - Element 3: Vehicular Access (addresses exposure and vulnerability levels of persons).
  - Element 4: Water (addresses vulnerability levels of buildings).
  - Element 5: Vulnerable Tourism Land Uses (addresses exposure and vulnerability as per Elements 1-4 but in use specific ways and with additional considerations of persons exposure and vulnerability).
- The requirement to develop Bushfire Emergency Plans / Information for 'vulnerable' land uses for persons to prepare, respond and recover from a bushfire event (this addresses vulnerability levels).
- The requirement to assess bushfire risk and incorporate relevant protection measures into the site emergency plans for 'high risk' land uses (this addresses threat, exposure and vulnerability levels).

Compliance of the Proposed Development or Use with SPP 3.7 Requirements

The BMP assesses the capacity of the proposed development or use to implement and maintain the required 'acceptable' solutions and any additionally recommended bushfire protection measures - or its capacity to satisfy the policy intent through the justified application of additional bushfire protection measures as supportable 'alternative' solutions.

THE PROPOSED DEVELOPMENT/USE – BUSHFIRE PLANNING COMPLIANCE SUMMARY

Environmental Considerations		Assessment Outcome
Will land with identified environmental, biodiversity and conservation values limit the full application of the required bushfire protection measures?		No
Will land with identified environmental, biodiversity and conservation values need to be managed in the implementation and maintenance of the bushfire protection measures - but not limit their application?		No
Required Bushfire Protection Measures The Acceptable Solutions of the Bushfire Protection Criteria (Guidelines)		**Assessment Outcome**
Element	The Acceptable Solutions	
1: Location	A1 Location	Fully Compliant
	A1.1 Development location	Fully Compliant
2: Siting and Design of Development	A2 Siting and Design of Development	Fully Compliant
	A2.1 Asset Protection Zone (APZ)	Fully Compliant
3: Vehicular Access	A3 Vehicular Access	Fully Compliant
	A3.1 Public roads	Fully Compliant
	A3.2a Multiple access routes	Fully Compliant
	A3.2b Emergency access way	N/A
	A3.3 Through-roads	Fully Compliant
	A3.4a Perimeter roads	N/A
	A3.4b Fire service access route	N/A
	A3.5 Battle-axe legs	N/A
	A3.6 Private driveways	N/A
4: Water	A4 Water	Fully Compliant
	A4.1 Identification of future water supply	Fully Compliant
	A4.2 Provision of water for firefighting purposes	N/A
5: Vulnerable Tourism Land Uses		

1 PROPOSAL DETAILS AND THE BUSHFIRE MANAGEMENT PLAN

1.1 The Proposed Development/Use Details, Plans and Maps

The Proposal's Planning Stage For which certain bushfire planning documents are required to accompany the planning application.		Strategic Planning Proposal - Local Planning Scheme Amendment
The Subject Land/Site		Lot 1407 Willersdorf Road, Exmouth
Total Area of Subject Lot/Site		5.185 hectares
Number of Additional Lots Created		N/A
Primary Proposed Construction	**Type(s)**	New Building(s)
	NCC Classification	Class 3 (residential building not Class 1 or 2)
The 'Specific' Land Use Type for **Bushfire Planning** When applicable, this classification establishes a requirement to conduct assessments and develop documents that are additional to this Bushfire Management Plan.		N/A
Factors Determining the 'Specific' Land Use Type		The proposed development is a land use that is categorised as a Short term accommodation (other than B&B/Holiday House) including motel, serviced apartments, tourist development (includes cabins and chalets), holiday accommodation and caravan park (which incorporates camping grounds). The proposed tourism land use involves visitors who are unfamiliar with the surroundings and/or where they present evacuation challenges. The proposal would benefit from a Bushfire Emergency Plan to manage the safety of occupants in a bushfire event. Therefore, it should be treated as 'vulnerable'.
Factors Determining the 'Specific' Land Use Type		The proposed land use involves visitors who are unfamiliar with the surroundings and/or presents evacuation challenges. The proposal would benefit from a Bushfire Emergency Plan to manage the safety of occupants in a bushfire event.
Description of the Proposed Development/Use		
Future proposed development will be short term accommodation. Multiple accommodation buildings with a main lobby building and worker accommodation.

BUSHFIRE PRONE PLANNING

Disclaimer and Limitation: This map has been prepared for bushfire management planning purposes only. All depicted areas, contours and any dimensions shown are subject to survey. Bushfire Prone Planning does not guarantee that this map is without flaw of any kind and disclaims all liability for any errors, loss or other consequence which may arise from relying on any information depicted.

WHERE SPP 3.7 AND THE GUIDELINES ARE TO APPLY – DESIGNATED BUSHFIRE PRONE AREAS

All higher order strategic planning documents, strategic planning proposals, subdivisions and development applications located in designated bushfire prone areas need to address SPP 3.7 and its supporting Guidelines. This also applies where an area is not yet designated as bushfire prone but is proposed to be developed in a way that introduces a bushfire hazard.

For development applications where only part of a lot is designated as bushfire prone and the proposed development footprint is wholly outside of the designated area, the development application will not need to address SPP 3.7 or the Guidelines. (Guidelines DPLH 2021 v1.4, s1.2).

For subdivision applications, if all the proposed lots have a BAL-LOW indicated, a BMP is not required. (Guidelines DPLH 2021 v1.4, s5.3.1).

Disclaimer and Limitation: This map has been prepared for bushfire management planning purposes only. All depicted areas, contours and any dimensions shown are subject to survey. Bushfire Prone Planning does not guarantee that this map is without flaw of any kind and disclaims all liability for any errors, loss or other consequence which may arise from relying on any information depicted.

1.2 The Bushfire Management Plan (BMP)

1.2.1 Commissioning and Purpose

Landowner / proponent:	Sebatikel Holdings
Bushfire Prone Planning commissioned to produce the BMP by:	Taylor Burrell Barnett
Purpose of the BMP:	To assess the proposal's ability to meet all relevant requirements established by State Planning Policy 3.7: Planning in Bushfire Prone Areas (SPP 3.7), the associated 'Guidelines and any relevant Position Statements; and To satisfy the requirement for the provision of a Bushfire Management Plan to accompany the strategic planning proposal.
BMP to be submitted to:	Shire of Exmouth

1.2.2 Other Documents with Implications for Development of this BMP

This section identifies any known assessments, reports or plans that have been conducted and prepared previously, or are being prepared concurrently, and are relevant to the planned proposal for the subject. They potentially have implications for the assessment of bushfire threats and the identification and implementation of the protection measures that are established by this Bushfire Management Plan.

Table 1.4: Other relevant documents that may influence threat assessments and development of protection measures.

Implications for the BMP: A landscape management plan will be created at the development application stage.					
Land Management Agreement	No	N/A	N/A	N/A	-

2 BUSHFIRE PRONE VEGETATION – ENVIRONMENTAL & ASSESSMENT CONSIDERATIONS

2.1 Environmental Considerations – 'Desktop' Assessment

This 'desktop' assessment must not be considered as a replacement for a full Environmental Impact Assessment. It is a summary of potential environmental values at the subject site, inferred from information contained in listed datasets and/or reports, which are only current to the date of last modification.

These data sources must be considered indicative where the subject site has not previously received a site-specific environmental assessment by an appropriate professional.

Many bushfire prone areas also have high biodiversity values. Consideration of environmental priorities within the boundaries of the land being developed can avoid excessive or unnecessary modification or clearing of vegetation. Approval processes (and exemptions) apply at both Commonwealth and State levels.

Any 'modification' or 'clearing' of vegetation to reduce bushfire risk is considered 'clearing' under the ***Environmental Protection Act 1986*** (EP Act) and requires a clearing permit under the ***Environmental Protection (Clearing of Native Vegetation) Regulations 2004*** (Clearing Regulations) – unless for an exempt purpose.

Clearing native vegetation is an offence, unless done under a clearing permit or the clearing is for an exempt purpose. Exemptions are contained in the EP Act or are prescribed in the Clearing Regulations (note: these do not apply in environmentally sensitive areas).

The ***Department of Water and Environmental Regulation*** (DWER) is responsible for issuing 'clearing' permits and the framework for the regulation of clearing. Approvals under other legislation, from other agencies, may also be required, dependent on the type of flora or fauna present.

Local Planning Policy or Local Biodiversity Strategy: Natural areas that are not protected by the above Act and Regulation (or any other National or State Acts) may be protected by a local planning policy or local biodiversity strategy. Permission from the local government will be required for any modification or removal of native vegetation in these Local Natural Areas (LNA's). Refer to the relevant local government for detail.

For further information refer to Guidelines v1.4, the Bushfire and Vegetation Factsheet - WAPC, Dec 2021 and https://www.der.wa.gov.au/our-work/clearing-permits

BUSHFIRE PRONE PLANNING

230803 - FIG 2.1 ENV site Lot 1407 Willersdorf Road Exmouth.qgz

Disclaimer and Limitation: This map has been prepared for bushfire management planning purposes only. All depicted areas, contours and any dimensions shown are subject to survey. Bushfire Prone Planning does not guarantee that this map is without flaw of any kind and disclaims all liability for any errors, loss or other consequence which may arise from relying on any information depicted.

2.1.1 Declared Environmentally Sensitive Areas (ESA)

IDENTIFICATION OF RELEVANT ENVIRONMENTALLY SENSITIVE AREAS							
ESA Class	Relevant to Proposal	Influence on Bushfire Threat Levels and / or Application of Bushfire Protection Measures	Relevant Dataset	Information Source(s) Applied to Identification of Relevant Vegetation			Further Action Required
				Dataset	Landowner or Developer	Environmental Asset or Vegetation Survey	
Wetlands and their 50m Buffer (Ramsar, conservation category and nationally important)	No	N/A	DBCA-010 and 011, 019, 040, 043, 044	☒	☐	☐	None
Bush Forever	No	N/A	DPLH-022, SPP 2.8	☒	☐	☐	None
Threatened and Priority Flora + 50m Continuous Buffer	Unlikely	N/A	DBCA-036	Restricted Scale of Data Available (security)	☐	☒	None
Threatened Ecological Community	No	N/A	DBCA-038		☐	☐	None
Heritage Areas National / World	No	N/A	Relevant register or mapping	☒	☐	☐	None
Environmental Protection (Western Swamp Tortoise) Policy 2002	No	N/A	DWER-062	☒	☐	☐	None
Clearing Regulations ESA Notice 2005.	Possible	Yes - Moderate	DWER-046	☒			Confirm with relevant agency

The Clearing Regulations - Environmentally Sensitive Areas (DWER-046) -2005 is present within the lot boundaries (Figure 2.1). These clearing regulations may not apply to the subject site. This is to be confirmed with the relevant local government authority.

2.1.2 Other Protected Vegetation on Public Land

IDENTIFICATION OF PROTECTED VEGETATION ON PUBLIC LAND							
Land with Environmental, Biodiversity, Conservation and Social Values	Relevant to Proposal	Influence on Bushfire Threat Levels and / or Application of Bushfire Protection Measures	Relevant Dataset	Information Source(s) Applied to Identification of Relevant Vegetation			Further Action Required
				Dataset	Landowner or Developer	Environmental Asset or Vegetation Survey	
Legislated Lands (tenure includes national park/reserve, conservation park, crown reserve and state forest)	Yes	Yes - Moderate	DBCA-011	☒	☐	☐	None
Conservation Covenants	No	No	DPIRD-023	Only Available to Govt.	☐	☐	None
National World Heritage Areas	No	No	-	☒	☐	☐	None
Designated Public Open Space	No	No	-	☒	☐	☐	None

DESCRIPTION OF THE IDENTIFIED AREA(S) OF VEGETATION

Areas of public reserve border Lot 1407 on the north, south and east side. They are predominately scrub and shrub vegetation which cannot be managed by the proponent.

2.1.3 Locally Significant Conservation Areas – Local Natural Areas (LNA)

IDENTIFICATION OF LOCALLY SIGNIFICANT CONSERVATION AREAS							
Land with Environmental, Biodiversity and Conservation Values	Relevant to Proposal	Influence on Bushfire Threat Levels and / or Application of Bushfire Protection Measures	Relevant Dataset	Information Source(s) Applied to Identification of Relevant Vegetation			Further Action Required
				Dataset	Landowner or Developer	Environmental Asset or Vegetation Survey	
Native Vegetation / Remnant Vegetation	Yes	Yes - Moderate	Shire of Exmouth Town Planning Information	☒	☐	☐	None
Riparian Zones / Foreshore Areas	No	N/A		☒	☐	☐	None
Habitat Vegetation and Wildlife Corridors	No	N/A		☒	☐	☐	N/A

DESCRIPTION OF THE IDENTIFIED AREA(S) OF VEGETATION

Areas of unmanaged Crown land border Lot 1407 on the north, south and east side. They are predominately scrub and shrub vegetation which cannot be managed by the proponent. The lot is also entirely vegetated with hummock grassland acacia shrubs.

2.1.4 Response of Proposed Development to Identified Environmental Limitations

Consideration of the implications that identified protected areas of vegetation (i.e., those with environmental and subject to conservation) have for the proposed development.

PROPOSED DEVELOPMENT RESPONSE TO IDENTIFIED 'PROTECTED' VEGETATION	
The existence of 'protected' areas of vegetation has implications for the ability of the proposed development to reduce potential bushfire impact through modification or removal of vegetation.	No
Application of Design and/or Construction Responses to Limit Vegetation Modification or Removal	
Modify the development location to reduce exposure by increasing separation distance.	N/A
Redesign development, structure plan or subdivision.	Not required
Reduction of lot yield where this can increase available separation distances.	N/A
Cluster development to limit modification or removal of vegetation.	N/A
Construct building(s) to the requirements corresponding to higher BAL ratings to reduce required separation distances.	N/A

2.2 Bushfire Assessment Considerations

2.2.1 Planned Onsite Vegetation Landscaping

Identification of areas of the subject site planned to be landscaped, creating the potential for increased or decreased bushfire hazard for proposed development.

PLANNED LANDSCAPING	
Relevant to Proposal:	Yes
A landscape management plan will be created at the development application stage.	

2.2.2 Planned / Potential Offsite Rehabilitation or Re-Vegetation

Identification of areas of land adjacent to the subject site on which re-vegetation (as distinct from natural re-generation) will or may occur and is likely to present a greater bushfire hazard for proposed development.

POTENTIAL RE-VEGETATION PROGRAMS		
Land with Environmental, Biodiversity, Conservation and Social Values	Relevant to Proposal	Description
Riparian Zones / Foreshore Areas	No	
Wetland Buffers	No	
Legislated Lands	No	
Public Open Space	Possible	Nearby beach and coastal dune is accessible by track at the northern end of Willersdorf Road. The dunes West of the development may be subject to periodic revegetation.
Road Verges	No	
Other	No	

2.2.3 Identified Requirement to Manage, Modify or Remove Onsite or Offsite Vegetation

Identification of native vegetation subject to management, modification or removal.

REQUIREMENT TO MANAGE, MODIFY OR REMOVE NATIVE VEGETATION	
Has a requirement been identified to manage, modify or remove **onsite** native vegetation to establish the required bushfire protection measures on the subject site?	Yes
Future development will require the removal of onsite Class D Scrub vegetation to achieve BAL-29. See Figures 3.1.1 and Figure 3.2	
Is approval, from relevant state government agencies and/or the local government, to modify or remove **onsite** native vegetation required? (Note: if 'Yes' evidence of its existence should be provided in this BMP).	Yes
An Environmental Management Plan has been prepared to address DBCA concerns and minimise the impact of future development.	
Has a requirement been identified to manage, modify or remove **offsite** native vegetation to establish the required bushfire protection measures on the subject site?	No

Is written approval required, from relevant state government agencies and/or the local government, that permits the landowner, or another identified party, to modify or remove **offsite** bushfire prone vegetation and/or conduct other works, to establish an identified bushfire protection measure(s)? If 'Yes', appropriate evidence of the approval or how it is to be established, shall be provided in this BMP as an addendum.	N/A
Is a written management agreement required that states the obligation of the landowner, or another responsible party, to manage defined areas of **offsite** bushfire prone vegetation, in perpetuity, to ensure the conditions of no fire fuels and/or low threat vegetation and/or vegetation managed in a minimal fuel condition, continue to be met? If 'Yes', appropriate evidence of the agreement or how it is to be established, shall be provided in this BMP as an addendum.	N/A

2.2.4 Variations to Assessed Areas of Classified Vegetation to be Applied

FOR THE PROPOSED DEVELOPMENT SITUATIONS TO BE ACCOUNTED FOR IN ASSESSING THE POTENTIAL BUSHFIRE IMPACT (BAL)	
Area(s) of land will be subject to future vegetation rehabilitation or re-vegetation that will require a change to a higher threat classification of vegetation on that land to. (Note: this is not regeneration to the mature natural state which is accounted for in the 'existing state' assessment in accordance with AS 3959:2018).	Unlikely
Areas of Class D Scrub along the coastal dunes east of site may be subject to revegetation. However, this will not change the classification under AS3959:2018.	
Modification of existing area(s) of classified vegetation due to the implementation of the proposed development and/or prior to the site's occupancy or use. This modification will require a change to a lower threat classification (or exclusion from classification) for that area of vegetation.	Yes
Refer to Figure 3.1.1 'Post Development Classified Vegetation' and Appendix A1.2 for justification details supporting the change.	
Complete removal of existing area(s) of classified vegetation due to the implementation of the proposed development and/or prior to the site's occupancy or use. This modification will require an exclusion from classification for that area of vegetation.	Yes
Refer to Figure 1.1 'Proposed Development Site Plan' and Figure 3.1.1 'Post Development Classified Vegetation'	

3 BUSHFIRE ATTACK LEVEL (BAL) ASSESSMENT

BUSHFIRE ATTACK LEVELS (BAL) - UNDERSTANDING THE RESULTS

The potential transfer (flux/flow) of radiant heat from the bushfire to a receiving object is measured in kW/m^2. The AS 3959:2018 BAL determination methodology establishes the ranges of radiant heat flux that correspond to each bushfire attack level. These are identified as BAL-LOW, BAL-12.5, BAL-19, BAL-29, BAL-40 and BAL-FZ.

The bushfire performance requirements for certain classes of buildings are established by the Building Code of Australia (Vol. 1 & 2 of the NCC). The BAL will establish the bushfire resistant construction requirements that are to apply in accordance with AS 3959:2018 - *Construction of buildings in bushfire prone areas* and the NASH Standard – *Steel framed construction in bushfire areas (NS 300 2021)*, whose solutions are deemed to satisfy the NCC bushfire performance requirements.

DETERMINED BAL RATINGS

A BAL Certificate can be issued for a determined BAL. A BAL can only be classed as 'determined' for an existing or future building/structure when:

1. It's final design and position on the lot are known and the stated separation distance from classified bushfire prone vegetation exists and can justifiably be expected to remain in perpetuity; or
2. It will always remain subject to the same BAL regardless of its design or position on the lot after accounting for any regulatory or enforceable building setbacks from lot boundaries as relevant and necessary (e.g., R-codes, restrictive covenants, defined building envelopes) or the retention of any existing classified vegetation either onsite or offsite.

If the BMP derives determined BAL(s), the BAL Certificate(s) required for submission with building applications can be provided, using the BMP as the assessment evidence.

INDICATIVE BAL RATINGS

A BAL Certificate cannot be issued for an indicative BAL. A BAL will be classed as 'indicative' for an existing or future building/structure when the required conditions to derive a determined BAL are not met.

This class of BAL rating indicates what BAL(s) could be achieved and the conditions that need to be met are stated.

Converting the indicative BAL into a determined BAL is conditional upon the currently unconfirmed variable(s) being confirmed by a subsequent assessment and evidential documentation. These variables will include the future building(s) location(s) being established (or changed) and/or classified vegetation being modified or removed to establish the necessary vegetation separation distance. This may also be dependent on receiving approval from the relevant authority for that modification/removal.

BAL RATING APPLICATION – PLANNING APPROVAL VERSUS BUILDING APPROVAL

1. **Planning Approval**: SPP.3.7 establishes that where BAL- LOW to BAL-29 will apply to relevant future construction (or existing structures for proposed uses), the proposed development may be considered for approval (dependent on the other requirements of the relevant policy measures being met). That is, BAL40 or BAL-FZ are not acceptable on planning grounds (except for certain limited exceptions).

   Because planning is looking forward at what can be achieved, as well as looking at what may currently exist, both determined and indicative BAL ratings are acceptable assessment outcomes on which planning decisions can be made (including conditional approvals).

2. **Building Approval:** The Building Code of Australia (Vol. 1 & 2 of the NCC) establishes that relevant buildings in bushfire prone areas must be constructed to the bushfire resistant requirements corresponding to the BAL rating that is to apply to that building. Consequently, a determined BAL rating and the BAL Certificate is required for a building permit to be issued - an indicative BAL rating is not acceptable.

3.1 BAL Assessment Summary (Contour Map Format)

INTERPRETATION OF THE BAL CONTOUR MAP

The BAL contour map is a diagrammatic representation of the results of the bushfire attack level assessment.

The map presents different coloured contours extending out from the areas of classified vegetation. Each contour represents a set range of radiant heat flux that potentially will transfer to an exposed element (building, person or other defined element), when it is located within that contour.

Each of the set ranges of radiant heat flux corresponds to a different BAL rating as defined by the AS 3959:2018 BAL determination methodology.

The width of each shaded BAL contour will vary dependant on both the BAL rating and the relevant parameters (calculation inputs) for the subject site. Their width represents the minimum and maximum vegetation separation distances that correspond to each BAL rating (refer to the relevant table below for these distances).

The areas of classified vegetation to be considered in developing the BAL contours, are those that will remain at the intended end state of the subject development once earthworks, clearing and/or landscaping and re-vegetation have been completed. Variations to this statement that may apply include:

- Both pre and post development BAL contour maps are produced; and/or
- Each stage of a development is assessed independently.

3.1.1 BAL Determination Methodology and Location of Data and Results

LOCATION OF DATA & RESULTS					
BAL Determination Methodology		Location of the Site Assessment Data			Location of the Results
AS 3959:2018	Applied to Assessment	Classified Vegetation and Topography Map(s)	Calculation Input Variables		Assessed Bushfire Attack Levels and/or Radiant Heat Levels
			Summary Data	Detailed Data with Explanatory and Supporting Information	
Method 1 (Simplified)	Yes	Figure 3.1	Table 3.2	Appendix A1	Table 3.1 Table 3.3 / BAL Contour Map
Method 2 (Detailed)	No	N/A	N/A	N/A	

3.1.2 BAL Ratings Derived from the Contour Map

Table 3.1: Indicative and determined BAL(s) for future buildings/structures on the proposed lots.

BUSHFIRE ATTACK LEVEL FOR FUTURE BUILDINGS / STRUCTURES ON STATED LOT [1]		
Lot No.1407	Future Buildings / Structure	
	Indicative BAL [2]	Determined BAL [2]
All future buildings	BAL-29	N/A
[1] The assessment data used to derive the BAL ratings is sourced from Table 3.1 and Figure 3.2 'BAL Contour Map'. [2] Refer to the start of Section 3 for an explanation of indicative versus determined BAL ratings.		

3.1.3 Site Assessment Data Applied to Construction of the BAL Contour Map(s)

RELEVANT CLASSIFIED VEGETATION	
Identification of Classified Vegetation that is Relevant to the Production of the BAL Contour Map(s)	Relevant Vegetation Map
The relevant vegetation will be all areas of classified vegetation that exist at the time of the site assessment – both within the subject site (onsite) and external to the subject site (offsite).	Figure No.3.1
The relevant vegetation for the post-development BAL contour map will be any area of classified vegetation - both within the subject site (onsite) and external to the subject site (offsite) - that will remain at the intended end state of the subject development once earthworks, any clearing and/or landscaping and re-vegetation have been completed.	Figure No.3.1.1
Supporting Assessment Details: None required.	

Table 3.2: The calculation inputs applied to determining the site specific separation distances corresponding to levels of potential radiant heat transfer (including BAL's).

SUMMARY OF CALCULATION INPUT VARIABLES APPLIED TO THE DETERMINATION OF SEPARATION DISTANCES CORRESPONDING TO RADIANT HEAT LEVELS [1]													
Applied BAL Determination Method		METHOD 1 - SIMPLIFIED PROCEDURE (AS 3959:2018 CLAUSE 2.2)											
The Calculation Variables Corresponding to the BAL Determination Method Applied													
Methods 1 and 2		Method 1				Method 2							
Vegetation Classification		FDI	Effective Slope		Site Slope	FFDI or GFDI	Flame Temp.	Elevation of Receiver	Flame Width	Fireline Intensity	Flame Length	Modified View Factor	
			Applied Range	Determined									
Area	Class		degree range	degrees	degrees		K	metres	metres	kW/m	metres	% Reduction	
1	(A) Forest	80	Upslope or flat 0	flat 0									
2	(D) Scrub	80	Upslope or flat 0	flat 0									
3	Excluded cl 2.2.3.2(e & f)	80	N/A	N/A									

[1] All data and information supporting the determination of the classifications and values stated in this table and any associated justification, is presented in Appendix A.

Where the values are stated as 'default' these are either the values stated in AS 3959:2018, Table B1 or the values calculated as intermediate or final outputs through application of the equations of the AS 3959:2018 BAL determination methodology. They are not values derived by the assessor.

Table 3.3: Vegetation separation distances corresponding to the radiant heat levels illustrated as BAL contours in Figure 3.2.

THE CALCULATED VEGETATION SEPARATION DISTANCES (METRES) CORRESPONDING TO THE STATED LEVEL OF RADIANT HEAT FLUX [1]									
Vegetation Classification		Bushfire Attack Levels						Specific Values	
		BAL-FZ	BAL-40	BAL-29	BAL-19	BAL12.5	BAL-LOW		
		Maximum Radiant Heat Flux							
Area	Class	>40 kW/m²	40 kW/m²	29 kW/m²	19 kW/m²	12.5 kW/m²	N/A [2]	10 kW/m²	2 kW/m²
1	(A) Forest	<16	16-<21	21-<31	31-<42	42-<100	>100		
2	(D) Scrub	<10	10-<13	13-<19	19-<27	27-<100	>100		
3	Excluded cl 2.2.3.2(e & f)	N/A	N/A	N/A	N/A	N/A	N/A		

[1] All calculation input variables are presented in Table 3.2. A copy of the radiant heat calculator output for each area of classified vegetation is presented in Appendix A3.
[2] The BAL-LOW rating is not defined by the level of radiant heat flux. It applies when the vegetation separation distance is 100m or 50m for the Grassland vegetation classification.

4 IDENTIFICATION OF BUSHFIRE HAZARD ISSUES

The Guidelines for Planning in Bushfire Prone Areas (WAPC 2021 v1.4), Appendix 5, establish that the application of this section of the BMP is intended to support ***strategic planning*** proposals. At the strategic planning stage there will typically be insufficient proposed development detail to enable all required assessments, including the assessment against the bushfire protection criteria.

Strategic Planning Proposals

For strategic planning proposals this section of the BMP will identify:

- Issues associated with the level of the threats presented by any identified bushfire hazard;
- Issues associated with the ability to implement sufficient and effective bushfire protection measures to reduce the exposure and vulnerability levels (of elements exposed to the hazard threats), to a tolerable or acceptable level; and
- Issues that will need to be considered at subsequent planning stages.

All Other Planning Proposals

For all other planning stages, this BMP will address what are effectively the same relevant issues but do it within the following sections:

- Section 2 – Bushfire Prone Vegetation - Environmental and Assessment Considerations: Assess environmental, biodiversity and conservation values;
- Section 3 – Potential Bushfire Impact: Assess the bushfire threats with the focus on flame contact and radiant heat; and
- Section 5 – Assessment Against the Bushfire Protection Criteria (including the guidance provided by the *Position Statement: 'Planning in bushfire prone areas – Demonstrating Element 1: Location and Element 2'):* Assess the ability of the proposed development to apply the required bushfire protection measures thereby enabling it to be considered for planning approval for these factors.

Is the proposed development a strategic planning proposal?	Yes

STRATEGIC PLANNING PROPOSALS - IDENTIFICATION OF RISK AND PLANNING ISSUES	
The Broader Landscape/Environment – The Potential for Bushfire Intensification and Extreme Events	
The type of bushfire prone vegetation surrounding the proposed development. Referencing the potential levels of each bushfire threat mechanism (direct and indirect).	Surrounding Lot 1407 is predominantly Scrub on the coastal dunes. The main threat to the lot will likely be radiant heat, flame contact and ember attack which will be reduced once APZ's are installed around buildings.
The extent of bushfire prone vegetation surrounding the proposed development – both in area and continuity (fragmentation). Identification of conserved vegetation.	Significant extents of bushfire prone vegetation exist across the broader landscape as retained native vegetation (scrubland with sizes of distinct areas ranging from 5 – 30 ha) but interspersed with improved pastures (grassland) and asset protection zones around existing dwellings. Most of the vegetation west of the development is on private land and subject to various levels of fuel load management. North and south of subject site is crown land.
The potential for the surrounding topography to support known dynamic fire behaviours that can lead to an extreme fire event and	Unlikely due to the lack of unbroken areas of Class A Forest in the region. The site is between the ocean and an area of low threat vegetation (golf course).

intensification through atmospheric interaction (pyroconvective events).	
The Broader Landscape/Environment – The Potential for Increased Vulnerability of Persons in a Bushfire Event	
The wider (regional) road network and any access constraints.	The surrounding area has limited public road network. The subject site is only serviced by Willersdorf Road. This presents evacuation challenges for persons on site. Early evacuation or shelter on site would be the only viable options. A designated on site shelter (built to the relevant standards) would need to provided as well as a Bushfire Evacuation Plan
The proximity of settlements and availability of emergency services	The subject site is 5 minutes by car from the Exmouth town centre. Exmouth Fire Services are also in the vicinity. (Figure 1.3)
Environmental Considerations	
Constraints to implementing required and/or additional bushfire protection measures	An Environmental Management Plan has been prepared for this site. No known priority flora or fauna were found during the assessment.
Provision of Access Within the Subject Site	
Potential constraints	The subject site will have a private driveway which will be compliant with the Guidelines for Planning in Bushfire Prone Areas
Issues to be Considered at Subsequent Planning Stages (additional assessments/documents)	
Specific land uses to be addressed	Vulnerable Tourism
Additional assessments	N/A
Additional documents	Bushfire Management Plan (Development Application) Bushfire Evacuation Plan
Discretionary Decision Making and the Precautionary Principle (SPP 3.7 and Guidelines)	
Does the bushfire consultant consider there are issues that need to be addressed in this space?	No.

5 ASSESSMENT AGAINST THE BUSHFIRE PROTECTION CRITERIA (GUIDELINES V1.4)

5.1 Bushfire Protection Criteria Elements Applicable to the Proposed Development/Use

APPLICATION OF THE CRITERIA, ACCEPTABLE SOLUTIONS AND PERFORMANCE ASSESSMENT

The criteria are divided into five elements – location, siting and design, vehicular access, water and vulnerable tourism land uses. Each element has an intent outlining the desired outcome for the element and reflects identified planning and policy requirements in respect of each issue.

The example acceptable solutions (bushfire protection measures) provide one way of meeting the element's intent. Compliance with these automatically achieves the element's intent and provides a straightforward pathway for assessment and approval.

Where the acceptable solutions cannot be met, the ability to develop design responses (as alternative solutions that meet bushfire performance requirements) is an alternative pathway that is provided by addressing the applicable performance principles (as general statements of how best to achieve the intent of the element).

A merit based assessment is established by the SPP 3.7 and the Guidelines as an additional alternative pathway along with the ability of using discretion in making approval decisions (sections 2.5, 2.6 and 2.7). This is formally applied to certain development (minor and unavoidable – sections 5.4.1 and 5.7). Relevant decisions by the State Administrative Tribunal have also supported this approach more generally.

Elements 1 – 4 should be applied for all strategic planning proposals, subdivision or development applications, except for vulnerable tourism land uses which should refer to Element 5. Element 5 incorporates the bushfire protection criteria in Elements 1 – 4 but caters them specifically to tourism land uses. (Guidelines DPLH 2021v1.4)

The Bushfire Protection Criteria	Applicable to the Proposed Development/Use
Element 1: Location	Yes
Element 2: Siting and Design	Yes
Element 3: Vehicular Access	Yes
Element 4: Water	Yes
Element 5: Vulnerable Tourism Land Uses	Yes

5.2 Local Government Variations to Apply

Local governments may add to or modify the acceptable solutions to recognise special local or regional circumstances (e.g., topography / vegetation / climate). These are to be endorsed by both the WAPC and DFES before they can be considered in planning assessments. (Guidelines DPLH 2021v1.4).	
Do endorsed regional or local variations to the acceptable solutions apply to the assessments against the Bushfire Protection Criteria for the proposed development /use?	None known or identified

5.3 Assessment Statements for Element 1: Location

LOCATION				
Element Intent	To ensure that strategic planning proposals, subdivision and development applications are located in areas with the least possible risk of bushfire to facilitate the protection of people, property and infrastructure.			
Proposed Development/Use – Relevant Planning Stage	(SP) Strategic planning proposal and structure plan where the lot layout is not known			
Element Compliance Statement	The proposed development/use achieves the intent of this element by being fully compliant with all applicable acceptable solutions.			
Pathway Applied to Provide an Alternative Solution	N/A			
Acceptable Solutions - Assessment Statements *All details of acceptable solution requirements are established in the Guidelines for Planning in Bushfire Prone Areas, DPLH v1.4 (Guidelines) and apply the guidance established by the Position Statement: 'Planning in bushfire prone areas – Demonstrating Element 1: Location and Element 2: Siting and design' (WAPC Nov 2019) and the 'Bushfire Management Plan Guidance for the Dampier Peninsula' (WA Department of Planning, Lands and Heritage, 2021 Rev B) as relevant. These documents are available at https://www.wa.gov.au/government/document-collections/state-planning-policy-37-planning-bushfire-prone-areas.*				
Solution Component Check Box Legend	☑ Relevant & met	☒ Relevant & not met	⊘ Not relevant	
E1 Location			**Compliant:**	Yes
A1.1 Development location	**Applicable:**	Yes	**Compliant:**	Yes
ASSESSMENT AGAINST THE REQUIREMENTS ESTABLISHED BY THE GUIDELINES				
☑ ☐ ☐ The strategic planning proposal is located in an area that is or will, on completion, be subject to either a moderate or low bushfire hazard level, or BAL-29 or below.				
Supporting Assessment Details: The final proposed development will provide an area of land within the lot that can be considered suitable for development as BAL-40 or BAL-FZ construction requirements will not be required to be applied. This meets the requirements established by Acceptable Solution A1.1 and its associated explanatory note. In addition, the vegetation surrounding the proposed development can be classed as a moderate bushfire hazard level.				
ASSESSMENTS APPLYING THE GUIDANCE ESTABLISHED BY THE WAPC ELEMENT 1 & 2 POSITION STATEMENT (2019)				
"Consideration should be given to the site context where 'area' is the land both within and adjoining the subject site. The hazards remaining within the site should not be considered in isolation of the hazards adjoining the site, as the potential impact of a bushfire will be dependent on the wider risk context, including how a bushfire could affect the site and the conditions for a bushfire to occur within the site." **Strategic Planning Proposals:** Consider the threat levels from any vegetation adjoining and within the subject site for which the potential intensity of a bushfire in that vegetation would result in it being classified as an Extreme Bushfire Hazard Level (BHL). Identify any proposed design strategies to reduce these threats. **Structure Plans (lot layout known) and Subdivision Applications:** As for strategic planning proposals but within the subject site the relevant threat levels to consider are the radiant heat levels represented by BAL-FZ and BAL-40 ratings.				

The Hazard Within the Subject Site

The existing lot is entirely vegetated with native vegetation classified as Class D Scrub.

Significantly intense bushfire behaviour is possible, particularly if vegetation within the lot is ignited by bushfire in the adjoining hazard and they are involved together.

However, the ability to establish a BAL-29 dimensioned APZ within the lot's boundaries removes the threat of greater levels of radiant heat or flame contact upon a future dwelling. The BAL-29 APZ will exist over a significant area of each proposed Lot 510.

The primary bushfire threat from bushfire prone vegetation remaining within the proposed lot will be embers. This threat will be mitigated by the application of appropriate building design, bushfire construction requirements and the ongoing maintenance of the APZ to ensure the buildings will not be impacted by consequential fire within combustible materials used, stored or accumulated within the APZ.

The Hazard Adjoining the Subject Site

Bushfire prone vegetation within the locality exists as native vegetation classified as Class C Shrubland or Class D Scrub and Class G Grassland. Most of the land within the locality supports this vegetation except for the asset protection zones surrounding existing dwellings.

Bushfire prone vegetation adjoining the existing lot exists as native vegetation classified as Class D Scrub and it surrounds the lot. The extent of this hazard is shown in Figure 3.1. These areas of vegetation are occurring under two scenarios:

1. A 5 hectare area of Crown Land to the east along the coast where native vegetation is unmanaged.
2. A 1160 ha lot that adjoins over northern boundary of the existing lot and which presents the single most significant extent of bushfire prone vegetation.

Consequently, the potential exists for intense bushfire behaviour to occur within these areas of bushfire prone vegetation. The potential bushfire impact on persons and property within the proposed lots will be an increase the level of ember attack in the event of a bushfire.

This ember threat will be mitigated by the application of appropriate building design, bushfire construction requirements and the ongoing maintenance of the BAL-29 dimensioned APZ, to ensure the buildings will not be impacted by consequential fire within combustible materials used, stored or accumulated within the APZ.

The Potential of the Proposed Development to Reduce Bushfire Risk to the Existing Land Use

When considered in the broader context of existing land use within the surrounding area, the future development can potentially contribute to reducing the level of risk from bushfire to existing landowners.

The potential for reduction in bushfire risk to surrounding properties compared to the present situation is considered, and there is significant merit in the proposed future development that it is appropriate to consider.

5.4 Assessment Statements for Element 2: Siting and Design

SITING AND DESIGN OF DEVELOPMENT	
Element Intent	To ensure that the siting and design of development minimises the level of bushfire impact.
Proposed Development/Use – Relevant Planning Stage	(SP) Strategic planning proposal and structure plan where the lot layout is not known
Element Compliance Statement	The proposed development/use achieves the intent of this element by being fully compliant with all applicable acceptable solutions.
Pathway Applied to Provide an Alternative Solution	N/A

Acceptable Solutions - Assessment Statements

All details of acceptable solution requirements are established in the Guidelines for Planning in Bushfire Prone Areas, DPLH v1.4 (Guidelines) and apply the guidance established by the Position Statement: 'Planning in bushfire prone areas – Demonstrating Element 1: Location and Element 2: Siting and design' (WAPC Nov 2019) and the 'Bushfire Management Plan Guidance for the Dampier Peninsula' (WA Department of Planning, Lands and Heritage, 2021 Rev B) as relevant. These documents are available at https://www.wa.gov.au/government/document-collections/state-planning-policy-37-planning-bushfire-prone-areas.

Solution Component Check Box Legend	☑ Relevant & met	☒ Relevant & not met	⊘ Not relevant

E2 Siting and Design of Development			**Compliant:**	Yes
A2.1 Asset Protection Zone (APZ)	**Applicable:**	Yes	**Compliant:**	Yes

APZ DIMENSIONS – DIFFERENCES IN REQUIREMENTS FOR PLANNING ASSESSMENTS COMPARED TO IMPLEMENTATION

A key required bushfire protection measure is to reduce the exposure of buildings/infrastructure (as exposed vulnerable elements at risk), to the direct bushfire threats of flame contact, radiant heat and embers and the indirect threat of consequential fires that result from the subsequent ignition of other combustible materials that may be constructed, stored or accumulate in the area surrounding these structures. This reduces the associated risks of damage or loss.

This is achieved by separating buildings (and consequential fire fuels as necessary) from areas of classified bushfire prone vegetation. This area of separation surrounding buildings is identified as the Asset Protection Zone (APZ) and consists of no vegetation and/or low threat vegetation or vegetation continually managed to a minimal fuel condition. The required separation distances will vary according to the site specific conditions and local government requirements.

The APZ dimensions stated and/or illustrated in this Report can vary dependent on the purpose for which they are being identified.

> *Note: Appendix B 'Onsite Vegetation Management' provides further information regarding the different APZ dimensions that can be referenced, their purpose and the specifications of the APZ that are to be established and maintained on the subject lot.*

THE 'PLANNING BAL-29' APZ DIMENSIONS

Purpose: To provide evidence of the development or use proposal's ability to achieve minimum vegetation separation distances. To achieve 'acceptable solution' planning approval for this factor, it must be demonstrated that the minimum separation distances corresponding to a maximum level of radiant transfer to a building of 29 kW/m², either exist or can be implemented (with certain exceptions). These separation distances are the 'Planning BAL-29' APZ dimensions.

The 'Planning BAL-29' APZ is not necessarily the size of the APZ that must be physically implemented and maintained by a landowner. Rather, its sole purpose is to identify if an acceptable solution for planning approval can be met.

THE 'REQUIRED' APZ DIMENSIONS

Purpose: Establishes the dimensions of the APZ to be physically implemented by the landowner on their lot: These will be the minimum required separation distances from the subject building(s) to surrounding bushfire prone vegetation (identified by type and associated ground slope). These are established by:

A. The 'BAL Rating APZ' of the subject building(s) when distances are greater than 'B' below (except when 'B' establishes a maximum distance); or

B. The 'Local Government' APZ' derived from the Firebreak/Hazard Reduction Notice when distances are greater than 'A' above, other than when a maximum distance is established, in which case this will apply; or

C. A combination of 'A' and 'B'.

*Within this Report/Plan it is the **'Planning BAL-29' APZ** that will be identified on maps, diagrams and in tables as necessary – unless otherwise stated.*

*The **'Required' APZ** dimension information will be presented in Appendix B1.1 and on the Property Bushfire Management Statement, when required to be included for a development application.*

ASSESSMENT AGAINST THE REQUIREMENTS ESTABLISHED BY THE GUIDELINES

☑ ☐ ☐	**APZ Width:** The proposed (or a future) habitable building(s) on the lot(s) of the proposed development - or an existing building for a proposed change of use – can be (or is) located within the developable portion of the lot and be surrounded by a 'Planning BAL-29' APZ of the required dimensions (measured from any external wall or supporting post or column to the edge of the classified vegetation), that will ensure their exposure to the potential radiant heat impact of a bushfire does not exceed 29 kW/m^2.
☐ ☐ ⊘	**Restriction on Building Location:** It has been identified that the current developable portion of a lot(s) provides for the proposed future (or a future) building/structure location that will result in that building/structure being subject to a BAL-40 or BAL-FZ rating. Consequently, it may be considered necessary to impose the condition that a restrictive covenant to the benefit of the local government pursuant to section 129BA of the Transfer of Land Act 1893, is to be placed on the certificate(s) of title of the proposed lot(s) advising of the existence of a restriction on the use of that portion of land (refer to Code F3 of Model Subdivision Conditions Schedule, WAPC January 2024 and Guidelines s5.3.2).
☑ ☐ ☐	**APZ Location:** The required dimensions for a 'Planning BAL-29' APZ can be contained solely within the boundaries of the lot(s) on which the proposed (or a future) habitable building(s) - or an existing building(s) for a proposed change of use – is situated.
☐ ☐ ⊘	**APZ Location:** The required dimensions for a 'Planning BAL-29' APZ can be partly established within the boundaries of the lot(s) on which the proposed (or a future) habitable building(s) - or an existing building(s) for a proposed change of use – is situated. The balance of the APZ would exist on adjoining land that satisfies the exclusion requirements of AS 3959:2018 cl 2.2.3.2 for non-vegetated areas and/or low threat vegetation and/or vegetation managed in a minimal fuel condition.
☐ ☐ ⊘	**APZ Location:** It can be justified that any adjoining (offsite) land forming part of a 'Planning BAL-29' APZ will: • If non-vegetated, remain in this condition in perpetuity; and/or • If vegetated, be low threat vegetation or vegetation managed in a minimal fuel condition in perpetuity.

☑ ☐ ☐	**APZ Management:** The area of land (within each lot boundary), that is to make up the required 'Landowner' APZ dimensions (refer to Appendix B, Part B1), can and will be managed in accordance with the requirements of the Guidelines Schedule 1 'Standards for Asset Protection Zones' (refer to Appendix B).
☐ ☐ ⊘	**Staged Subdivision:** The subdivision proposes development in stages and each stage is to comply with the relevant bushfire protection criteria. A balance lot is created or classified vegetation within a subsequent stage will be removed and/or modified and/or be subject to ongoing management, to ensure that proposed lots within the current stage of the subdivision achieve a development site subject to 29 kW/m² or below. The planned approach for achieving the required outcome is described in the supporting assessment details below.
☑ ☐ ☐	**Firebreak/Hazard Reduction Notice:** Any additional requirements established by the relevant local government's annual notice to install firebreaks and manage fuel loads (issued under s33 of the Bushfires Act 1954), can and will be complied with.
Supporting Assessment Details: Lot 1407 provides ample space to establish BAL-29 asset protection zones which can and will be maintained by the proponent.	
ASSESSMENTS APPLYING THE GUIDANCE ESTABLISHED BY THE WAPC ELEMENT 1 & 2 POSITION STATEMENT (2019)	
Strategic Planning Proposals: "At this planning level there may not be enough detail to demonstrate compliance with this element. The decision-maker may consider this element is satisfied where A1.1 is met." **Structure Plans (lot layout known) and Subdivision Applications:** "Provided that Element 1 is satisfied, the decision-maker may consider approving lot(s) containing BAL-40 or BAL-FZ under the following scenarios.	
Scenario A: The lot size provides sufficient area to accommodate a building and the establishment of an APZ dimensioned to ensure a maximum BAL rating of BAL-29 will apply to that building.	

5.5 Assessment Statements for Element 3: Vehicular Access

VEHICULAR ACCESS	
Element Intent	To ensure that the vehicular access serving a subdivision/development is available and safe during a bushfire event.
Proposed Development/Use – Relevant Planning Stage	(SP) Strategic planning proposal and structure plan where the lot layout is not known
Element Compliance Statement	The proposed development/use achieves the intent of this element by being fully compliant with all applicable acceptable solutions.
Pathway Applied to Provide an Alternative Solution	N/A

Acceptable Solutions - Assessment Statements

All details of acceptable solution requirements are established in the Guidelines for Planning in Bushfire Prone Areas, DPLH v1.4 (Guidelines) and apply the guidance established by the Position Statement: 'Planning in bushfire prone areas – Demonstrating Element 1: Location and Element 2: Siting and design' (WAPC Nov 2019) and the 'Bushfire Management Plan Guidance for the Dampier Peninsula' (WA Department of Planning, Lands and Heritage, 2021 Rev B) as relevant. These documents are available at https://www.wa.gov.au/government/document-collections/state-planning-policy-37-planning-bushfire-prone-areas.

The technical construction requirements for access types and components, and for each firefighting water supply component, are also presented in Appendices C and D. The local government will advise the proponent where different requirements are to apply and when any additional specifications such as those for signage and gates are to apply (these are included in the relevant appendix if requested by the local government).

Solution Component Check Box Legend	☑ Relevant & met	☒ Relevant & not met	⊘ Not relevant

E3 Vehicular Access	**Compliant:**	Yes

A3.1 Public roads	**Applicable:**	Yes	**Compliant:**	Yes

☑ ☐ ☐	The technical construction requirements of vertical clearance and weight capacity (Guidelines, Table 6) can and will be complied with (Refer also to Appendix C in this BMP).
☑ ☐ ☐	The applicable class(s) of road and technical requirements have been confirmed with the relevant local government/Main Roads WA. These can and will be complied with.
☐ ☐ ⊘	A traversable verge is available adjacent to classified vegetation (Guidelines, E3.1), as recommended.

Supporting Assessment Details: Willersdorf Road is the only access road to the lot but is compliant with the local road standards. It currently exists as a dirt/gravel road north of Lot 1407 and will need to be upgraded to an all-weather surface (to the proposed Lot 510) by the LGA or proponent.

A3.2a Multiple access routes	**Applicable:**	Yes	**Compliant:**	Yes

☐ ☒ ☐	For the lot, two-way public road access is provided in two different directions to at least two different suitable destinations with an all-weather surface.
☐ ☒ ☐	The two-way access is available at an intersection no greater than 200m from the relevant boundary of each lot, via a no-through road.

☐ ☐ ⊘	The two-way access is not available at an intersection within 200m from the relevant boundary of each lot. However, the available no-through road satisfies the established exemption for the length limitation in every case. These requirements are: • Demonstration of no alternative access (refer to A3.3 below); • The no-through road travels towards a suitable destination; and • The balance of the no-through road that is greater than 200m from the relevant lot boundary is within a residential built-out area or is potentially subject to radiant heat levels from adjacent bushfire prone vegetation that correspond to the BAL-LOW rating (<12.5 kW/m²).
Supporting Assessment Details: Willersdorf Road is the only access way to the lot. It is approximately 1.5km to the nearest two-way access route. As the future proposal for the LPS Amendment is for tourism – Other Short Term Accommodation, this can be dealt with at a later planning stage through the use of an onsite shelter conforming to the requirements of A5.8.2e.	
A3.2b Emergency access way	**Applicable:** No **Compliant:** N/A
☐ ☐ ⊘	The proposed or existing EAW provides a through connection to a public road.
☐ ☐ ⊘	The proposed or existing EAW is less than 500m in length and will be signposted and gated (remaining unlocked) to the specifications stated in the Guidelines and/or required by the relevant local government.
☐ ☐ ⊘	The technical construction requirements for widths, clearances, capacity, gradients and curves (Guidelines, Table 6 and E3.2b. Refer also to Appendix C in this BMP), can and will be complied with.
☐ ☐ ⊘	The subdivision proposes development in stages and each stage is to comply with the relevant bushfire protection criteria. A temporary EAW is planned to facilitate the staging arrangements of a subdivision as an interim second access route until the required second access route is constructed as a public road in a subsequent stage. The planned approach for achieving the required outcome is described in the supporting assessment details below.
Supporting Assessment Details: None required.	
A3.3 Through-roads	**Applicable:** Yes **Compliant:** Yes
☐ ☐ ⊘	A no-through public road is necessary as no alternative road layout exists due to site constraints.
☐ ☒ ☐	The no-through public road length does not exceed the established maximum of 200m to an intersection providing two-way access (Guidelines, E3.3).
☐ ☐ ⊘	The no-through public road exceeds 200m but satisfies the exemption provisions of A3.2a as demonstrated in A3.2a above.
☑ ☐ ☐	The public road technical construction requirements (Guidelines, Table 6 and E3.1. Refer also to Appendix C in this BMP), can and will be complied with as established in A3.1 above.
☐ ☐ ☐	The turnaround area requirements (Guidelines, Figure 24) can and will be complied with.
Supporting Assessment Details:	

Willersdorf Road is the only access way to the lot which is a no-through road and is part of an existing legacy road layout that is greater than the maximum acceptable solution length of 200m. This is the factor that contributes to the proposals inability to comply with acceptable solution A3.2a. Willersdorf Road It is approximately 1.5km to the nearest two-way access route. It currently exists as a dirt/gravel road north of Lot 1407and will need to be upgraded (to the proposed Lot 510) to an all-weather surface by the LGA or proponent. As the future proposal for the LPS Amendment is for tourism – Other Short Term Accommodation, this can be dealt with at a later planning stage through the use of an onsite shelter conforming to the requirements of A5.8.2e.				
A3.4a Perimeter roads		**Applicable:**	No	**Compliant:** No
☐ ☐ ⊘	The proposed greenfield or infill development consists of 10 or more lots (including those that are part of a staged subdivision) and therefore should have a perimeter road. This is planned to be installed.			
☐ ☐ ⊘	The proposed greenfield or infill development consists of 10 or more lots (including those that are part of a staged subdivision). However, it is not required on the established basis of: • The vegetation adjoining the proposed lots is classified Class G Grassland; • Lots are zoned rural living or equivalent; • It is demonstrated that it cannot be provided due to site constraints; or • All lots have existing frontage to a public road.			
☐ ☐ ⊘	The technical construction requirements of widths, clearances, capacity, gradients and curves (Guidelines, Table 6 and E3.4a) can and will be complied with.			
Supporting Assessment Details: None required.				
A3.4b Fire service access route		**Applicable:**	No	**Compliant:** N/A
☐ ☐ ⊘	The FSAR can be installed as a through-route with no dead ends, linked to the internal road system every 500m and is no further than 500m from a public road.			
☐ ☐ ⊘	The technical construction requirements of widths, clearances, capacity, gradients and curves (Guidelines, Table 6 and E3.4b. Refer also to Appendix C in this BMP), can and will be complied with.			
☐ ☐ ⊘	The FSAR can and will be signposted. Where gates are required by the relevant local government, the specifications can be complied with.			
☐ ☐ ⊘	Turnaround areas (to accommodate type 3.4 fire appliances) can and will be installed every 500m on the FSAR.			
Supporting Assessment Details: None required.				
A3.5 Battle-axe access legs		**Applicable:**	No	**Compliant:** N/A
☐ ☐ ⊘	A battle-axe leg cannot be avoided due to site constraints.			
☐ ☐ ⊘	The proposed development is in a reticulated area and the battle-axe access leg length from a public road is no greater than 50m. No technical requirements need to be met.			

☐ ☐ ⊘	The proposed development is not in a reticulated area. The technical construction requirements for widths, clearances, capacity, gradients and curves (Guidelines, Table 6 and E3.5. Refer also to Appendix C in this BMP), can and will be complied with.
☐ ☐ ⊘	Passing bays can and will be installed every 200m with a minimum length of 20m and a minimum additional trafficable width of 2m.
Supporting Assessment Details: None required.	
A3.6 Private driveways **Applicable:** No **Compliant:** N/A	
☐ ☐ ⊘	The private driveway to the most distant external part of the development site is within a lot serviced by reticulated water, is accessed via a public road with a speed limit of 70 km/hr or less and has a length is no greater than 70m (measured as a hose lay). No technical requirements need to be met.
☐ ☐ ⊘	The technical construction requirements for widths, clearances, capacity, gradients and curves (Guidelines, Table 6 and E3.6. Refer also to Appendix C in this BMP), can and will be complied with.
☐ ☐ ⊘	Passing bays can and will be installed every 200m with a minimum length of 20m and a minimum additional trafficable width of 2m.
☐ ☐ ⊘	The turnaround area requirements (Guidelines, Figure 28, and within 30m of the habitable building) can and will be complied with.
Supporting Assessment Details: None required.	

5.6 Assessment Statements for Element 4: Water

WATER	
Element Intent	To ensure water is available to enable people, property and infrastructure to be defended from bushfire.
Proposed Development/Use – Relevant Planning Stage	(SP) Strategic planning proposal and structure plan where the lot layout is not known
Element Compliance Statement	The proposed development/use achieves the intent of this element by being fully compliant with all applicable acceptable solutions.
Pathway Applied to Provide an Alternative Solution	N/A

Acceptable Solutions - Assessment Statements

All details of acceptable solution requirements are established in the Guidelines for Planning in Bushfire Prone Areas, DPLH v1.4 (Guidelines) and apply the guidance established by the Position Statement: 'Planning in bushfire prone areas – Demonstrating Element 1: Location and Element 2: Siting and design' (WAPC Nov 2019) and the 'Bushfire Management Plan Guidance for the Dampier Peninsula' (WA Department of Planning, Lands and Heritage, 2021 Rev B) as relevant. These documents are available at https://www.wa.gov.au/government/document-collections/state-planning-policy-37-planning-bushfire-prone-areas.

The technical construction requirements for access types and components, and for each firefighting water supply component, are also presented in Appendices C and D. The local government will advise the proponent where different requirements are to apply and when any additional specifications such as those for signage and gates are to apply (these are included in the relevant appendix if requested by the local government).

Solution Component Check Box Legend	☑ Relevant & met	☒ Relevant & not met	⊘ Not relevant

E4 Water	**Compliant:**	Yes

A4.1 Identification of future firefighting water supply	**Applicable:**	Yes	**Compliant:**	Yes

☑ ☐ ☐ It can be demonstrated that reticulated or sufficient non-reticulated water for firefighting can be provided at the subdivision and/or development application stage in accordance with the specifications of the relevant water supply authority or the requirements of Schedule 2.

Supporting Assessment Details: Sufficient fire fighting water will be provided to any future development per the technical requirements (Appendix D).

A4.2 Provision of water for firefighting purposes	**Applicable:**	No	**Compliant:**	N/A

☐ ☐ ⊘ A reticulated water supply is available to the proposed development. The existing hydrant connection(s) are provided in accordance with the specifications of the relevant water supply authority.

☐ ☐ ⊘ A reticulated water supply will be available to the proposed development. Hydrant connection(s) can and will be provided in accordance with the specifications of the relevant water supply authority.

☐ ☐ ⊘ A static water supply (tank) for firefighting purposes will be installed on the lot that is additional to any water supply that is required for drinking and other domestic purposes.

☐ ☐ ⊘ A strategic water supply (tank or tanks) for firefighting purposes will be installed within or adjacent to the proposed development that is additional to any water supply that is required for drinking and other domestic purposes. The required land will be ceded free of cost to the local government and the lot or road reserve where the tank is to be located will be identified on the plan of subdivision.

☐ ☐ ⊘	The strategic static water supply (tank or tanks) will be located no more than 10 minutes travel time from a subject site (at legal road speeds).
☐ ☐ ⊘	The technical requirements (location, number of tanks, volumes, design, construction materials, pipes and fittings), as established by the Guidelines (A4.2, E4 and Schedule 2) and/or the relevant local government, can and will be complied with.
Supporting Assessment Details: None required.	

6 RESPONSIBILITY CHECKLISTS FOR THE IMPLEMENTATION AND MANAGEMENT OF BUSHFIRE PROTECTION MEASURES

The following sections and their associated tables establish:

- The bushfire protection measures that shall be initially implemented and those requiring ongoing maintenance to the stated requirements;
- The persons responsible for the implementation and maintenance of the required bushfire protection measures; and
- The persons responsible and the timing for compliance certification when required.

The necessity for the BMP to contain this information is established by the *Guidelines for Planning in Bushfire Prone Areas* (Version 1.4, WAPC 2021) in Appendices 3 and 5.

6.1 Local Government Responsibilities – Ongoing Management

TABLE 6.4

REQUIRED BUSHFIRE PROTECTION MEASURES – ONGOING MANAGEMENT ACTIONS

1	To be aware of the potential consequences of any significant changes in the local government's management of land, of which they have vested control (including re-vegetation), that could have an adverse impact on the determined BAL ratings that apply to adjacent existing or future buildings and where: • The determined BAL ratings have been established by an existing BMP or a BAL Assessment; and • The BAL has been correctly determined with appropriate consideration of what might reasonably be expected to potentially change in the future with regards to the classification of the vegetation being altered and/or management of the relevant area of vegetation.

APPENDIX A: DETAILED BAL ASSESSMENT DATA AND SUPPORTING INFORMATION

A1: BAL Assessment Inputs Common to the Method 1 and Method 2 Procedures

A1.1: FIRE DANGER INDICES (FDI/FDI/GFDI)

When using Method 1 the relevant FDI value required to be applied for each state and region is established by AS 3959:2018, Table 2.1. Each FDI value applied in Tables 2.4 – 2.7 represents both the Forest Fire Danger Index (FFDI) and a deemed equivalent for the Grassland Fire Danger Index (GFDI), as per Table B2 in Appendix B. When using Method 2, the relevant FFDI and GFDI are applied.

The values may be able to be refined within a jurisdiction, where sufficient climatological data is available and in consultation with the relevant authority.

Relevant Jurisdiction:	WA	Region:	Whole State	Method 1	Applied FDI:	80
				Method 2	Applied FFDI:	N/A
					Applied GFDI:	N/A

A1.2: VEGETATION ASSESSMENT AND CLASSIFICATION

Vegetation Types and Classification

In accordance with AS 3959:2018 Clauses 2.2.3 and C2.2.3.1, all vegetation types within 100 metres of the 'site' (defined as "the part of the allotment of land on which a building stands or is to be erected"), are identified and classified. Any vegetation more than 100 metres from the site that has influenced the classification of vegetation within 100 metres of the site, is identified and noted. The maximum excess distance is established by AS 3959: 2018 Clause 2.2.3.2 and is an additional 100 metres.

Classification is also guided by the Visual Guide for Bushfire Risk Assessment in WA (WA Department of Planning February 2016) and any relevant FPA Australia practice notes.

Modified Vegetation

The vegetation types have been assessed as they will be in their natural mature states, rather than what might be observed on the day. Vegetation destroyed or damaged by a bushfire or other natural disaster has been assessed on its expected re-generated mature state. Modified areas of vegetation can be excluded from classification if they consist of low threat vegetation or vegetation managed in a minimal fuel condition, satisfying AS 3959:2018 Clause 2.2.3.2(f), and there is sufficient justification to reasonable expect that this modified state will exist in perpetuity.

The Influence of Ground Slope

Where significant variation in effective slope exists under a consistent vegetation type, these will be delineated as separate vegetation areas to account for the difference in potential bushfire behaviour, in accordance with AS 3959:2018 Clauses 2.2.5 and C2.2.5.

THE INFLUENCE OF VEGETATION GREATER THAN 100 METRES FROM THE SUBJECT SITE	
Vegetation area(s) within 100m of the site whose classification has been influenced by the existence of bushfire prone vegetation from 100m – 200m from the site:	None
Assessment Statement:	No vegetation types exist close enough, or to a sufficient extent, within the relevant area to influence classification of vegetation within 100 metres of the subject site.

VEGETATION AREA 1						
Classification	**A. FOREST**					
Types Identified	Open forest A-03					
Exclusion Clause	N/A					
Effective Slope	Determined	flat 0 degrees	Applied Range (Method 1)	Upslope or flat 0 degrees		
Foliage Cover of Tallest Plant Layer	30-70%	Shrub/Heath Height	1-2m	Tree Height	Up to 8m	
Dominant & Sub-Dominant Layers	Mixed eucalyptus species (likely planted) over unmanaged scrubs.					
Understorey:	Unmanaged grasses and invasive weeds.					
Justification Comments	Not Required.					
Post Development Assumptions:	N/A

A1.3: EFFECTIVE SLOPE

EXPLAINING THE ASSESSMENT METHODOLOGY APPLIED BY BUSHFIRE PRONE PLANNING

DEFINITION: Effective slope is "the slope under that classified vegetation which most influences the bushfire attack" (AS 3959:2018, Clause 1.5.11).

"The effective slope under the classified vegetation is not the same as the average slope for the land surrounding the site of the proposed building. The effective slope is that slope which most significantly influences bushfire behaviour" (AS 3959:2018, Clause CB4).

The slope is described as upslope, flat or downslope when viewed from an exposed element (e.g., building) and looking towards the vegetation. It is measured in degrees.

[Note: Additional relevant guidance provided by AS 3959:2018 and NSW RFS, Planning for Bushfire Protection (2019) is incorporated into the applied assessment methodology and is presented at the end of this explanation.]

COMPOUND SLOPES UNDER VEGETATION AND DETERMINING SLOPE SIGNIFICANCE

Non-Linear Slopes: When the slope of ground under the vegetation out to the distance to be assessed (100 m or further if necessary), is not a straight line or nearly straight line slope, then it is made up of several different slopes i.e., it is a compound slope. The different slope angles and lengths must be factored into the determination of the effective slope value to be applied. Different slopes will potentially influence the bushfire rate of spread and intensity, both increasing and decreasing it.

Significant Slope: The AS 3959:2018 bushfire attack level determination methodology, with default inputs, models a fully developed bushfire. Therefore, a 'significant' slope is one that will significantly influence bushfire behaviour. To be 'significant' the length of the slope must be 'sufficient' to support a fully developed fire on that slope. The angle of a significant slope could be the determined effective slope for the area of classified vegetation if it is the one that 'most influences the bushfire attack'.

Sufficient Slope Length: Is a slope that will, as a minimum, allow the entire flame depth (flaming zone) of a fully developed fire (100m flame width) to exist on that slope.

The expected flame depth of a fully developed bushfire is a function of the length of time the flaming phase will exist on a section of the fuel bed (the 'residence time') and the bushfire's 'rate of spread'. For a given rate of spread, longer residence times result in greater flame depths. Greater flame depths are correlated with greater flame temperatures and greater flows of radiant heat.

The primary factors that will increase the residence time are:

- Heavier fine fuel loads of grass, leaf litter, twigs, bark etc less than 6mm in width and existing within the surface and near surface layers (and elevated fuel layers when contiguous with the base layers); and
- A greater percentage of larger fine fuels within the fuel load.

The primary factors that increase the rate of spread (apart from fire weather factors), include finer fuels, drier fuels, horizonal continuity of fuel and steeper upward ground slope in the direction of fire travel.

Example values:

- Residence Time: Grassfire 5 – 15 seconds, Forest fire 25 -50 seconds.
- Rate of Spread: Grassfires of a few km/hr are considered fast moving, 5-10 km/hr is common and fastest in the order of 25km/hr. Forest fire typically recorded in metres/hour with 1-1.5 km/hr being considered fast moving and fastest in the order of 3–4 km/hr.
- Flame Depth: More typically, a few metres for grasses to tens of metres for forest fires.

An Isolated Slope: For scenarios where there is a single significant slope (based on the above criteria) additional consideration would need to be given to the time and distance consumed by a bushfire still in its 'developing' phase. This will require due consideration be given to how it is potentially ignited i.e., from a single or multiple points, as this will influence the time and distance required to fully develop. For such scenarios, a normally significant slope may not be sufficiently long. It may be necessary to determine the potential bushfire impact more accurately by

justifying the application of a lesser effective slope, or a lower threat vegetation classification, or calculating a reduced head fire width (using short fire run modelling).

Determined Effective Slope: Only a 'significant' slope can potentially be the effective slope by itself. In which case, for a defined area of classified vegetation area, the worst significant slope under that vegetation is to apply.

The table below presents Bushfire Prone Planning's considerations applied to assessing short and/or compound slopes in determining the effective slope.

Slope Length (m)	Considered a Significant Slope	Considerations in Determining the Effective Slope
< 5	No	Where these short slopes exist as part of a compound slope under an area of classified vegetation, they can be ignored as they will not influence the fire behaviour in that vegetation.
5-20	No	These slopes will have a range of influence on fire behaviour from very little to a degree of influence that must be accounted for to some extent by the determined effective slope that is applied (i.e., with a greater length apply to a greater extent). But the actual slope of these shorter slopes is likely not to be applied as it is not a 'significant' length.
20-30	Maybe	The same considerations applied to the 5-20m slope lengths should be applied here. However, more justification would need to be presented to support their assessment as not being 'significant' slopes. For these slope lengths, consideration must be given more broadly to the potential level of risks associated with a bushfire event in this location. The risk level will be a function of the bushfire hazard threat levels (direct attack mechanisms) within the immediate and broader assessment area as influenced by local topography, vegetation extents and types and the exposure and vulnerability of persons and/or buildings/structures to these threats. Higer risk levels require greater precaution meaning these slopes should be considered 'significant', and vice versa. Consider the potential for a bushfire on adjoining or nearby land be a source of ignition and/or pre-heating to vegetation on the subject slope. Consider if vegetation on the slope is likely be ignited by a single ignition point or is multipoint ignition possible from bushfire an adjoining slopes or the surrounding area. Single point ignition will require a fire to travel further before being fully developed (DFES considers less than 100m fire runs may be considered a short fire run for forest, woodland and scrub vegetation classifications, RFS NSW applies 150m). Isolated slopes of this length are less likely to be considered significant as compared to when part of a compound slope.
>30	Yes	Likely to always be a significant slope unless isolated (i.e., exists alone) – in which case, justifying the application of a lesser effective slope, or a lower threat vegetation classification, or calculating a reduced head fire width, are approaches that may need to be applied.

BPP Approach - Slope Variation Within Areas of Vegetation

When multiple 'significant' slope lengths with large differences in degrees of effective slope (or different applicable slope ranges when AS 3959:2018 Method 1 is applied), exists under a single vegetation classification, these will be delineated as separate vegetation areas of classified vegetation to account for the difference in potential bushfire behaviour and impact, in accordance with AS 3959:2018 clauses 2.2.5 and C2.2.5.

Effective Slope Variation Due to Multiple Development Sites

When the effective slope, under a single area of bushfire prone vegetation, will vary significantly relative to multiple proposed development sites (exposed elements), then the effective slopes corresponding to each of the different

locations, are separately identified. The relevant (worst case) effective slope is determined in the direction corresponding to the potential directions of fire spread towards the subject building(s).

AS 3959:2018 EFFECTIVE SLOPE DETERMINATION - GUIDANCE

The Standard presents a broad set of guidance statements that indicate the intent of deriving an effective slope value for use in calculations, rather than detailing the 'in the field' determination process. These include:

- Highlighting the importance of the value by stating "The slope of the land under the classified vegetation has a direct influence on the rate of fire spread, the severity of the fire and the ultimate level of radiant heat flux" (Clause C2.2.5). [Note: A common rule of thumb is that for every 10 degrees of upslope, a fire will double its rate of spread if moving in the direction of the prevailing wind].
- It may be necessary to consider the slope under the classified vegetation for distances greater than 100 m in order to determine the effective slope for that vegetation classification.
- "Where there is more than one slope within the classified vegetation, each slope shall be individually assessed, and the worst case Bushfire Attack Level shall apply" (Clause 2.2.5).

NSW RFS 2019, PLANNING FOR BUSHFIRE PROTECTION - APPENDIX A1.5 - ADDITIONAL DETERMINATION GUIDANCE

- "In identifying the effective slope - it may be found that there are a variety of slopes covering different distances within the vegetation. The effective slope is considered to be the slope under the vegetation which will most significantly influence the bushfire behaviour for each aspect. This is usually the steepest slope. In situations where this is not the case, the proposed approach must be justified".
- "Vegetation located closest to an asset may not necessarily be located on the effective slope".

A1.4: SEPARATION DISTANCE

Measuring

The separation distance is the distance in the horizontal plane between the receiver (building/structure or area of land being considered) and the edge of the classified vegetation (AS 3959:2018, clause 2.2.4)

The relevant parts of a building/structure from which the measurement is taken is the nearest part of an external wall or where a wall does not exist, the supporting posts or columns. Certain parts of buildings are excluded including eaves and roof overhangs.

The edge of the vegetation, for forests and woodlands, will be determined by the unmanaged understorey rather than either the canopy (drip line) or the trunk (AS 3959:2018, clause C2.2.5).

Measured Separation Distance as a Calculation Input

If a separation distance can be measured because the location of the building/structure relative to the edge of the relevant classified vegetation is known, this figure can be entered into the BAL calculation. The result is a determined BAL rating.

Assumed Separation Distance as a Calculation Input

When the building/structure location within the lot is not known, an assumed building location may be applied that would establish the closest positioning of the building/structure relative to the relevant area of vegetation.

The assumed location would be based on a factor that puts a restriction on a building location such as:

- An established setback from the boundary of a lot, such as a residential design code setback or a restrictive covenant; or
- Within an established building envelope.

The resultant BAL rating would be indicative and require later confirmation (via a Compliance Report) of the building/structure actual location relative to the vegetation to establish the determined BAL rating.

Separation Distance as a Calculation Output

With the necessary site specific assessment inputs and using the AS 3959:2018 bushfire modelling equations, the range of separation distances that will correspond to each BAL rating (each of which represents a range of radiant heat flux), can be calculated. This has application for bushfire planning scenarios such as:

- When the separation distance cannot be measured because the exact location of the exposed element (i.e., the building, structure or area), relative to classified vegetation, is yet to be determined.

  In this scenario, the required information is the identification of building locations onsite that will correspond to each BAL rating. That is, indicative BAL ratings can be derived for a variety of potential building/structure locations; or

- The separation distance is known for a given building, structure or area (and a determined BAL rating can be derived), but additional information is required regarding the exposure levels (to the transfer of radiant heat from a bushfire), of buildings or persons, that will exist at different points within the subject site.

The calculated range of separation distances corresponding to each BAL rating can be presented in a table and/or illustrated as a BAL Contour Map – whichever is determined to best fit the purpose of the assessment.

For additional information refer to the information boxes in Section 3 'Bushfire Attack Levels (BAL) - Understanding the Results and Section 3.2. 'Interpretation of the BAL Contour Map'.

SITE ASSESSMENT DETAILS - EXPLANATION & JUSTIFICATION

For the subject development/use the applicable separation distances values are derived from calculations applying the assessed site data. They are an output value, not an input value and therefore are not presented or justified in this appendix.

The derived values are presented in Section 3, Table 3.1 and illustrated as a BAL contour map in Figure 3.2.

APPENDIX B: ADVICE - ONSITE VEGETATION MANAGEMENT - THE APZ

THE ASSET PROTECTION ZONE (APZ) – DESCRIPTION AND OBJECTIVES

Description: The asset protection zone (APZ) is the area of land surrounding a building or structure on which any combustible materials will be located and/or managed to reduce the potential impact of the direct and indirect attack mechanisms (threats) of bushfire, and therefore reduce the associated risks of building/structure damage or loss, to acceptable levels.

When cultivated and/or natural vegetation exists within the zone it must present low potential threat levels from the direct fire attack mechanisms of flame contact, radiant heat and ember attack and fire driven wind, and the indirect attack mechanisms of debris accumulation, surface fire, tree strike and consequential fire.

The required low threat levels will be achieved as the result of factors that include persistent higher fuel moisture contents, lower flammability and/or minimal fuel loads, due to either limiting the existence of these fuels through removal and/or modification, and the subsequent ongoing management (reduction) of fuel loads.

When a bushfire attack level (BAL) is required to be determined for a building/structure to establish its bushfire construction requirements, the condition of the vegetation within the APZ must satisfy the requirements established by *clause 2.2.3.2 of AS 3959:2018 Construction of buildings in bushfire prone areas* - to be excluded from classification.

For other combustible structures/materials within the APZ, lower threat levels will be the result of factors such as their appropriate use, lowered vulnerability and location relative to the primary building/structure to be protected.

Objectives: The primary objectives of establishing a low threat area surrounding buildings/structures are to create that performs the following functions:

1. To establis an APZ of specified dimensions ensure the building is sufficiently separated from the identified bushfire hazard to limit the impact of its direct attack mechanisms. The required dimensions of the APZ must:
    - Remove the potential for direct flame contact on the building;
    - Reduce the level of radiant heat to which the building is exposed. The APZ dimensions should ensure that the potential level of radiant heat impact corresponds to the level of vulnerability of the building/structure - as determined by the degree to which bushfire resistant construction has been applied (or not). For example, when constructed to the requirements corresponding to its determined exposure to radiant heat (measured as a bushfire attack level) in accordance with AS 3959 or the NASH Standard.
    - Ensure some reduction in the threat level of the ember/burning debris attack mechanism when higher threat vegetation types are present in the vicinity. Note, the reduction in some scenarios will be minimal given the produced quantity, type, survival time and consequent distance that certain embers/burning debris can travel.

      Be aware of that research has identified that consequential fire, ignited by embers, is the primary cause (>80%) of building loss in past Australian bushfire events. In bushfire prone areas, the importance of applying protection measures to prevent ember entry to buildings/structures and minimising the existence of consequential fire fuels cannot be overstated.
2. To ensure any combustible fuels (debris and structures) or trees that remain within the APZ will be managed and located to limit the potential impact of the indirect attack mechanisms of bushfire by:
    - Minimising the accumulation of debris on, within and around buildings/structures to limit this source of fuel for consequential fires that will result in the direct fire attack mechanisms of flames and greater radiant heat existing closer to the buildings/structures, even though the bushfire hazard exists at a greater distance away;
    - To prevent surface fire moving through the APZ and closer to buildings/structures than the fire in the bushfire hazard itself can;

- Prevent fire weakened or windblown trees/branches impacting buildings/structures and allowing ember/burning debris entry;

- To ensure other combustible materials that can result in a consequential fire ignited by embers/burning debris), within both the APZ and parts of the building, are eliminated, minimised and/or appropriately located or protected (the explanatory notes in the Guidelines provide some guidance for achieving this objective and other sources are available); and

3. To provide a defendable space for firefighting activities.

B1: Asset Protection Zone (APZ) Dimensions

APZ DIMENSIONS – DIFFERENCES IN REQUIREMENTS FOR PLANNING ASSESSMENTS COMPARED TO IMPLEMENTATION

THE 'PLANNING BAL-29' APZ DIMENSIONS

The 'Planning BAL-29' APZ is not necessarily the size of the APZ that must be physically implemented and maintained by a landowner. Rather, its purpose is to identify if an acceptable solution for planning approval can be met i.e., can a specified minimum separation distance from bushfire prone vegetation exist.

An assessment against the Bushfire Protection Criteria is conducted for planning approval purposes. To satisfy 'A2.1: Asset Protection Zone', it must be demonstrated that certain minimum separation distances between the relevant building/structure and different classes of bushfire prone vegetation, either exist or can be created and will remain in perpetuity. These minimum separation distances determine the 'Planning BAL-29' APZ dimensions.

Dimensions: The minimum dimensions are those that will ensure the potential radiant heat impact on subject buildings does not exceed 29 kW/m^2. These dimensions will vary dependent on the vegetation classification, the slope of the land they are growing on and certain other factors specific to the subject site.

Note: For certain purposes associated with vulnerable land uses, the 'Planning BAL-29' APZ may be replaced with dimensions corresponding to radiant heat impact levels of 10 kW/m^2 and 2 kW/m^2 and calculated using 1200K flame temperature.

Location: The identified 'Planning BAL-29' APZ must not extend past lot boundaries onto land the landowner has no control over either now or potentially at some point in the future. Limited exceptions include:

- When adjoining land is not vegetated (e.g., built out, roads, carparks, drainage, rock, water body etc.);
- When adjoining land currently or, will in the short term, contain low threat vegetation and or vegetation managed in a minimal fuel condition as per AS 3959:2018 cl. 2.2.3.2. It must be reasonable (justifiable) to expect this low threat vegetation and/or level of management will continue to exist or be conducted in perpetuity and require no action from the owner of the subject lot.

  Such areas of land include formally managed areas of vegetation (e.g., public open space / recreation areas / services installed in a common section of land). For specific scenarios, evidence of the formal commitment to manage these areas to a certain standard may be required and would be included in the BMP.

  These areas of land can also be part of the required APZ on a neighbouring lot for which the owner of that lot has a recognised responsibility to establish and maintain; and
- When there is a formalised and enforceable capability and responsibility created for the subject lot owner, or any other third party, to manage vegetation on land they do not own in perpetuity. This would be rare, and evidence of the formal authority would be included in the BMP.

The bushfire consultant's 'Supporting Assessment Detail', that is presented in the assessment against the acceptable solution A2.1, will identify and justify how any adjoining land within the 'Planning BAL-29 APZ will meet the APZ standards. Or otherwise, explain how this condition cannot be met.

THE 'BAL RATING' APZ DIMENSIONS

The applicable BAL rating will have been stated in the BAL Assessment Data section of the BAL Assessment Report or BMP (as relevant). The BAL rating can be assessed as 'determined' or 'indicative' or be 'conditional', dependent of the specific conditions associated with the site and the stage of assessment or planning. It is the eventual assessment of the 'Determined' BAL that will establish both the BAL rating that is to apply and its corresponding 'BAL Rating' APZ dimensions.

Dimensions: The minimum dimensions of the 'BAL Rating' APZ to be established and maintained will be those that correspond to the determined BAL rating for the subject building/structure that has accounted for surrounding vegetation types, the slope of the land they are growing on and certain other factors specific to the subject site and surrounding land.

Establishing the 'BAL Rating' APZ will ensure that the potential radiant heat exposure of the building/structure will be limited to the level that the applied construction requirements are designed to resist when that building/structure is required to be constructed to the standard corresponding to the Determined BAL.

Note: For certain purposes associated with vulnerable land uses, the 'BAL Rating' APZ dimensions may be replaced with dimensions corresponding to the specific radiant heat impact levels of 10 kW/m² and 2 kW/m² and calculated using 1200K flame temperature.

Location: The same conditions will apply as for the 'Planning BAL-29' APZ.

THE 'LOCAL GOVERNMENT' APZ DIMENSIONS

Some Local Government's establish the dimensions of the APZ that must be established surrounding buildings in their annual Firebreak/Hazard Reduction Notice. Or for a specific site they may establish a maximum allowable dimension (typically that corresponding to BAL-29). When established, the landowner will need to be comply with these.

THE 'REQUIRED' APZ DIMENSIONS

This is the APZ that is to be established and maintained by the landowner within the subject lot and surrounding the subject building(s). It will be identified on the Property Bushfire Management Statement when it is required to be included in this Report/Plan.

Dimensions: The 'Required APZ' dimensions are the minimum (or maximum when relevant) distances away from the subject building(s) that the APZ must extend. These distances will not necessarily be the same all around the building(s). They can vary and are dependent on the different vegetation types (and their associated ground slope) that can exist around the building(s), and specific local government requirements. The dimensions to implement are determined by:

A. The 'BAL Rating APZ' of the subject building(s) when distances are greater than 'B' below (except when 'B' establishes a maximum distance); or

B. The 'Local Government' APZ' derived from the Firebreak/Hazard Reduction Notice when distances are greater than 'A' above, other than when a maximum distance is established, in which case this will apply; or

C. A combination of 'A' and 'B'.

Location: The same conditions will apply as for the 'Planning BAL-29' APZ.

B1.1: THE APZ DIMENSIONS REQUIRED TO BE IMPLEMENTED BY THE LANDOWNER

DETERMINATION OF THE 'REQUIRED' APZ DIMENSIONS TO BE IMPLEMENTED AND MAINTAINED BY LANDOWNER WITHIN THEIR LOT									
Relevant Buildings(s)	Vegetation Classification [Refer to Fig 3.1]		Minimum Required Separation Distances from Building to Vegetation (metres)						
			Established by the 'BAL Rating' APZ Dimension					Established by the "Local Government' APZ Dimension	The 'Required' APZ Dimensions [see note]
			Determined Radiant Heat Impact	Stated 'Indicative' or 'Conditional' BAL				Firebreak / Hazard Reduction Notice	
	Area	Class		BAL-29	BAL-19	BAL-12.5	BAL-LOW		
All future proposed buildings	1	(A) Forest	N/A	21	31	42	100	20	21
	2	(D) Scrub		13	19	27	100	20	20
	3	Excluded cl 2.2.3.2(e & f)		N/A	N/A	N/A	N/A	N/A	N/A
Note: The 'Required' APZ Dimension corresponding to each area of vegetation is the greater of the 'BAL Rating' or the 'Firebreak/Hazard Reduction Notice' APZ dimensions - unless a local government maximum distance(s) is established as a result of their environmental assessment of the subject site. The area of the APZ will also be limited to the subject lot boundary unless otherwise justified in this Report/Plan. Final determination of the dimensions will require that any indicative or conditional BAL becomes a 'Determined' BAL.									
Comments: In accordance with the Shire of Exmouth Firebreak Notice ; for all buildings on land outside of the townsite, mineral earth breaks of at least three (3) metres in width must be cleared of all flammable material. These breaks are to be constructed around and within 20 metres of the perimeter of each building, and on such lands so to completely enclose the building envelope with such a firebreak.									

B2: The Standards for the APZ as Established by the Guidelines (DPLH, v1.4)

Within the Guidelines (source: https://www.wa.gov.au/government/document-collections/state-planning-policy-37-planning-bushfire-prone-areas), the management Standards are established by:

- Schedule 1: Standards for Asset Protection Zones (see extract below) established by the Guidelines; and
- The associated explanatory notes (Guidelines E2) that address (a) managing an asset protection zone (APZ) to a low threat state (b) landscaping and design of an asset protection zone and (c) plant flammability.

ELEMENT 2: SITING AND DESIGN OF DEVELOPMENT

SCHEDULE 1: STANDARDS FOR ASSET PROTECTION ZONES

OBJECT	REQUIREMENT
Fences within the APZ	• Should be constructed from non-combustible materials (for example, iron, brick, limestone, metal post and wire, or bushfire-resisting timber referenced in Appendix F of AS 3959).
Fine fuel load (Combustible, dead vegetation matter <6 millimetres in thickness)	• Should be managed and removed on a regular basis to maintain a low threat state. • Should be maintained at <2 tonnes per hectare (on average). • Mulches should be non-combustible such as stone, gravel or crushed mineral earth or wood mulch >6 millimetres in thickness.
Trees* (>6 metres in height)	• Trunks at maturity should be a minimum distance of six metres from all elevations of the building. • Branches at maturity should not touch or overhang a building or powerline. • Lower branches and loose bark should be removed to a height of two metres above the ground and/or surface vegetation. • Canopy cover within the APZ should be <15 per cent of the total APZ area. • Tree canopies at maturity should be at least five metres apart to avoid forming a continuous canopy. Stands of existing mature trees with interlocking canopies may be treated as an individual canopy provided that the total canopy cover within the APZ will not exceed 15 per cent and are not connected to the tree canopy outside the APZ. **Figure 19:** Tree canopy cover – ranging from 15 to 70 per cent at maturity  15% 30% 70%

Shrub* and scrub* (0.5 metres to six metres in height). Shrub and scrub >6 metres in height are to be treated as trees.	• Should not be located under trees or within three metres of buildings. • Should not be planted in clumps >5 square metres in area. • Clumps should be separated from each other and any exposed window or door by at least 10 metres.
Ground covers* (<0.5 metres in height. Ground covers >0,5 metres in height are to be treated as shrubs)	• Can be planted under trees but must be maintained to remove dead plant material, as prescribed in 'Fine fuel load' above. • Can be located within two metres of a structure, but three metres from windows or doors if >100 millimetres in height.
Grass	• Grass should be maintained at a height of 100 millimetres or less, at all times. • Wherever possible, perennial grasses should be used and well-hydrated with regular application of wetting agents and efficient irrigation.
Defendable space	• Within three metres of each wall or supporting post of a habitable building, the area is kept free from vegetation, but can include ground covers, grass and non-combustible mulches as prescribed above.
LP Gas Cylinders	• Should be located on the side of a building furthest from the likely direction of a bushfire or on the side of a building where surrounding classified vegetation is upslope, at least one metre from vulnerable parts of a building. • The pressure relief valve should point away from the house. • No flammable material within six metres from the front of the valve. • Must sit on a firm, level and non-combustible base and be secured to a solid structure.

** Plant flammability, landscaping design and maintenance should be considered – refer to explanatory notes*

B3: The Standards for the APZ as Established by the Local Government

Refer to the firebreak / hazard reduction notice issued annually (under s33 of the Bushfires Act 1954) by the relevant local government. It may state Standards that vary from those established by the Guidelines and that have been endorsed by the WAPC and DFES as per Section 4.5.3 of the Guidelines.

A copy of the applicable notice is not included here as they are subject to being reviewed and modified prior to issuing each year. Refer to ratepayers notices and/or the local government's website for the current version.

B4: Vegetation and Areas Excluded from Classification - Ensure Continued Exclusion

AS 3959:2018 establishes the methodology for determining a bushfire attack level (BAL). The methodology includes the classification of the subject site's surrounding vegetation according to their 'type' and the application of the corresponding relevant bushfire behaviour models to determine the BAL.

Certain vegetation can be considered as low threat or managed in a minimal fuel condition and can be excluded from classification. Where this has occurred in assessing the site, the extract from AS3959:2018 below states the requirements that must continue to exist for the vegetation on those areas of land to be excluded from classification (including the size of the vegetation area if relevant to the assessment).

2.2.3.2 *Exclusions—Low threat vegetation and non-vegetated areas*

The following vegetation shall be excluded from a BAL assessment:

(a) Vegetation of any type that is more than 100 m from the site.

(b) Single areas of vegetation less than 1 ha in area and not within 100 m of other areas of vegetation being classified vegetation.

(c) Multiple areas of vegetation less than 0.25 ha in area and not within 20 m of the site, or each other or of other areas of vegetation being classified vegetation.

(d) Strips of vegetation less than 20 m in width (measured perpendicular to the elevation exposed to the strip of vegetation) regardless of length and not within 20 m of the site or each other, or other areas of vegetation being classified vegetation.

(e) Non-vegetated areas, that is, areas permanently cleared of vegetation, including waterways, exposed beaches, roads, footpaths, buildings and rocky outcrops.

(f) Vegetation regarded as low threat due to factors such as flammability, moisture content or fuel load. This includes grassland managed in a minimal fuel condition, mangroves and other saline wetlands, maintained lawns, golf courses (such as playing areas and fairways), maintained public reserves and parklands, sporting fields, vineyards, orchards, banana plantations, market gardens (and other non-curing crops), cultivated gardens, commercial nurseries, nature strips and windbreaks.

NOTES:

1 Minimal fuel condition means there is insufficient fuel available to significantly increase the severity of the bushfire attack (recognizable as short-cropped grass for example, to a nominal height of 100 mm).

2 A windbreak is considered a single row of trees used as a screen or to reduce the effect of wind on the leeward side of the trees.

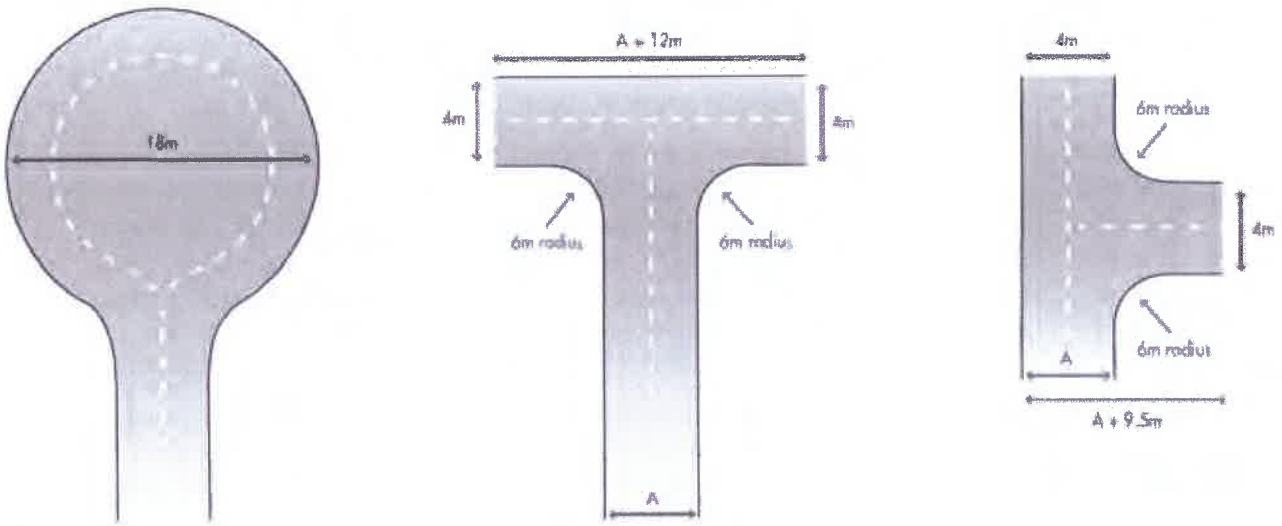
APPENDIX C: TECHNICAL REQUIREMENTS FOR VEHICULAR ACCESS

The design/layout requirements for access are established by the acceptable solutions of the Guidelines (DPLH, 2021 v1.4) Element 3 and vary dependent on the access component, the land use and the presence of 'vulnerable' persons. Consequently, the best reference source are the Guidelines. The technical requirements that are fixed for all components and uses are presented in this appendix.

GUIDELINES TABLE 6, EXPLANATORY NOTES E3.3 & E3.6 AND RELEVANT ACCEPTABLE SOLUTIONS

Technical Component	Vehicular Access Types / Components			
	Public Roads	Emergency Access Way [1]	Fire Service Access Route [1]	Battle-axe and Private Driveways [2]
Minimum trafficable surface (m)	In accordance with A3.1	6	6	4
Minimum Horizontal clearance (m)	N/A	6	6	6
Minimum Vertical clearance (m)	4.5			
Minimum weight capacity (t)	15			
Maximum Grade Unsealed Road [3]	As outlined in the IPWEA Subdivision Guidelines	1:10 (10%)		
Maximum Grade Sealed Road [3]		1:7 (14.3%)		
Maximum Average Grade Sealed Road		1:10 (10%)		
Minimum Inner Radius of Road Curves (m)		8.5		

Turnaround Area Dimensions for No-through Road, Battle-axe Legs and Private Driveways [4]



Passing Bay Requirements for Battle-axe leg and Private Driveway

When the access component length is greater than the stated maximum, passing bays are required every 200m with a minimum length of 20m and a minimum additional trafficable width of 2m (i.e. the combined trafficable width of the passing bay and constructed private driveway to be a minimum 6m).

Emergency Access Way – Additional Requirements

Provide a through connection to a public road, be no more than 500m in length, must be signposted and if gated, gates must be open the whole trafficable width and remain unlocked.

[1] To have crossfalls between 3 and 6%.

[2] Where driveways and battle-axe legs are not required to comply with the widths in A3.5 or A3.6, they are to comply with the Residential Design Codes and Development Control Policy 2.2 Residential Subdivision.

[3] Dips must have no more than a 1 in 8 (12.5% or 7.1 degree) entry and exit angle.

[4] The turnaround area should be within 30m of the main habitable building.

APPENDIX D: TECHNICAL REQUIREMENTS FOR FIREFIGHTING WATER SUPPLY

D1: Reticulated Areas – Hydrant Supply

The Guidelines state "where a reticulated water supply is existing or proposed, hydrant connection(s) should be provided in accordance with the specifications of the relevant water supply authority."

The main scheme water suppliers / authorities in WA are The Water Corporation, AqWest – Bunbury Water Corporation and Busselton Water Corporation. Various local authority exists in other non-scheme and regional areas. However, most existing fire hydrants are connected to Water Corporation water mains.

Consequently, the hydrant location specifications from The Water Corporation's 'No 63 Water Reticulation Standard' (Ver 3 Rev 15) are provided in the extract below with the key distances relevant to bushfire planning assessments being highlighted. This Standard is deemed to be the baseline criteria for developments and should be applied unless different local water supply authority conditions apply. Other applicable specification will be found in the Standard.

Note: The maximum distance from a hydrant to the rear of a lot/building is generally interpreted as not applicable to large lot sizes where the maximum distance becomes an impractical limitation i.e., typically rural residential areas.

2.2.1.5 Appurtenances

c. Hydrants

Hydrants shall be screw-down hydrant with built-in isolation valve and installed only on DN100 or larger pipes. Hydrants shall be located:

- so that the maximum distance between a hydrant and the rear of a building envelope (or in the absence of a building envelope the rear of the lot) shall be 120m;
- so that spacing (as measured by hose-run) between hydrants in non-residential or mixed use areas shall be maximized and no greater than 100m;
- so that spacing (as measured by hose-run) between hydrants in residential areas with lots per dwelling <10,000m² shall be maximized and no greater than 200m;
- so that spacing between hydrants (as measured by hose-run) in rural residential areas where minimum lots per dwelling is >10,000 m² (1ha) shall be maximized and no greater than 400m;
- centrally along the frontage of a lot to avoid being under driveways, unless the lot features a frontage 6m or less, in which case it shall be placed to the side opposite the driveway;
- at lots that have the widest frontage in the local area;
- where appropriate at the truncation of road junctions or intersections so that they can serve more than one street and can be readily located;
- on both sides of the major roads at staggered intervals where there are mains on both sides of the road;
- at major intersections on dual multi-lane roads, where two hydrants are to be sited on diagonally opposite corners;
- hydrants should be located at least 20m from traffic calming devices i.e., median slow points or chokers, chicanes, mini traffic circles, and intersection 'pop-outs' to ensure traffic is not impeded;
- in a position not less than 10m from any high voltage main electrical distribution equipment such as transformers and distribution boards, liquefied petroleum gas or other combustible storage;
- directly on top of the main using a tee unless proved to be impractical.

© Copyright Water Corporation 2001-2021

D2: Non-Reticulated Areas – Static Supply

For specified requirements, refer to the Guidelines Element 4: Water – Acceptable Solution A4.2 , Explanatory Notes E4 (that provide water supply establishment detail under the headings of water supply; independent water and power supply; strategic water supplies, alternative water sources and location of water tanks) and the technical requirements established by Schedule 2 (reproduced below).

SCHEDULE 2: WATER SUPPLY DEDICATED FOR BUSHFIRE FIREFIGHTING PURPOSES

2.1 Water supply requirements

Water dedicated for firefighting should be provided in accordance with Table 7 below, and be in addition to water required for drinking purposes.

Table 7: Water supply dedicated for bushfire firefighting purposes

PLANNING APPLICATION	NON-RETICULATED AREAS
Development application	10,000L per habitable building
Structure Plan / Subdivision: Creation of 1 additional lot	10,000L per lot
Structure Plan / Subdivision: Creation of 3 to 24 lots	10,000L tank per lot **or** 50,000L strategic water tank
Structure Plan / Subdivision: Creation of 25 lots or more	50,000L per 25 lots or part thereof Provided as a strategic water tank(s) or 10,000L tank per lot

2.2 Technical requirements

2.2.1 Construction and design

An above-ground tank and associated stand should be constructed of non-combustible material. The tank may need to comply with AS/NZS 3500.1:2018.

Below ground tanks should have a 200mm diameter access hole to allow tankers or emergency service vehicles to refill direct from the tank, with the outlet location clearly marked at the surface. The tank may need to comply with AS/NZS 3500.1:2018. An inspection opening may double as the access hole provided that the inspection opening meets the requirements of AS/NZS 3500.1:2018. If the tank is required under the BCA as part of fire hydrant installation, then the tank will also need to comply with AS 2419.

Where an outlet for an emergency service vehicle is provided, then an unobstructed, hardened ground surface is to be supplied within four metres of any water supply.

2.2.2 Pipes and fittings

All above-ground, exposed water supply pipes and fittings should be metal. Fittings should be located away from the source of bushfire attack and be in accordance with the applicable section below, unless otherwise specified by the local government.

2.2.2.1 Fittings for above-ground water tanks:

- Commercial land uses: 125mm Storz fitting; or
- Strategic water tanks: 50mm or 100mm (where applicable and adapters are available) male camlock coupling with full flow valve; or
- Standalone water tanks: 50mm male camlock coupling with full flow valve; or
- Combined water tanks: 50mm male camlock coupling with full flow valve or a domestic fitting, being a standard household tap that enables an occupant to access the water supply with domestic hoses or buckets for extinguishing minor fires.

2.2.2.2 Remote outlets

In certain circumstances, it may be beneficial to have the outlet located away from the water supply. In such instances in which a remote outlet is to be used, the applicant should consult the local government and DFES on their proposal.

EXAMPLE CONSTRUCTION AND FITTINGS

Strategic 47,000 Litre Concrete Tank & Protected Fittings

10,000 Litre Concrete Tank

Storz and Camlock Couplings

Full Flow 50mm Ball Valve

Full Flow 50mm Gate Valve and Male Camlock
